SKU: 9780136162186-SOLUTIONS

Chapter 1

Accounting and the Business Environment

Chapter 1: Overview

The chapter begins with an introduction to accounting and a brief discussion of why accounting is important. The differences between financial and managerial accounting are delineated. The text discusses how accounting information is needed by various users—individuals, businesses, investors, creditors, and taxing authorities. Reasons accounting is important to students not majoring in accounting and career paths available to accounting majors are briefly described, including a comparison of various accounting positions. The role of governing organizations such as the Financial Accounting Standards Board (FASB) and the Securities and Exchange Commission (SEC) as well as the FASB's relationships with both congressionally created and private accounting groups are explained. Generally Accepted Accounting Principles (GAAP) are introduced. The sole proprietorship, partnership, corporation, and limited liability company (LLC) forms of business are briefly described in the context of the economic entity assumption. In addition, the cost principle, going concern assumption, and monetary unit assumption are explained. The nature of International Financial Reporting Standards (IFRS) and the role of the International Accounting Standards Board (IASB) in their development are explained. The role of ethics in accounting and business is described. The U.S. government's passing of the Sarbanes-Oxley Act (SOX) and the creation of the Public Company Accounting Oversight Board (PCAOB) are presented. A Data Analytics in Accounting feature highlights the importance of data analytics skills for accountants.

The next section of the chapter introduces the accounting equation: Assets = Liabilities + Equity. Each element of the accounting equation is defined. Nine basic business transactions are analyzed, and their impact on the accounting equation is discussed. The financial statements—income statement, statement of owner's equity, balance sheet, and statement of cash flows—are illustrated. The interrelationship of the financial statements is emphasized.

A Tying It All Together feature poses four questions regarding a company's asset, liability, revenue, and expense accounts and the proper financial statement reporting for each. Financial statements and return on assets (ROA) are used to evaluate business performance. A Decisions feature helps students see how financial statements and ROA can be used to make real-world decisions. The Review section includes Things You Should Know which highlights the information students should have acquired from the chapter. A Check Your Understanding feature allows students to record the effects of transactions on the accounting equation, prepare financial statements, and calculate ROA. A list of Key Terms is provided. A Quick Check gives students a chance to assess their knowledge of the chapter learning objectives.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Chapter 1: Learning Objectives

LO 1. Explain why accounting is important and list the users of accounting information

LO 2. Describe the organizations and rules that govern accounting

LO 3. Describe the accounting equation and define assets, liabilities, and equity

LO 4. Use the accounting equation to analyze transactions

LO 5. Prepare financial statements

LO 6. Use financial statements and return on assets (ROA) to evaluate business performance

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Chapter 1: Teaching Outline with Lecture Notes

LO 1. Explain why accounting is important and list the users of accounting information

a) Define the term accounting and explain what accountants do

b) Exhibit F:1-1: Pathways Vision Model

Lecture Notes: The model emphasizes that good decisions have an impact on accounting judgments and economic activity, thus creating a circular flow of cause and effect. Accounting is defined as the information system that measures business activities, processes the information into reports, and communicates the results to decision makers. However, accountants do not simply prepare various types of accounting reports and tax returns. They also review and interpret business information using critical thinking and judgment to partner with clients and managers to help them make better business decisions.

c) Differentiate between financial accounting and managerial accounting

d) Exhibit F:1-2: Decision Making: Financial Versus Managerial Accounting

Lecture Notes: Financial accounting provides historical information—the company reports on events that have already occurred—to external decision makers, including investors and creditors. Managerial accounting provides more future-oriented information—many companies prepare budgets, forecasts, and projections based on future events—for internal decision makers (company managers and executives).

e) Identify the users of accounting information:

i. Individuals

ii. Businesses

iii. Investors

iv. Creditors

v. Taxing authorities

Lecture Notes: The officers of a company may be (and probably are) owners as well. Not all investors are "outside" the company. The financial statements are the primary tools for providing information to outside investors; but officers may also use the statements, along with other financial information, to manage the company on a day-to-day basis.

f) Describe career options and certifications available in the accounting profession

Lecture Notes: Certified Public Accountants, or CPAs, are licensed professional accountants who serve the general public. Certified Management Accountants, or CMAs, are certified professionals

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

who specialize in accounting and financial management knowledge. Not all accountants are licensed, and those who are may not necessarily be members of the AICPA and IMA, the professional associations described in the textbook. There are many other types of accounting-related associations and certifications in the United States and elsewhere around the world, including Certified Internal Auditor (CIA), Certified Government Financial Manager (CGFM), Certified Fraud Examiner (CFE), Certified Financial Manager (CFM), Enrolled Agent (EA), Certified Global Management Accountant (CGMA), Chartered Accountant (CA), Certified Financial Planner (CFP), and many more.

Accountants also need data analytics skills to be successful. An understanding of how technology is used to process financial information is critical in today's job market.

g) Exhibit F:1-3: Comparison of Accounting Positions

Suggested In-Class Exercise: E-F 1-17

LO 2. Describe the organizations and rules that govern accounting

a) Identify accounting governing organizations, including the Financial Accounting Standards Board (FASB), the Security Exchange Commission (SEC), and the International Accounting Standards Board (IASB)

b) Describe Generally Accepted Accounting Principles (GAAP) and introduce the primary objective of financial reporting

c) Explain the economic entity assumption

i. Identify the different types of business organizations:

- Sole proprietorship
- Partnership
- Corporation
- Limited-liability company (LLC)

ii. Exhibit F:1-4: Business Organizations

d) Exhibit F:Explain the cost principle

e) Explain the going concern assumption

Lecture Note: Point out to students that if it is known that a company should not be considered a going concern, different accounting rules from those covered in this course apply to that company.

