Chapter 2

Accounting for Business Transactions

QUESTIONS

1. a. Common asset accounts: cash, accounts receivable, notes receivable, prepaid expenses (rent, insurance, etc.), office supplies, store supplies, equipment, building, and land.

   b. Common liability accounts: accounts payable, notes payable, and unearned revenue, wages payable, and taxes payable.

   c. Common equity accounts: common stock and dividends.

2. A note payable is formal promise, usually denoted by signing a promissory note to pay a future amount. A note payable can be short-term or long-term, depending on when it is due. An account payable also references an amount owed to an entity. An account payable can be oral or implied, and often arises from the purchase of inventory, supplies, or services. An account payable is usually short-term.

3. There are several steps in processing transactions: (1) Identify and analyze the transaction or event, including the source document(s), (2) apply double-entry accounting, (3) record the transaction or event in a journal, and (4) post the journal entry to the ledger. These steps would be followed by preparation of a trial balance and then with the reporting of financial statements.

4. A general journal can be used to record any business transaction or event.

5. Debited accounts are commonly recorded first. The credited accounts are commonly indented.

6. A transaction is first recorded in a journal to create a complete record of the transaction in one place. (The journal is often referred to as the book of original entry.) This process reduces the likelihood of errors in ledger accounts.

7. Expense accounts have debit balances because they are decreases to equity (and equity has a credit balance).

8. The recordkeeper prepares a trial balance to summarize the contents of the ledger and to verify the equality of total debits and total credits. The trial balance also serves as a helpful internal document for preparing financial statements and other reports.

9. The error should be corrected with a separate (subsequent) correcting entry. The entry's explanation should describe why the correction is necessary.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

10. **The four financial statements are: income statement, balance sheet, statement of retained earnings, and statement of cash flows.**

11. **The balance sheet provides information that helps users understand a company's financial position at a point in time. Accordingly, it is often called the statement of financial position. The balance sheet lists the types and dollar amounts of assets, liabilities, and equity of the business.**

12. **The income statement lists the types and amounts of revenues and expenses, and reports whether the business earned a net income (also called profit or earnings) or a net loss.**

13. **An income statement user must know what time period is covered to judge whether the company's performance is satisfactory. For example, a statement user would not be able to assess whether the amounts of revenue and net income are satisfactory without knowing whether they were earned over a week, a month, a quarter, or a year.**

14. **(a) Assets are probable future economic benefits obtained or controlled by a specific entity as a result of past transactions or events. (b) Liabilities are probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events. (c) Equity is the residual interest in the assets of an entity that remains after deducting its liabilities. (d) Net assets refer to equity.**

15. **The balance sheet is sometimes referred to as the statement of financial position.**

16. **Debit balance accounts on the Apple balance sheet include: Cash and cash equivalents; Short-term marketable securities; Accounts receivable; Inventories; Deferred tax assets; Vendor non-trade receivables; Other current assets; Long-term marketable securities; Property, plant and equipment, net; Goodwill; Acquired intangible assets, net; Other assets.**

    Credit balance accounts on the Apple balance sheet include: Accounts Payable; Accrued expenses; Deferred revenue; Commercial paper; Current portion of long-term debt; Deferred revenue, non-current; Long-term debt; Other non-current liabilities; Common stock; Retained earnings; Accumulated other comprehensive income (current year abnormal debit balance).

17. **The asset accounts with *receivable* in its account title are: Accounts receivable, net; Receivable under reverse repurchase agreements; Income taxes receivable, net. The liabilities with *payable* in the account title are: Accounts payable; Securities lending payable; Income taxes payable, net; Income taxes payable, non-current.**

18. **Samsung's balance sheet lists the following current liabilities: Trade and other payables; Short-term borrowings; Other payables; Advances received; Withholdings; Accrued expenses; Income tax payable; Current portion of long-term liabilities; Provisions; Other current liabilities; Liabilities held-for-sale.**

    Samsung's balance sheet lists the following noncurrent liabilities: Debentures; Long-term borrowings; Long-term other payables; Net defined benefit liabilities; Deferred income tax liabilities; Provisions; Other non-current liabilities.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Quick Study 2-6 (Continued)

d.

