INTRODUCTION

The Instructor's Resource Manual is designed to complement the *Math Lit,* 3nd edition instructor support package. The Annotated Instructor's Edition and Instructor Guide provide assistance to instructors for each cycle as a whole, as well as each section. This manual provides additional assessment items to support instructors at the course level. The following are included:

- Quizzes (Forms A and B) for each half of each cycle
- Half Cycle Exams
- Exams (Forms A and B) for each cycle
- Final Exam
- Answers to quizzes and exams

Math Lit, 3nd Edition uses a balanced approach to assessment, placing equal emphasis on skills, concepts and applications. Two quiz forms are provided for the first and second halves of each cycle. Form A is similar to the recaps provided in the text. It includes three to four unrelated problems that assess skills, concepts, and applications from that part of the work text. Form B takes one scenario and asks several questions about it. Often, the questions are more involved and difficult. This form is suitable for an individual quiz but also can be used for a group quiz. These quizzes can be used alone or in tandem with exercises and quizzes provided in MyLab Math.

Half cycle exams are provided for the first and second halves of each cycle.

Two exam forms are provided for each cycle. Forms A and B are similar in approach and emphasis. Approximately half of each exam addresses skills while the remaining half addresses concepts and applications.

Answers for all quizzes and exams are included at the end of this manual.

Additional course-level instructor support items include the Instructor's Solutions Manual and TestGen® testbank, available electronically.

1. Given the number 0.999456

   a. Express this number in words.

   b. Round this number to the nearest hundredth.

   c. Round this number to the nearest ten-thousandth.

2. You go to the grocery store and buy a bag of chips for $1.99, a frozen pizza for $4.95, and a 2-liter of soda for $1.85. If you have a coupon for $3 off your purchase, how much do you owe before tax?

3. Compute the following fraction operations.

   a. $\left(\frac{7}{3}\right)\left(-\frac{3}{5}\right)=$ b. $\frac{4}{5}-\left(-\frac{5}{6}\right)=$

4. There are 42 students in Ms. Gordon's geometry class. If 27 students get a passing grade on the midterm, what percentage of the class passed the midterm?

1. Paulina weighed 176 pounds two months ago. She now weighs 161 pounds. What was Paulina's percentage of weight lost?

2. Compute the following *without a calculator*.

   a. Write the following fraction as a decimal (do not round): $\frac{4}{5}$

   b. Write the following fraction as a percentage: $\frac{4}{5}$

   c. Convert the following to an improper fraction: $7\frac{2}{5}$

3. Compute the following fraction operations.

   a. $\left(-\frac{5}{3}\right) \div \left(-\frac{6}{5}\right) =$

   b. $\frac{4}{5} + \frac{2}{3} =$

4. You need to buy an outfit for a night out. You buy a pair of jeans that cost \$68.99, a shirt that costs \$29.99, and a pair of shoes that cost \$52.55. How much will you pay before tax? If you pay a 10.25% sales tax, how much will you pay after tax?

1. For each point on the graph provided, state its ordered pair and the quadrant or axis.

Letter	Point	Axis/Quadrant
A		_____
B		_____
C		_____
D		_____
E		_____

2. The student to teacher ratio is 23:1 at a local school and there is a total of 600 students and teachers. How many teachers and how many students are there?

3. Show all your work on the following fraction operations. If the answer is larger than one, convert to a mixed number.

a. $\frac{7}{9}+\frac{5}{12}=$

b. $\left(-\frac{3}{10}\right)\cdot\left(-\frac{5}{6}\right)=$

4. Throughout the course of a day, stocks dropped from 57.63 points to 39.17 points. How far did the value of the stock drop by the end of the day?

   a. Choose the calculation that describes the scenario.

   A. $57.63-39.17$ B. $39.17-57.63$

   C. $57.63-(-39.17)$ D. $-39.17-57.63$

Archimedes discovered that the volume of a sphere is two-thirds the volume of the smallest cylinder that surrounds the sphere.

The volume of any cylinder is given by the formula:

$$V = \pi(\text{radius of cylinder})^2(\text{height of cylinder})$$

1. Find the volume of a sphere using the relationship between a sphere and cylinder that Archimedes found and the formula for the volume of a cylinder.

Archimedes also discovered that the surface area of a sphere is two-thirds the surface area of the smallest cylinder that surrounds the sphere.

The surface area of any cylinder is given by the formula:

$$SA = 2\pi(\text{radius of the cylinder})^2 + 2\pi(\text{radius of the cylinder})(\text{height of the cylinder})$$

2. Find the surface area of a sphere using the relationship between a sphere and cylinder that Archimedes found and the formula for the surface area of a cylinder.

Jamie is working with his father to replace the worn shingles on their detached garage. While there will be several materials to buy, the shingles will be the most expensive material to purchase. Complete the following problems to find the cost of the shingles. Begin by finding the dimensions of one side of the roof. Then find the total area of the roof, the amount of shingles necessary, and their total cost.

1. The roof has a 3:15 slope, meaning there are 3 units of rise for every 15 units of run.

   Slope relationship in roof: 

   Use the slope relationship and the dimensions of the garage to find the height, h, of the triangular end of the garage.

2. Find the length, l, of the slant of the roof.

3. Find the area of one side of the roof.

4. Find the total area of the roof.