f) Explain the monetary unit assumption

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Lecture Note: Point out to students that an implication of the monetary unit assumption is that business activities that cannot be expressed in monetary units are not represented within the financial statements. For example, a company with a well-trained workforce, talented managers, a good reputation with customers, and innovative research and development has important assets that are not represented on the balance sheet.

g) Describe International Financial Reporting Standards (IFRS)

h) Ethics in accounting and business

i. Sarbanes-Oxley Act (SOX)

ii. Public Company Accounting Oversight Board (PCAOB)

Lecture Notes: Not all accounting information and financial statements are publicly available; such information is disclosed by public companies only. Company size is not a determinant of public ownership; some large companies are still privately held. All companies, public and private, can follow GAAP. However, this may not be a requirement for private companies. Private companies can use other bases of accounting, such as the cash basis, unless GAAP is required due to an audit. There is also a difference between record keeping and financial statement preparation. Companies can keep their accounting records on another basis and convert the financial statements to GAAP. For example, small private companies may use the cash basis for record keeping and convert to the accrual basis for financial statement preparation.

The Sarbanes-Oxley Act and the PCAOB relate to public companies. As a rule, public companies are more regulated (in terms of accounting information) than private companies. Some companies are now going private; one reason for doing so may be to reduce the compliance cost associated with these additional regulations.

Although much has been written and discussed about the possibility of convergence of U.S. GAAP and IFRS, complete convergence appears to be increasingly unlikely. The SEC previously announced a policy dedicated to investigating endorsement of IFRS, but political winds now seem to be shifting. Furthermore, standard-setting paths of FASB and IASB sometimes converge, as in recent development of unified revenue recognition standards, but sometimes fail to converge, as in recent issuance of very different guidance on leases. For now, U.S. GAAP continue to be different in many respects from IFRS, a condition which seems likely to continue for the foreseeable future, although efforts to increase similarities also continue to meet with some degree of success.

Suggested In-Class Exercise: E-F 1-18

LO 3. Describe the accounting equation and define assets, liabilities, and equity

a) The accounting equation: Assets = Liabilities + Equity

b) Define assets

c) Define liabilities

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

d) Define equity

Lecture Notes: The accounting equation must always balance. Demonstrate that the accounting equation always balances, not just at the beginning of the year (or any accounting period). During the year, the change in assets equals the change in liabilities plus the change in equity. At the end of the year, the new values of the accounting equation will balance.

Beginning of Year	Assets =	Liabilities +	Equity
During the Year	Δ Assets =	Δ Liabilities +	Δ Equity
End of Year	New Assets =	New Liabilities +	New Equity

Suggested In-Class Exercise: E-F 1-21

LO 4. Use the accounting equation to analyze transactions

a) Transaction analysis for Smart Touch Learning

i. Transaction 1—Owner contribution

ii. Transaction 2—Purchase of land for cash

iii. Transaction 3—Purchase of office supplies on account

iv. Transaction 4—Earning of service revenue for cash

v. Transaction 5—Earning of service revenue on account

vi. Transaction 6—Payment of expenses with cash

vii. Transaction 7—Payment on account (Accounts Payable)

viii. Transaction 8—Collection on account (Accounts Receivable)

ix. Transaction 9—Owner withdrawal of cash

b) Exhibit F:1-5: Analysis of Transactions, Smart Touch Learning

Lecture Notes: Every basic transaction always affects at least two accounts. Becoming familiar with each of the nine basic transactions and the two accounts affected by each will promote development of students' transaction analysis skills. Demonstrate the following transaction analysis process for each transaction:

1. Identify the accounts and the account type.
2. Decide if each account increases or decreases.
3. Determine if the accounting equation is in balance.

When this process is applied correctly, the accounting equation will always balance. Thus, for all transactions that occur during the year:

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

During the Year	Δ Assets =	Δ Liabilities +	Δ Equity

Note that every transaction affects the balance sheet in some way—increasing or decreasing an asset, liability, or equity account—but may or may not affect another financial statement. Remind students that there are four kinds of equity accounts: owner's capital, owner's withdrawals, revenues, and expenses. Thus, there are four ways that equity can change during the year:

During the Year	Δ Assets =	Δ Liabilities	+ Owner's Capital
			+ Revenues
			– Expenses
			–Owner's Withdrawals

Also, it may be helpful to point out that some transactions affect only one side of the accounting equation (left or right), yet the accounting equation still balances. For example, when a company purchases supplies with cash, one asset increases and another asset decreases—with no effect on liabilities and equity. Thus, the accounting equation balances.

Suggested In-Class Exercise: E-F 1-27

LO 5. Prepare financial statements

a) Exhibit F:1-6: Financial Statements

i. Exhibit F:1-7: Income Statement

ii. Exhibit F:1-8: Statement of Owner's Equity

iii. Exhibit F:1-9: Balance Sheet

iv. Exhibit F:1-10: Statement of Cash Flows

Lecture Notes: Each of the financial statements required by GAAP focuses on a different aspect of the company's financial position or financial activity. All four statements should be completed and analyzed in order to get a complete picture of a company. Emphasize the links between the statements.

The income statement shows the change in equity that results from the operation of the business during the year and is prepared first. The owner's equity statement shows the change in equity from profits earned less owner's withdrawals during the year and is prepared second. Balance sheets show the financial position of the company at specific points in time and is prepared third. The statement of cash flows explains the change in Cash in relation to everything else that changed during the year and is the final statement to be prepared.

Each financial statement should have a company name, a statement title, and some form of date. The income statement tracks profitability—revenues minus expenses. Remember that "profit" doesn't necessarily mean "money"; the profit may not have been collected in cash yet. The statement of owner's equity shows the changes in capital for a business entity over a period of time. As profits

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

increase, owner's equity will increase; as withdrawals are paid, profits remaining in the business will decrease. The balance sheet shows the financial position of the company at a specific point in time, such as at the end of the year. The balance sheet will probably change the day after it is prepared. All the other financial statements describe what happened to the company *during* the year. The statement of cash flows describes how the balance of the Cash account changed in relation to changes in other assets, liabilities, and all the components of equity.