1) Analyze:

Assets	=	Liabilities	+	Equity
Cash		Unearned Landscaping Revenue		
1,000	=	1,000	+	0

2) Record:

Date	Account Titles and Explanation	PR	Debit	Credit
May 30	Cash	101	1,000	
	Unearned Landscaping Revenue	236		1,000
	Received cash in advance for landscaping services.			

3) Post

Cash	101
1,000	

Unearned Landscaping Revenue	236
	1,000

Quick Study 2-7 (10 minutes)

a.	Debit	e.	Debit	i.	Credit
b.	Credit	f.	Credit	j.	Debit
c.	Credit	g.	Credit		
d.	Debit	h.	Credit		

Quick Study 2-8 (10 minutes)

The correct answer is a.

Explanation: **If a $2,250 debit to Utilities Expense is incorrectly posted as a credit, the effect is to understate the Utilities Expense debit balance by $4,500. This causes the Debit column total on the trial balance to be $4,500 less than the Credit column total.**

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Quick Study 2-11 (15 minutes)

a. Accounting under IFRS follows the same debit and credit system as under US GAAP.

b. The same four basic financial statements are prepared under IFRS and US GAAP: income statement, balance sheet, statement of changes in equity, and statement of cash flows. Although some variations from these titles exist within both systems, the four basic statements are present.

c. Accounting reports under both IFRS and US GAAP are likely different depending on the extent of accounting controls and enforcement. For example, the absence of controls and enforcement increase the possibility of fraudulent transactions and misleading financial statements. Without controls and enforcement, all accounting systems run the risk of abuse and manipulation.

Quick Study 2-12 (10 minutes)

Debt ratio = Total liabilities / Total assets = $30,624 mil / $39,946 mil = 76.7%

***Interpretation*: Its debt ratio of 76.7% exceeds the 60% of its competitors. Home Depot's financial leverage, and accordingly its riskiness, can be judged as above average based on the debt ratio.**

EXERCISES

Exercise 2-1 (10 minutes)

4 a. Prepare and analyze the trial balance.

1 b. Analyze each transaction from source documents.

2 c. Record relevant transactions in a journal.

3 d. Post journal information to ledger accounts.

Exercise 2-2 (10 minutes)

a. 5 "Three"

b. 2 "Equity"

c. 4 "Liability"

d. 1 "Asset"

e. 3 "Account"

Exercise 2-3 (5 minutes)

a. 1 "Chart"

b. 2 "General Ledger"

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-4 (15 minutes)

	Account	Type of Account	Normal Balance	Increase (Dr. or Cr.)
a.	Land	asset	debit	debit
b.	Cash	asset	debit	debit
c.	Legal Expense.....	expense	debit	debit
d.	Prepaid Insurance.....	asset	debit	debit
e.	Accounts Receivable.....	asset	debit	debit
f.	Dividends.....	equity	debit	debit
g.	License Fee Revenue	revenue	credit	credit
h.	Unearned Revenue	liability	credit	credit
i.	Fees Earned.....	revenue	credit	credit
j.	Equipment	asset	debit	debit
k.	Notes Payable	liability	credit	credit
l.	Common Stock.....	equity	credit	credit

Exercise 2-5 (15 minutes)

Of the items listed, the following effects should be included:

a. $28,000 increase in a liability account.

b. $10,000 increase in the Cash account.

e. $62,000 increase in a revenue account.

Explanation: This transaction created $62,000 in revenue, which is the value of the service provided. Payment is received in the form of a $10,000 increase in cash, an $80,000 increase in computer equipment, and a $28,000 increase in its liabilities. The net value received by the company is $62,000.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-11 (20 minutes)

1.

a.	**Account Payable**	**2,000**	
	Cash		**2,000**
	Paid amount owed toward account payable.		
b.	**Salaries Expense**	**1,200**	
	Cash		**1,200**
	Paid salary of receptionist.		
c.	**Equipment**	**39,000**	
	Cash		**39,000**
	Paid for equipment purchase.		
d.	**Utilities Expense**	**800**	
	Cash		**800**
	Paid utilities for the office.		
e.	**Dividends**	**4,500**	
	Cash		**4,500**
	Paid cash dividends.		

