Chapter 2: The Development of Scientific Medicine

Identifications

1. Diseases are caused by the direct intervention of a god or spirit or indirectly through a sorcerer; disease occurs when some foreign object is introduced into the body and is cured when the object is forced out.

2. All disease is caused by specific etiological agents such as bacteria, viruses, parasites, genetic malformations, and chemical imbalances.

3. In exchange for providing the best and most efficient health care system, the federal government gave the AMA control over the production and licensing of physicians.

4. The awe and respect with which the general public holds medicine; an acceptance of medicine's definitions of reality and judgments of meaning and value as valid.

5. shaman

6. Hippocrates

7. scholastic medicine

8. the Flexner Report