Financial position (the balance sheet) is different from profitability (the income statement). A company could be very profitable and do a terrible job of managing its profits or vice versa. Students probably know a person who is like this. Some people have high income levels and end up with very little net worth because they do not manage their finances effectively. On the other hand, some people have modest income levels and do a very good job of managing their finances.

The statement of cash flows shows how the company is generating and using its cash. Students may have heard the phrase "cash is king." A company must have cash to pay its outstanding bills. Some recent accounting fraud cases involved companies that reported great profits but no corresponding cash flow—a possible red flag!

Net income and cash flow are separate concepts; neither is always positive. A company could have net income and negative cash flow in one year, and then the company could have a net loss and positive cash flow in another year. Many creditors will focus on cash flow in order to determine whether a company can generate cash in order to pay back any outstanding liabilities.

The owner's equity balance does not represent the balance in the Cash account. Students sometimes think the owner can simply make withdrawals from profits earned at any given time. However, the income included in owner's equity is based on accrual accounting and may not yet have been collected in cash. In addition, some items that have been paid in cash may not be included in net income until some future period.

Suggested In-Class Exercises: E-F 1-31, E-F 1-32, E-F 1-33

LO 6. Use financial statements and return on assets (ROA) to evaluate business performance

a) Review financial statements of Kohl's Corporation.
(see http://www.pearsonhighered.com/Horngren)

b) Explain return on assets (ROA)

Lecture Notes: Information presented in the financial statements is largely based on historical cost—the cost principle. The balance sheet values of major assets such as land, buildings, and equipment are based on the historical cost of those assets and may not represent their fair market value. For example, land purchased 10 years ago is likely to be worth more than the original cost, but it would still be valued on the balance sheet at original cost. This difference between the fair market value and the balance sheet value is sometimes called "hidden assets." How are the "true" values of a company's assets determined? One could have them appraised, but even then, the current fair market value of assets does not represent the value of the company as a whole. Don't forget about subtracting liabilities! But, of course, even then the resulting value of owner's equity (fair market value of all the assets minus liabilities) does not necessarily represent the true market value of the company as a whole.

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Return on assets measures how well a company uses its assets to generate profits. It is calculated by dividing net income by average total assets. Average total assets is calculated by adding the beginning and ending total assets for the time period and then dividing by two.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Chapter 1: Student Chapter Summary

LO 1. Explain why accounting is important and list the users of accounting information

Accounting is the language of business. Financial accounting is used by a variety of decision makers outside the company, including individuals, businesses, investors, creditors, and taxing authorities, while managerial accounting is directed to decision makers inside the company. All businesses need accountants. Accountants work in public accounting, private accounting, and governmental accounting jobs. Accountants can be licensed as a Certified Public Accountant (CPA), Certified Global Management Accountant (CGMA), or Certified Management Accountant (CMA), or Certified Financial Planner (CFP). Further, non-accountant business professionals require accounting knowledge as well, as they regularly utilize accounting information to make business decisions.

LO 2. Describe the organizations and rules that govern accounting

The rules that govern accounting are called Generally Accepted Accounting Principles (GAAP). The Financial Accounting Standards Board (FASB) is responsible for the creation and governance of U.S. GAAP. The Securities and Exchange Commission (SEC) oversees the U.S. financial markets and other standard setters, such as the FASB.

A thorough understanding of GAAP is essential to the use and preparation of financial statements. The primary objective of financial reporting is to provide information useful for making investment and credit decisions. Financial statement information must be relevant and have faithful representation to be considered useful. Relevant information is timely and is capable of making a difference in the user's decision. Information is faithfully representative when it is complete, neutral, and free from material error.

Four accounting principles are introduced. The economic entity assumption requires that the subject of a set of accounting financial statements is a single economic unit separate and distinct from its owners and from other economic units. The cost principle requires that transactions record acquisition of assets and services at their actual cost. The going concern assumption specifies that financial reporting should presume the entity will remain in operation for the foreseeable future. The monetary unit assumption requires that only economic events that can be measured in monetary units are represented in the financial statements.

LO 3. Describe the accounting equation and define assets, liabilities, and equity

The fundamental relationship on which all accounting is based is represented by the accounting equation: Assets = Liabilities + Equity. Assets are economic resources with future benefits. Liabilities are obligations owed to others. Equity represents the residual value of the assets left over after obligations represented by the liabilities are fulfilled.

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

LO 4. Use the accounting equation to analyze transactions

Transactions are economic events that affect the financial position of the company and can be measured reliably. Basic transactions affect at least two accounts. Transactions are analyzed in three steps:

Step 1. Identify the accounts and the account type (Asset, Liability, or Equity).
Step 2. Decide whether each account increases or decreases.
Step 3. Determine whether the accounting equation is in balance.

LO 5. Prepare financial statements

Four financial statements are prepared for each accounting period. The income statement reports net income or net loss, calculated as revenues earned minus expenses incurred, for a specific period of time. The statement of owner's equity reports the change in retained earnings from net income (or net loss) minus dividends for a specific period of time. The balance sheet reports the financial position (assets, liabilities, and equity) of the company at a specific point in time. The statement of cash flows reports the cash receipts and cash payments categorized by operating, investing, and financing activities. The financial statements are prepared in the following order: (1) income statement, (2) statement of owner's equity, (3) balance sheet, and (4) statement of cash flows.

LO 6. Use financial statements and return on assets (ROA) to evaluate business performance

The income statement evaluates profitability. The statement of owner's equity shows the amount of earnings kept and reinvested in the company. The balance sheet lists the economic resources owned, the debts and obligations owed, and the residual interest that remains for the owner. The statement of cash flows shows the change in cash resulting from operating, investing, and financing activities. Return on assets measures how profitably the company uses its assets.