2. Transactions a, c, and e did not yield an expense for the following reasons:

e **This transaction is a distribution of cash to the owner. Even though equity decreased, that decrease did not occur in the process of providing goods or services to customers.**

a **This transaction decreased cash in settlement of a previously existing liability (equity did not change). Supplies expense is recorded when assets are used, not necessarily when cash is paid.**

c **This transaction involves the purchase of an asset. The form of the company's assets changed, but total assets did not (and neither did equity).**

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-12 (20 minutes)

1.

a.	Cash	20,000	
	Common Stock		20,000
	Cash received from owner investment for stock.		
b.	Cash	900	
	Services Revenue		900
	Provided services for cash.		
c.	Cash	10,000	
	Unearned Services Revenue		10,000
	Cash received for future services.		
d.	Cash	3,500	
	Accounts Receivable		3,500
	Cash received toward accounts receivable.		
e.	Cash	5,000	
	Note Payable		5,000
	Cash received for note payable to bank.		

2. Transactions a, c, d, and e did not yield revenue for the following reasons:

   d This transaction changed the form of an asset from receivable to cash. Total assets were not increased (revenue was recognized when the services were originally provided).

   e This transaction brought in cash (increased assets), and it also increased a liability by the same amount (represented by the signing of a note to repay the amount).

   a This transaction brought in cash, but this is an owner investment.

   c This transaction brought in cash, and it created a liability to provide services to a client in the next year.

Exercise 2-13 (25 minutes)

b 1. The company paid $4,800 cash in advance for prepaid insurance coverage.
a 2. D. Belle created a new business and invested $6,000 cash, $7,600 of equipment, and $12,000 in web servers in exchange for stock.
c 3. The company purchased $900 of supplies on account.
e 4. The company received $4,500 cash for services provided.
f 5. The company paid $900 cash towards accounts payable.
g 6. The company paid $3,400 cash for equipment.
d 7. The company paid $800 cash for selling expenses.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-15 (20 minutes)

Calculation of change in equity for *part a* through *part d*

	Assets	-	Liabilities	=	Equity
Beginning of the year	$ 60,000	-	$20,000	=	$40,000
End of the year	105,000	-	36,000	=	69,000
Net increase in equity					$29,000

a.

Net income	$?
Plus owner investments	0
Less dividends	(0)
Change in equity	$29,000

Net Income = $29,000

Since there were no additional investments or dividends, the net income for the year equals the net increase in equity.

b.

Net income	$?
Plus owner investments	0
Less dividends ($1,250/mo. x 12 mo.)	(15,000)
Change in equity	$29,000

Net Income = $44,000

The dividends were added back because they reduced equity without reducing net income.

c.

Net income	$?
Plus owner investment	55,000
Less dividends	(0)
Change in equity	$29,000

Net Loss = $26,000

The investment was deducted because it increased equity without creating net income.

d.

Net income	$?
Plus owner investment	35,000
Less dividends ($1,250/mo. X 12 mo.)	(15,000)
Change in equity	$29,000

Net Income = $9,000

The dividends were added back because they reduced equity without reducing net income and the investments were deducted because they increased equity without creating net income.

