MindTap Educator Guide

Investment Analysis and Portfolio Management 12e

WHAT IS AN EDUCATOR GUIDE?

Welcome to ***MindTap* for *Investment Analysis and Portfolio Management 12e***. This guide walks you through what the unique activities are, where you'll find them and how they're built for easier curriculum integration. The quick version of this guide includes only the Asset Description table; this guide is in early release and awaiting the final product build. The detailed version of this guide includes the Asset Breakout, where you'll find the point value and number of activities.

The digital learning path provides your students with a coherently structured experience. This document outlines some of the design decisions we made as part of our mission to ensure your confidence and help you create an effective, quality learning experience. While the content included in this MindTap is specific to the discipline and course, the functionality will be consistent as you move from product to product.

With *MindTap*, you can quickly evaluate student engagement and progress using performance analytics. For more information about using performance analytics tools, access the following resources:

1. Visit *MindTap* Instructor Help
    - Click on **Grades and Scores** to:
        - View, edit and export or sync your students' activity scores and their calculated overall grades.
        - View scatterplot charts correlating your students' performance with engagement, time spent in the course or activities they opened.
    - **Benefit**: This data indicates overall class performance and can help identify students whose performance is either significantly above or below the average, or not correlated with other factors.

Get additional user guides and training resources on *MindTap*.

Cengage Support Services are there for YOU**:** From our ready-and-waiting Digital Success Team helping you set up and personalize your course, to our award-winning 24/7 customer support, we'll help you get the most out of *MindTap*!