CHAPTER 1
TEN-MINUTE QUIZ

Circle the letter of the best response.

1. Financial markets in the United States are regulated by which of the following organizations?
   A. American Institute of Certified Public Accountants (AICPA)
   B. Financial Accounting Standards Board (FASB)
   C. International Accounting Standards Board (IASB)
   D. Securities and Exchange Commission (SEC)

2. Which accounting principle or assumption sets forth an entity as one business, separate from its owners?
   A. Economic entity assumption
   B. Cost principle
   C. Monetary unit assumption
   D. Going concern assumption

3. Which accounting principle or assumption assumes that an entity will remain in operation for the foreseeable future?
   A. Economic entity assumption
   B. Cost principle
   C. Monetary unit assumption
   D. Going concern assumption

4. Red Door Boutique is famous for fashion wristwatches and leather purses. At the end of a recent year, Red Door's total assets added up to $485,000,000, and liabilities were $163,000,000. How much was Red Door's equity?
   A. $163,000,000
   B. $322,000,000
   C. $485,000,000
   D. $648,000,000

5. Assume that Red Door Boutique purchased supplies on account for $58,000. How would this transaction affect Red Door's accounting equation?
   A. Increase assets and liabilities by $58,000
   B. Increase assets and equity by $58,000
   C. Increase liabilities and equity by $58,000
   D. Increase one asset and decrease another asset by $58,000

6. Which field of accounting provides information to external decision makers such as investors and lenders?
   A. Investment accounting
   B. Tax accounting
   C. Managerial accounting
   D. Financial accounting

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

7. Which of the following is a characteristic of a limited-liability company?
   A. Indefinite life
   B. Separate taxable entity
   C. One or more owners
   D. Personally liability of owner

8. Last year, Internet Service Company (ISC) sold services on account for $75,000 and incurred expenses totaling $48,000. At the end of the year, the balance for Accounts Receivable was $10,000, and the balance for Accounts Payable was $8,000. What was ISC's net income or net loss for the year?
   A. Net income of $29,000
   B. Net income of $27,000
   C. Net income of $25,000
   D. Net income of $9,000

9. The income statement reports the
   A. financial position for a specific period.
   B. financial position on a specific date.
   C. results of operations for a specific period.
   D. results of operations on a specific date.

10. On the 20XX income statement, Red Door Boutique reported net income of $900,000. The company reported beginning total assets of $8,000,000 and ending total assets of $10,000,000. What is Red Door's return on assets for 20XX?
   A. 9.00%
   B. 10.00%
   C. 11.25%
   D. 25.00%

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Answer Key to Ten-Minute Quiz:

1. D

2. A

3. D

4. B
Assets = Liabilities + Equity
$485,000,000 = $163,000,000 + Equity
Equity = $485,000,000 −$163,000,000 = $322,000,000

5. A

6. D

7. A

8. B
Net Income (Loss) = Revenues −Expenses = $75,000 −$48,000 = $27,000

9. C

10. B
Return on assets = Net Income / Average total assets = $900,000 / [($800,000,000 + $10,000,000) / 2] = $900,000 / $9,000,000 = 10.00%

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Extra Critical Thinking Questions

Decision Case 1-2

Dave and Reba Guerrera saved all their married life to open a bed and breakfast (B&B) named Tres Amigos. They invested $100,000 of their own money. The business then got a $100,000 bank loan for the $200,000 needed to get started. The company bought a rundown old Spanish colonial home in Tucson for $80,000. It cost another $50,000 to renovate. They found most of the furniture at antique shops and flea markets—for a total cost of $20,000. Kitchen equipment cost $10,000, and a computer system cost $2,000.

Prior to the grand opening, the banker requests a report on their activities thus far. The bank statement of Tres Amigos shows a cash balance of $38,000. Dave and Reba believe that the $38,000 represents net income for the period, and they feel pretty good about the results of their business. To better understand how well they are doing, they prepare the following income statement for presentation to the bank:

Tres Amigos Bed and Breakfast
Income Statement
Six Months Ended June 30, 20XX

Revenues:		
Owner's capital	$ 100,000	
Bank loan	100,000	
Total revenues		$ 200,000
Expenses:		
Cost of the house	80,000	
Renovation to the house	50,000	
Furniture expense	20,000	
Kitchen equipment expense	10,000	
Computer expense	2,000	
Total expenses		162,000
Net Income		**$ 38,000**

Requirements

1. Suppose you are the Guerreras' banker, and they have given you this income statement. Would you congratulate them on their net income? If so, explain why. If not, how would you advise them to measure the net income of the business? Does the amount of cash in the bank measure net income? Explain.
2. Prepare the balance sheet for Tres Amigos based on these data.

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Decision Case 1-2: Solution

Requirement 1

The banker would not congratulate the Guerreras for their net income because they have not measured net income properly. In fact, they have no net income at all. Net income is revenues minus expenses, and the Guerreras do not have any revenues or expenses. The amount of cash in the bank does not measure net income, as it is the result of a loan from the bank.

Requirement 2

TRES AMIGOS BED AND BREAKFAST
Balance Sheet
June 30, 20XX

Assets		Liabilities	
Cash	$ 38,000	Bank Loan Payable	$ 100,000
Computer	2,000		
Kitchen Equipment	10,000		
Furniture	20,000	Owner's Equity	
Building ($80,000 + $50,000)	130,000	Owner's Capital	100,000
Total Assets	$ 200,000	Total Liabilities and Owner's Equity	$ 200,000

Team Project 1-1
You are opening Quail Creek Pet Kennel. Your purpose is to earn a profit, and you organize as a sole proprietorship.