Exercise 2-20 (20 minutes)

	Description	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify account(s) incorrectly stated	(4) Amount that account(s) is overstated or understated
a.	$3,600 debit to Rent Expense is posted as a $1,340 debit.	$2,260	Credit	Rent Expense	Rent Expense is understated by $2,260
b.	$6,500 credit to Cash is posted twice as two credits to Cash.	$6,500	Credit	Cash	Cash is understated by $6,500
c.	$10,900 debit to the Dividends account is debited to Common Stock.	$0	—	Common Stock Dividends	Common Stock is understated by $10,900 Dividends is understated by $10,900
d.	$2,050 debit to Prepaid Insurance is posted as a debit to Insurance Expense.	$0	—	Prepaid Insurance Insurance Expense	Prepaid Insurance is understated by $2,050 Insurance Expense is overstated by $2,050
e.	$38,000 debit to Machinery is posted as a debit to Accounts Payable.	$0	—	Machinery Accounts Payable	Machinery is understated by $38,000 Accounts Payable is understated by $38,000
f.	$5,850 credit to Services Revenue is posted as a $585 credit.	$5,265	Debit	Services Revenue	Services Revenue is understated by $5,265
g.	$1,390 debit to Store Supplies is not posted.	$1,390	Credit	Store Supplies	Store Supplies is understated by $1,390

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-21 (15 minutes)

	Overstated, Understated, or Correctly-Stated	Amount
a.	Correctly-stated. The debit column is correctly stated because the erroneous debit (to Accounts Payable) is deducted from an account with a (larger assumed) credit balance.	$0
b.	Understated. The credit column is understated by $37,900 because Accounts Payable was debited — it should have been credited.	$37,900
c.	Correctly-stated. The Automobiles account balance is correctly stated.	$0
d.	Understated. The Accounts Payable account balance is understated by $37,900. It should have been increased (credited) by $18,950 but the posting error decreased (debited) it by $18,950.	$37,900
e.	The credit column is $37,900 less than the debit column, or $162,100 in total ($200,000 - $37,900).

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Exercise 2-22 (15 minutes)

a.

Co.	Liabilities	/	Assets	=	Debt Ratio	Net Income	/	Average Assets	=	ROA
1	$11,765		$ 90,500		0.13	$20,000		$100,000		0.200
2	46,720		64,000		0.73	3,800		40,000		0.095
3	26,650		32,500		0.82	650		50,000		0.013
4	55,860		147,000		0.38	21,000		200,000		0.105
5	31,280		92,000		0.34	7,520		40,000		0.188
6	52,250		104,500		0.50	12,000		80,000		0.150

b. Company 3 relies most heavily on creditor (non-owner) financing with 82% of its assets financed by liabilities.

c. Company 1 relies least on creditor (non-owner) financing at only 13%. This implies that 87% of the assets are financed by equity (owners).

d. The companies with the highest debt ratios indicate the greatest risk. The two companies with the highest debt ratios are 2 and 3.

e. Company 1 yields the highest return on assets at 20%; followed by Company 5 at 18.8%.

f. As an investor, one prefers high returns at low risk. Company 1 is the preferred investment since it yields the lowest risk (debt ratio is 13%) and highest return on assets (20%).

Exercise 2-23 (15 minutes)

HEINEKEN N.V.
Balance Sheet (in Euro millions)
December 31, 2015

Assets		Equity and liabilities	
Noncurrent assets	€ 31,800	Total equity	€ 15,070
Current assets	5,914	Noncurrent liabilities	14,128
		Current liabilities	8,516
Total assets	€ 37,714	Total equity and liabilities	€ 37,714

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Problem 2-5A (90 minutes)

Part 1

NETTLE DISTRIBUTION Balance Sheet December 31, 2016			
Assets		**Liabilities**	
Cash	$ 64,300	Accounts payable	$ 3,500
Accounts receivable	26,240		
Office supplies	3,160		
Trucks	148,000	**Equity**	
Office equipment	44,000	Total equity	282,200
Total assets	$285,700	Total liabilities and equity	$285,700

NETTLE DISTRIBUTION Balance Sheet December 31, 2017			
Assets		**Liabilities**	
Cash	$ 15,640	Accounts payable	$ 33,500
Accounts receivable	19,100	Note payable	40,000
Office supplies	1,960	Total liabilities	73,500
Trucks	157,000		
Office equipment	44,000		
Building	80,000	**Equity**	
Land	60,000	Total equity	304,200
Total assets	$377,700	Total liabilities and equity	$377,700

Part 2

Computation of 2017 net income:

Owner investment	$ 35,000
Add net income	?
Deduct dividends	(19,000)
Increase in equity during 2017*	$ 22,000*

Thus, net income = ($22,000 + $19,000 - $35,000) = $ 6,000

* Computation of 2017 equity increase:

Equity, December 31, 2016	$282,200
Plus net income (or less net loss)	?
Equity, December 31, 2017	$304,200
Thus, there is an increase in equity during 2017	$ 22,000

Part 3

Debt Ratio = $73,500 / $377,700 = 19.5%

Problem 2-6A (35 minutes)

Part 1

MIN ENGINEERING Trial Balance May 31	Debit	Credit
Cash	$37,600	
Office supplies	890	
Prepaid insurance	4,600	
Office equipment	12,900	
Accounts payable		$12,900
Common stock		18,000
Dividends	3,370	
Engineering fees earned		36,000
Rent expense	7,540	
Totals	$66,900	$66,900

Part 2

Cash			
(a)	18,000	(b)	7,540
(f)	36,000	(c)	4,600
		(d)	890
		(g)	3,370
Balance	37,600		

Transactions *a* through *g* coded in T-account:

(a) Yi Min invested $18,000 cash in the business in exchange for stock.
(b) Paid $7,540 cash for May's monthly rent expense.
(c) Paid $4,600 cash for this year's insurance premium beginning immediately.
(d) Purchased office supplies for $890 cash.
(e) Purchased $12,900 of office equipment on credit (with accounts payable)—no cash effect; thus, not listed in T-account.
(f) Received $36,000 cash for engineering services provided in May.
(g) Paid $3,370 cash for dividends.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Problem 2-5B (60 minutes)

Part 1

TAMA CO. Balance Sheet December 31, 2016			
Assets		**Liabilities**	
Cash	$ 30,000	Accounts payable	$ 4,000
Accounts receivable	35,000		
Office supplies	8,000		
Office equipment	40,000	**Equity**	
Machinery	28,000	Total equity	137,000
Total assets	$141,000	Total liabilities & equity	$141,000

TAMA CO. Balance Sheet December 31, 2017			
Assets		**Liabilities**	
Cash	$ 5,000	Accounts payable	$ 12,000
Accounts receivable	25,000	Note payable	250,000
Office supplies	13,500	Total liabilities	262,000
Office equipment	40,000		
Machinery	28,500		
Building	250,000	**Equity**	
Land	50,000	Total equity	150,000
Total assets	$412,000	Total liabilities & equity	$412,000

Part 2

Computation of 2017 net income:

Owner investment	$ 5,000
Add net income	?
Deduct dividends	(3,000)
Increase in equity during 2017*	$ 13,000*

Thus, net income = ($13,000 + $3,000 - $5,000) = $ 11,000

* Computation of 2017 equity increase:

Equity, December 31, 2016	$137,000
Plus net income (or less net loss)	?
Equity, December 31, 2017	$150,000
Thus, there is an increase in equity during 2017	$ 13,000

Part 3

Debt ratio = $262,000 / $412,000 = 63.6%

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Reporting in Action — BTN 2-1

1. Apple reports ($ millions):
   $171,124 in liabilities at September 26, 2015.
   $120,292 in liabilities at September 27, 2014.

2. Apple reports ($ millions):
   $290,479 in assets at September 26, 2015.
   $231,839 in assets at September 27, 2014.

3. $ millions:
   As of September 26, 2015 Debt Ratio = $171,124/$290,479 = 58.9%
   As of September 27, 2014 Debt Ratio = $120,292/$231,839 = 51.9%

4. Apple employed more financial leverage as of September 26, 2015, when 58.9% of its assets were financed by debt, relative to September 27, 2014, when 51.9% of its assets were financed by debt. Consequently, its financing structure was more risky in its fiscal 2015 in comparison to its fiscal 2014.