Requirements

1. Make a detailed list of 10 factors you must consider to establish the business.
2. Identify 10 or more transactions that your business will undertake to open and operate the kennel.
3. Prepare the Quail Creek Pet Kennel income statement, statement of owner's equity, and balance sheet at the end of the first month of operations. Use made-up figures and include a complete heading for each financial statement. Date the balance sheet as of January 31, 20XX.
4. Discuss how you will evaluate the success of your business and how you will decide whether to continue its operation.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Team Project 1-1: Solution

Requirement 1

1. How to organize the business—as a proprietorship, a partnership, an LLC, or a corporation (You have decided to organize as a sole proprietorship.)
2. Where to locate the business
3. How much of your own time and money to commit to the business
4. How to finance the business—with your own personal money, with equity contributions from others, or through borrowing
5. How many people to employ for the business
6. How to measure the business's success or failure; how to account for the assets, liabilities, and operations of the business
7. What type of animals to board (dogs only, dogs and cats, birds, reptiles, and so on)
8. Whether to sell pet foods, toys, and other supplies
9. Whether to offer obedience lessons and other pet training
10. How to advertise the business (newspapers, radio, posters, online)

Student answers may vary.

Requirement 2

1. Make an initial cash investment contribution to start the business
2. Purchase land and building
3. Renovate the building to make it suitable for a kennel
4. Purchase pet food and other supplies that will be needed to operate the kennel
5. Advertising
6. Earn service revenue
7. Pay utility bills
8. Pay for veterinarian services
9. Pay employee wages
10. Borrow money
11. Pay owner withdrawals

Student answers may vary.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Team Project 1-1: Solution (cont'd)

Requirement 4

We evaluate the success of the business by considering its:

- Net income or net loss for the period, as reported on the income statement
- Financial position at the end of the period, as reported on the balance sheet

A profitable business that should continue is one that shows net income for the period, assets exceeding liabilities, and positive cash flow.

Team Project 1-2

You are promoting a rock concert in your area. Your purpose is to earn a profit, and you organize Concert Enterprises as a sole proprietorship.

Requirements

1. Make a detailed list of 10 factors you must consider to establish the business.
2. Describe 10 of the items your business must arrange in order to promote and stage the rock concert.
3. Prepare your business's income statement, statement of owner's equity, and balance sheet on June 30, 20XX, immediately after the rock concert. Use made-up amounts and include a complete heading for each financial statement. For the income statement and the statement of owner's equity, assume the period is the three months ended June 30, 20XX.
4. Assume that you will continue to promote rock concerts if the venture is successful. If it is unsuccessful, you will terminate the business within three months after the concert. Discuss how you will evaluate the success of your venture and how you will decide whether to continue in business.

Team Project 1-2: Solution
(Suggested answers)

Requirement 1

1. How to organize the business—as a proprietorship, a partnership, an LLC, or a corporation (Assume you have decided to organize as a sole proprietorship.)
2. Where to locate the headquarters of the business
3. How much of your own time and money to commit to the business
4. How to finance the business—with your own personal money, with equity contributions from others, or through borrowing
5. How many people to employ for the business
6. How to measure the business's success or failure; how to account for the assets, liabilities, and operations of the business
7. What type of music to feature; what age group or interest group to appeal to
8. Whether to sell concessions (food, drinks, T-shirts, and so on) yourself or to arrange for outsiders to sell concessions at the concert
9. How to advertise the business (newspapers, radio, posters, online)

Copyright © 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

10. Whether to sponsor the concerts yourself or to arrange for corporate or charitable organizations to sponsor the concerts

Requirement 2

1. Which band (or bands) to feature at the concerts
2. How much and when to pay the performers (flat rate or a percentage of gate receipts)
3. Where to stage the concerts and how to pay for the site rental
4. Need for city or county permits to stage a concert
5. How to ensure security at the concert
6. How to get people to come to the concert—how to advertise the concerts (newspapers, radio, posters, or other) and how much to pay for advertising
7. How to offer concessions (buy and sell them yourself or arrange for outside concessionaires). If outsiders, how will they be compensated—keep their own revenues or share them with you?
8. Need for traffic control if the crowd disrupts city traffic
9. Weather considerations if the concert is staged outdoors
10. Timing of the concert in relation to other events in the area at the time.

Team Project 1-2: Solution (cont'd)

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Chapter 1
Accounting and the Business Environment

Review Questions

1. Accounting is the information system that measures business activities, processes the information into reports, and communicates the results to decision makers. Accounting is the language of business.

2. Financial accounting provides information for external decision makers, such as outside investors, lenders, customers, and the federal government. Managerial accounting focuses on information for internal decision makers, such as the company's managers and employees.

3. Individuals use accounting information to help them manage their money, evaluate a new job, and better decide whether they can afford to make a new purchase. Business owners use accounting information to set goals, measure progress toward those goals, and make adjustments when needed. Investors use accounting information to help them decide whether or not a company is a good investment and once they have invested, they use a company's financial statements to analyze how their investment is performing. Creditors use accounting information to decide whether to lend money to a business and to evaluate a company's ability to make the loan payments. Taxing authorities use accounting information to calculate the amount of income tax that a company has to pay.

4. Certified Public Accountants (CPAs) are licensed professional accountants who serve the general public. They work for public accounting firms, businesses, government, or educational institutions. A Chartered Global Management Accountant (CGMA) is an accountant who has advanced knowledge in finance, operations, strategy, and management. Certified Management Accountants (CMAs) specialize in accounting and financial management knowledge. They work for a single company. Certified Financial Planners (CFPs) work with individuals to help them budget, plan for retirement, save for education, and manage their finances.

5. The FASB oversees the creation and governance of accounting standards. They work with governmental regulatory agencies, congressionally created groups, and private groups.

6. The guidelines for accounting information are called GAAP. It is the main U.S. accounting rule book and is currently created and governed by the FASB. Investors and lenders must have information that is relevant and has faithful representation in order to make decisions and GAAP provides the framework for this financial reporting.