5. Solution depends on the financial statements accessed.

Comparative Analysis — BTN 2-2

1. Apple ($ millions)

   Current year debt ratio: $171,124/$290,479 = 58.9%

   Prior year debt ratio: $120,292/$231,839 = 51.9%

2. Google ($ millions)

   Current year debt ratio: $27,130/$147,461 = 18.4%

   Prior year debt ratio: $25,327/$129,187 = 19.6%

3. Apple has the higher degree of financial leverage. Apple's debt ratio is markedly higher for the current year than that of Google (58.9% vs. 18.4%). This indicates that Apple carries more debt financing than Google. This also implies that Apple is attempting to use nonowner financing to make more money for its owners. This is fine provided Apple's return does not decline below that of what it pays nonowners for use of that money— this is the main source of financing risk.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Ethics Challenge — BTN 2-3

This case involves a conflict between the need for efficiency and the need for control. While it makes sense to take and process lunch orders quickly, this efficiency is being accomplished by a shortcut that greatly weakens control over cash receipts. Cash could be received and lost or stolen because there would be no initial record of how much was received.

The assistant manager's explanation about the head manager not arriving until 3 o'clock suggests that the head manager doesn't know about the proposed shortcut. Thus, the new employee is faced with the dilemma of deciding whether to accept the assistant manager's instructions, suggest to the assistant manager that the shortcut seems wrong, or to ask the head manager to confirm the instructions. Each of these alternatives involves personal risk.

It is possible that the assistant manager does not understand the potential for fraud and abuse if this shortcut is used. If the relationship between you and the assistant manager is such that you feel you can do so, you should explain your understanding of how the shortcut could lead to the problems of inaccurate records for tax purposes, gathering inaccurate marketing information, and abuse by other employees who might not be as honest as you and the assistant manager.

If the assistant manager insists, you may want to work as instructed to get an idea of whether the shortcut is being abused by the assistant manager and perhaps to find out discreetly whether the head manager knows about it. (Although, this behavior does involve personal risk of perceived collusion with the assistant manager.) If you conclude that the assistant manager is committing fraud, you should report the situation to the head manager as quickly as possible.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Communicating in Practice — BTN 2-4

MEMORANDUM

To: Lila Corentine
From: _____
Subject: Financial statements explanation
Date: _____

The four major financial statements and their purposes are:

- ***Income statement*** **describes a company's revenues and expenses along with the resulting net income or loss over a period of time. It helps explain how equity changes during a period due to earnings activities.**
- ***Statement of retained earnings*** **explains changes in retained earnings due to net income (or net loss) and any dividends over a period of time.**
- ***Statement of cash flows*** **identifies cash inflows (receipts) and outflows (payments) over a period of time. It also explains how the cash balance on the balance sheet changed from the beginning to the end of a period.**
- ***Balance sheet*** **describes a company's financial position (assets, liabilities, and equity) at a point in time.**

These financial statements are linked to each other across time. Specifically, a balance sheet reports an organization's financial position at a *point in time*. The income statement, statement of retained earnings, and statement of cash flows report on performance over a *period of time.* These three statements link balance sheets from the beginning to the end of a reporting period. That is, they explain how the financial position of an organization changes from one point to another.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Taking It to the Net — BTN 2-5

1. The prior three years' net income or (loss) for Amazon are ($ millions):
   2014 = $ (241) 2013 = $ 274 2012 = $ (39)

2. The three years net cash *provided* by operations follows ($ millions):
   2014 = $6,842 2013 = $5,475 2012 = $4,180

3. In 2014, Amazon had net loss of $(241) million and operating cash flows of $6,842 million; and, in that same year, total net cash increased by only $5,899 million (see its statement of cash flows).

   The reason its cash balance only increased by $5,899 million in 2014 was because of cash outflows of $5,065 million for its investing activities (and further reduced by $310 million related to foreign currency effects). Those uses of cash absorbed much of the cash generated by its operating activities. A large part of those cash outflows was tied to its investments in securities and its other purchases and acquisitions.