7. A sole proprietorship has a single owner, terminates upon the owner's death or choice, the owner has personal liability for the business's debts, and it is not a separate tax entity. A partnership has two or more owners, terminates at partner's choice or death, the partners have personal liability, and it is not a separate tax entity. A corporation is a separate legal entity, has one or more owners, has indefinite life, the stockholders are not personally liable for the business's debts, and it is a separate tax entity. A limited-liability company has one or more members and each is only liable for his or her own actions, has an indefinite life, and is not a separate tax entity.

©2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

8. The land should be recorded at $5,000. The cost principle states that assets should be recorded at their historical cost.

9. The going concern assumption assumes that the entity will remain in business for the foreseeable future and long enough to use existing resources for their intended purpose.

10. The faithful representation concept states that accounting information should be complete, neutral, and free from material error.

11. The monetary unit assumption states that items on the financial statements should be measured in terms of a monetary unit.

12. The IASB is the organization that develops and creates IFRS which are a set of global accounting standards that would be used around the world.

13. Assets = Liabilities + Equity. Assets are economic resources that are expected to benefit the business in the future. They are things of value that a business owns or has control of. Liabilities are debts that are owed to creditors. They are one source of claims against assets. Equity is the other source of claims against assets. Equity is the owner's claims against assets and is the amount of assets that is left over after the company has paid its liabilities. It represents the net worth of the business.

14. Equity increases with owner contributions and revenues. Equity decreases with expenses and owner withdrawals.

15. Revenues – Expenses = Net Income. Revenues are earnings resulting from delivering goods or services to customers. Expenses are the cost of selling goods or service.

16. Step 1: Identify the accounts and the account type. Step 2: Decide if each account increases or decreases. Step 3: Determine if the accounting equation is in balance.

17. Income Statement – Shows the difference between an entity's revenues and expenses and reports the net income or net loss for a specific period.
Statement of Owner's Equity – Shows the changes in owner's capital for a specific period including owner contributions, net income (loss) and owner withdrawals Balance Sheet – Shows the assets, liabilities, and owner's equity of the business as of a specific date.
Statement of Cash Flows – Shows a business's cash receipts and cash payments for a specific period.

18. Return on Assets = Net income / Average total assets. ROA measures how profitably a company uses its assets.

a. FA
b. FA
c. FA
d. MA
e. MA
f. FA
g. MA
h. FA

S-F:1-2

The Financial Accounting Standards Board governs the majority of guidelines, called Generally Accepted Accounting Principles (GAAP), that the CPA will use to prepare financial statements for Wholly Shirts.

S-F:1-3

Chloe's needs will best be met by organizing a corporation since a corporation has an unlimited life and is a separate tax entity. In addition, the owners (stockholders) have limited liability. Chloe could also consider a limited liability company (LLC) as an option. A LLC meets two of the three criteria. It has an unlimited life and limited liability for the owner. However, a LLC is not a separate tax entity.

S-F:1-4

Advantages:
1. Easy to organize.
2. Unification of ownership and management.
3. Less government regulation.
4. Owner has more control over business.

Disadvantages:
1. The owner pays taxes on the entity's earnings since it is not a separate tax entity.
2. No continuous life or transferability of ownership.
3. Unlimited liability of owner for business's debts.

S-F:1-5

a. The economic entity assumption
b. The cost principle.
c. The monetary unit assumption.
d. The going concern assumption.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

E-F:1-30

Requirement 1

a. Income statement
b. Statement of owner's equity
c. Balance sheet
d. Statement of cash flows

Requirement 2

Yes, the financial statements should be prepared in the order listed above in Requirement 1.

Requirement 3

Income Statement:

a. The header includes the name of the business, the title of the statement, and the time period. An income statement always represents a period of time, for example, a month or a year.
b. The revenue accounts are always listed first and then subtotaled if necessary.
c. Each expense account is listed separately from largest to smallest and then subtotaled if necessary.
d. Net income is calculated as total revenues minus total expenses.

Statement of Owner's Equity:

a. The header includes the name of the business, the title of the statement, and the time period. A statement of owner's equity always represents a period of time, for example, a month or a year.
b. The beginning capital is listed first and will always be the ending capital from the previous time period.
c. The owner contributions and net income are added to the beginning capital.
d. The owner withdrawals are subtracted from capital. If there had been a net loss, this would also be subtracted.

Balance Sheet:

a. The header includes the name of the business and the title of the statement but the date is different. The balance sheet shows the date as a specific date and not a period of time.
b. Each asset account is listed separately and then totaled. Cash is always listed first.
c. Liabilities are listed separately and then totaled. Liabilities that are to be paid first are listed first.
d. The owner's equity section includes the ending capital from the statement of owner's equity.
e. The balance sheet must always balance: Assets = Liabilities + Equity.

Statement of Cash Flows:

a. The header includes the name of the business, the title of the statement, and the time period. A statement of cash flows always represents a period of time, for example, a month or a year.
b. Each dollar amount is calculated by evaluating the cash column on the transaction detail.
c. Operating activities involve cash receipts for services provided and cash payments for expenses paid.
d. Investing activities include the purchase and sale of land and equipment for cash.
e. Financing activities include cash from owner contributions and payment of cash for owner withdrawals.
f. The ending cash balance must match the cash balance on the balance sheet.