Teamwork in Action — BTN 2-6

<Instructor note: There is no specific solution to this activity.>

The following sample solution gives a summary outline of what a minimum report needs to include. Assume a team member selects assets:

Category: Assets

a. Increases (decreases) in assets are debits (credits) to asset accounts. Debit means left side, credit means right side. The normal side of an account refers to the side where increases are recorded. For assets, this is the debit, or left, side.

b. Owner investment of $10,000 cash in business in exchange for stock.

c. Assets = Liabilities + Common Stock – Dividends + Revenues – Expenses
   + $10,000 = $0 + $10,000 – $0 + $0 – $0
   Owner investments have no effect on the income statement, but they do increase the cash flows from financing by $10,000 on the statement of cash flows (this increases its net cash flow).

d. Paid rent expense with $2,000 cash.

e. Assets = Liabilities + Common Stock – Dividends + Revenues – Expenses
   - $2,000 = $0 + $0 – $0 + $0 – $2,000
   An expense paid in cash will decrease net income on the income statement and decrease operating cash flows on the statement of cash flows.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Entrepreneurial Decision — BTN 2-7

There are several issues that this entrepreneurial owner should consider. Those considerations include the following three issues (among others):

- **If she chooses to contribute her own funds for the expansion, she will be risking her own money, but she will not have the expense of interest payments, nor will she have the risk of the inability to repay a loan.**
- **If she chooses to borrow, she will have interest and loan payments to make, and she will have more risk (as reflected in her company's debt ratio).**
- **If she can pay the interest and loan payments, it can be to her advantage to borrow, as long as her return on assets is high enough (that is, higher than the rate of interest on the borrowings).**

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Entrepreneurial Decision — BTN 2-8

1.

MARTIN MUSIC SERVICES
Balance Sheet
December 31, 2017

Assets		Liabilities	
Cash	$ 3,600	Accounts payable	$ 2,200
Accounts receivable	9,600	Unearned lesson fees	15,600
Prepaid insurance	1,500	Total liabilities	17,800
Prepaid rent	9,400		
Store supplies	6,600	**Equity**	
Equipment	50,000	Total equity	62,900
Total assets	$80,700	Total liabilities and equity	$80,700

2.

Debt ratio = Total liabilities / Total assets = $17,800 / $80,700 = 22.1%

Return on assets = Net income/Average assets = $40,000/$80,700*= 49.6%

*Ending balance is used per instructions ("assume average assets equal its ending balance").

3. The prospects of a bank loan are likely to be good. (i) The debt ratio indicates that 78% of the company's funding is from equity. Also, there are no debt obligations requiring periodic payments. This implies low risk. (ii) The level of return on assets is very high. This implies good return.

Overall, given the information and the assumption that current performance will continue into the future, the prospects of a bank loan are good.

Note: The loan does carry some risk—fueling this risk are (i) poor recordkeeping, (ii) lack of information on growth potential, and (iii) a much higher pro forma debt ratio—that is, if the loan is granted, the debt ratio will jump to 43%, computed as:

($17,800 + $30,000) / ($80,700 + $30,000).

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Hitting the Road — BTN 2-9

Findings will vary. It is advisable that the instructor obtain a few classified sections from newspapers that were published over the period of the assignment. If student reports lack responses for question 2, it is informative and motivating to bring these (accounting-related job opportunities) sections to class when discussing or returning student reports as many students are not accounting majors.

Global Decision — BTN 2-10

1. **An analysis of return on assets suggests that Apple (20.4%) yields the greatest return on assets, followed by Google (11.8%), and then Samsung (8.1%), which yields the lowest return.**

2. **An analysis of the debt ratio suggests that Apple (at 58.9%) presents the greatest risk, followed by Samsung (26.1%), and then Google (18.4%) with the least risk. That is, Apple carries the most debt, and debt must be repaid with principal and interest. The lower debt levels of Google and Samsung result in less risk in that their contractually required payments are less as a percent of their respective asset bases.**

3. **In this case, there is no clear answer based on these two ratios alone. Apple has a relatively higher return on assets but also the highest debt ratio. Google has the middle-level return (slightly higher return on assets compared to Samsung and substantially lower than that for Apple), but it has the lowest debt ratio. Samsung has the lowest return and the middle-level debt ratio. Overall, based on return on assets, Apple would warrant additional consideration for expanded investment; however, based on the debt ratio, Google would warrant additional consideration. Therefore, in this analysis of these three companies, we get a mixed inference from these two ratios (and further analysis is warranted, which we will illustrate over the next several chapters).**