E-F:1-38

MORNING BEAN FOOD EQUIPMENT COMPANY
Statement of Cash Flows
Month Ended January 31, 2024

Cash flows from operating activities:		
Receipts:		
Collections from customers		$ 8,500
Payments:		
To employees	$ (1,300)	
To suppliers	(2,050)	(3,350)
Net cash provided by operating activities		5,150
Cash flows from investing activities:		
Purchase of land	(19,000)	
Net cash used by investing activities		(19,000)
Cash flows from financing activities:		
Owner contribution	5,000	
Owner withdrawal	(500)	
Net cash provided by financing activities		4,500
Net decrease in cash		(9,350)
Cash balance, January 1, 2024		11,800
Cash balance, January 31, 2024		$ 2,450

E-F:1-39

Average total assets = (Beginning total assets + ending total assets) / 2
Beginning total assets = $34,000 + $23,000 + $160,000 + $2,200 + $24,000 + $4,800 = $248,000
Ending total assets = $134,200 + $44,000 + $160,000 + $19,800 + $42,000 + $2,000 = $402,000
Average total assets = ($248,000 + $402,000) / 2 = $325,000

ROA = Net income / Average total assets
ROA = $58,500 / $325,000 = 0.18 = 18%

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

E-F:1-40

a. Decreases. The increase in assets (office furniture) increases the denominator in the equation and therefore decreases the ratio.
b. Increases. The increase in rental revenue increases net income in the numerator of the equation, therefore increases the ratio.
c. Does not change. The decrease in assets (cash) and increase in assets (office supplies) in the denominator of the equation causes no change.
d. Decreases. The increase in assets (cash) increases the denominator in the equation and therefore decreases the ratio.
e. Increases. The decrease in assets (cash) decreases the denominator in the equation and therefore increases the ratio.
f. Does not change. The increase in assets (cash) and decrease in assets (accounts receivable) in the denominator of the equation causes no change.

P-F:1-55, cont.
Requirement 2

CANYON CANOE COMPANY
Income Statement
Month Ended November 30, 2024

Revenue:		
Canoe Rental Revenue		$ 4,400
Expenses:		
Wages Expense	$ 1,500	
Rent Expense	1,200	
Telephone Expense	175	
Utilities Expense	150	
Total Expense		3,025
Net Income		$ 1,375

Requirement 3

CANYON CANOE COMPANY
Statement of Owner's Equity
Month Ended November 30, 2024

Wilson, Capital, November 1, 2024	$ 0
Owner contribution	16,000
Net income for the month	1,375
	17,375
Owner withdrawal	(150)
Wilson, Capital, November 30, 2024	$ 17,225

Requirement 4

CANYON CANOE COMPANY
Balance Sheet
November 30, 2024

Assets		Liabilities	
Cash	$ 14,300	Accounts Payable	$ 4,550
Accounts Receivable	2,250	Utilities Payable	150
Office Supplies	750	Telephone Payable	175
Canoes	4,800	Total Liabilities	4,875
		Owner's Equity	
		Wilson, Capital	17,225
		Total Liabilities and Owner's	
Total Assets	$ 22,100	Equity	$ 22,100

© 2021 Pearson Education, Inc.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

P-F:1-55, cont.
Requirement 5
Average total assets = ($0 + $22,100) / 2 = $11,050
Return on assets = Net income / Average total assets = $1,375 / $11,050 = 0.124 = 12.4%

Critical Thinking

Tying It All Together Case F:1-1
Requirement 1

Starbucks Corporation would report the cost of internet service as an expense on its income statement. Most likely, the expense would be included in Store Operating Expenses.

Requirement 2

When Starbucks receives a bill from its internet service provider, Starbucks would record the following:
Increase Accounts Payable
Increase Store Operating Expenses
This would cause liabilities to increase and equity to decrease.

Requirement 3

When Starbucks pays the bill, Starbucks would record the following:
Decrease Cash
Decrease Accounts Payable
This would cause assets to decrease and liabilities to decrease.

Requirement 4

An increase in the cost of internet service in the coming year would cause expenses to increase. If revenue did not change, this would cause net income to decrease. Starbucks might overcome this impact by charging customers for using the internet service, thereby offsetting the increase in expenses with additional revenue. This change, though, might discourage customers from visiting Starbucks when other competitors might offer free internet service. Another alternative would be to increase the prices of the products sold to cover the increased cost of internet service.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Decision Case F:1-1
Requirement 1

Greg's Tunes has more assets.
Sal's $23,000, Greg's $25,000 ($10,000 + $6,000 + $9,000)

Requirement 2

Greg's Tunes owes more to creditors.
Sal's $2,000 ($23,000 – ($8,000 + $35,000 – $22,000)), Greg's $10,000

Requirement 3

Sal's Silly Songs has more owner's equity.
Sal's $21,000 ($8,000 + $35,000 – $22,000) Greg's $15,000 ($6,000 + $9,000)

Requirement 4

Greg's Tunes earned more revenue.
Sal's $35,000, Greg's $53,000 ($9,000 + $44,000)

Requirement 5

Sal's Silly Songs is more profitable.
Sal's $13,000 ($35,000 – $22,000), Greg's $9,000

Requirement 6

This question is opinion based. More profit is good, which means Sal's has the advantage. Greg's also owes more to creditors which is risky. Sal's has much more equity, which minimizes risk.

Requirement 7

Sal's looks financially better, because Sal earned more net income on less total revenue. Sal also owes less to creditors and has more equity.

Ethical Issues F:1-1
Requirement 1

The chief financial officer (CFO) of Philip Morris would be torn between addressing the fact that the payments are related to illnesses caused by the company's products, or alternatively, omitting or concealing this fact. The ethical course of action for the CFO is to be open, honest and forthcoming about the reasons for the payments.

Requirement 2

Negative consequences of not telling the truth are as follows: If users of the financial statements feel they are only getting part of the truth, or that the reports are distorting the information, this will damage the credibility of the company, and damage the company's reputation.

Negative consequences of telling the truth include painting so bleak a picture of the effects of smoking that investors will view Philip Morris as too risky and stop buying the company's stock. Another negative consequence would be to create the impression that the company is engaged in unethical behavior by selling a product that damages people's health.

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Fraud Case F:1-1
Requirement 1

The proposed action would increase net income by increasing revenues. It would distort the balance sheet by understating liabilities and overstating equity.

Requirement 2

By making the company's financial situation look better than it actually was, the company's creditors would likely be more willing to extend credit to the company, and offer the credit at a lower interest rate.

Financial Statement Case F:1-1
Requirement 1

$1,556 (in millions)

Requirement 2

$41,290 (in millions) at February 2, 2019; $40,303 (in millions) at February 3, 2018

Requirement 3

Target Corporation adopted Accounting Standards Update (ASU) No. 2014-09—*Revenue from Contracts with Customers (Topic 606)* and ASU No. 2016-02—*Leases (Topic 842)*. This required the company to adjust its financial statements for year ending on February 3, 2018.

Requirement 4

Assets	=	Liabilities	+	Equity
$41,290	=	($15,014 + $14,979)	+	$11,297
$41,290	=	$29,993	+	$11,297

(shown in millions)

Requirement 5

$75,356 (in millions) for year ended February 2, 2019. This is an increase of $2,642 (in millions) over fiscal year 2017. ($75,356 − $72,714)

Requirement 6

$2,937 (in millions) in 2018
$2,914 (in millions) in 2017
Target's net income increased by $23 (million) from fiscal 2017 to fiscal 2018 ($2,937 − $2,914).

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

Financial Statement Case F:1-1, cont.
Requirement 7

All amounts in millions.
Average total assets = ($40,303 + $41,290) / 2 = $40,797 (rounded)
Return on assets = $2,937 / $40,797 = 0.0719 = 7.2% (rounded)

Requirement 8

Target Corporation's return on assets (7.2%) was one (1) percentage point higher than Kohl's Corporation (6.2%).

Chapter 1

Accounting and the Business Environment

Directed Reading Guide

LO1. Why is Accounting important?

a) In your own words, what is *Accounting*? **Accounting is the information system that measures business activities, processes the information into reports, and communicates the results to decision makers.**

   i) Who are the typical users of *Financial Accounting* information? **Financial accounting provides information for external decision makers such as investors, lenders, customers, and the federal government.**

   ii) Who are the typical users of *Managerial Accounting* information? **Managerial accounting focuses on information for internal decision makers, such as the company's managers and employees.**

b) What are the specialties of a Certified Financial Planner?
CFP are certified professionals who specialized in budgeting, planning for retirement, and managing finances.

In MyLab Accounting, complete Try It! and S-F:1-1.

LO2. What are the organizations and rules that govern accounting?

a) Briefly describe the purpose of each of the following:
   i) *Financial Accounting Standards Board (FASB)* – **A privately funded organization that oversees the creation and governance of accounting standards.**
   ii) *Securities and Exchange Commission (SEC)* – **A U.S. governmental agency that oversees the U.S. financial markets.**
   iii) *Generally Accepted Accounting Principles (GAAP)* – **Is the main U.S. accounting rule book that is currently created and governed by the FASB. It identifies the framework of financial statements and creates the acceptable accounting practices.**

b) Describe each of the following types of business organizations:
   i) *Sole Proprietorship* - **A business with a single owner, but students may include other characteristics.**
   ii) *Partnership* – **A business with two or more owners but is not organized as a corporation, but students may include other characteristics.**

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

iii) *Corporation* – **A business organized under state law that is a separate legal entity, but students may include other characteristics.**

iv) *Limited-Liability Company (LLC)* – **A company in which each member is only liable for his or her own actions, but students may include other characteristics.**

c) What is the *Sarbanes-Oxley Act?* **This act requires management to review internal control and take responsibility of the accuracy and completeness of their financial reports.**

In MyLab Accounting, complete Try It! and S-F:1-2 through S-F:1-5.

LO3. What is the accounting equation?

a) Please write the basic accounting equation: **Assets = Liabilities + Equity**

a. List 3 examples of *Assets* **- Examples may include Cash, Merchandise Inventory, Furniture, and Land.**

b. List 3 examples of *Liabilities* – **Examples may include Accounts Payable, Notes Payable, and Salaries Payable.**

c. In your own words, what is *Equity* **– The owner's claims to the assets of the business.**

In MyLab Accounting, complete Try It! and S-F:1-6 through S-F:1-8.

LO4. How do you analyze a transaction?

a) In your own words, what is *transaction*? **A transaction is any event that affects the financial position of the business and can be measured with faithful representation.**

b) Which accounts would be affected by each of the following transactions and identify if the account would increase or decrease.

i) The business receives cash from John Jones in exchange for capital -

Example: Cash (Increase) and Jones, Capital (Increase)

ii) The company paid cash for land - **Cash (Decrease) and Land (Increase)**

Horngrens Accounting The Financial Chapters 13th edition Nobles Solutions Manual

iii) Performed services for clients on account – **Accounts Receivable (Increase) and Service Revenue (Increase)**

iv) Purchased Office Supplies on account – **Supplies (Increase) and Accounts Payable (Increase)**

In MyLab Accounting, complete Try It! and S-F:1-9 to S-F:1-10.

LO5. How do you prepare financial statements?

a) What two types of accounts appear on the income statement? **Revenues and Expenses**

b) Included on the statement of owner's equity is the net income and which accounts? **Owner contributions and owner withdrawals**

c) What does the balance sheet tell an investor? **It is a snapshot of the entity's overall health of a business.**

d) What are the three sections of the statement of cash flows? **Operating, Investing, and Financing**

In MyLab Accounting, complete Try It! and S-F:1-11 through S-F:1-15.

L06. How do you use financial statements to evaluate business performance?

a) What is the formula for return on assets? **Net income / Average total assets**

b) Net income is $10,000 and total assets are $150,000 for the current year. Total assets for the previous year was $100,000. What is the ROA?

$10,000 / ($150,000 + $100,000) / 2) = .08 = 8%

In MyLab Accounting, complete Try It! and S-F:1-16.