Additional Information on Related Assignment Material

Connect

Available on the instructor's course-specific website) repeats all numerical Quick Studies, all Exercises and Problems Set A. ***Connect*** also provides algorithmic versions for Quick Study, Exercises and Problems. It allows instructors to monitor, promote, and assess student learning. It can be used in practice, homework, or exam mode**.**

Connect Insight

The first and only analytics tool of its kind, Connect Insight is a series of visual data displays that are each framed by an intuitive question and provide at-a-glance information regarding how an instructor's class is performing. Connect Insight is available through Connect titles.

General Ledger

Assignable within Connect, General Ledger (GL) problems offer students the ability to see how transactions post from the general journal all the way through the financial statements. Critical thinking and analysis components are added to each GL problem to ensure understanding of the entire process. GL problems are auto-graded and provide instant feedback to the student.

Excel Simulations

Assignable within Connect, Excel Simulations allow students to practice their Excel skills—such as basic formulas and formatting—within the context of accounting. These questions feature animated, narrated Help and Show Me tutorials (when enabled). Excel Simulations are auto-graded and provide instant feedback to the student.

Synopsis of Chapter Revisions

- NEW opener – Soko and entrepreneurial assignment.
- Simplified discussion on analyzing and recording process.
- Streamlined discussion of classified vs. unclassified balance sheet.
- Enhanced explanation of computing equity.
- Enhanced Exhibit 2.4 to identify account categories.
- Improved summary of transactions in the ledger.
- Streamlined explanation of error correction in entries.
- New accounting quality box with reference to KPMG data.
- Revised sustainability section on cost savings for small business.
- Updated debt ratio analysis using Skechers.
- Added two Quick Study assignments.
- Updated Piaggio's (IFRS) balance sheet.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Chapter Outline

Notes

I. System of Accounts

A. Identify transaction from source document which identifies and describes transactions and events entering the accounting process.

B. Analyze transaction using the accounting equation.

C. Record relevant transactions and events in a journal.

D. Post journal information to ledger accounts.

E. Prepare and analyze trial balance and financial statements.

Source documents identify and describe transactions and events entering the accounting system.

II. The Account and its Analysis

A. An *account* is a record of increases and decreases in a specific asset, liability, equity, revenue, or expense.

B. Account categories include:

1. *Assets*—resources owned or controlled by a company that have future economic benefit. Examples include Cash, Accounts Receivable, Note Receivable, Prepaid Expenses, Prepaid Insurance, Supplies, Store Supplies, Equipment, Buildings, and Land.
2. *Liabilities*—claims (by creditors) against assets, which means they are obligations to transfer assets or provide products or services to others. Examples include Accounts Payable, Note Payable, Unearned Revenues, and Accrued Liabilities.
   a. Accounts Payable—verbal or implied promise to pay later usually arising from purchase of inventory or other assets.
   b. Notes Payable—formal promise to pay usually indicated by signing a promissory note, to pay a future amount.
   c. Unearned revenue—revenue collected before it is earned; before services or goods are provided.
   d. Accrued liabilities—amounts owed that are not yet paid.
3. *Equity*—owner's claim on company's assets is called *stockholders' equity* or *shareholders' equity*. Examples include Common stock, Dividends (decreases in equity). Revenues (results from providing goods or services; i.e. Sales, Fees Earned) increases equity. Expenses (results from assets or services used in operation; i.e. Supplies Expense) decreases equity.

III. Double-Entry Accounting

A. The *general ledger* or *ledger* (referred to as the *books*) is a collection of all accounts and their balances for an accounting system.

B. The *chart of accounts* is a list of all accounts in the ledger with their identification numbers.

Chapter Outline

Notes

C. A *T-account* represents a ledger account and is used to understand the effects of one or more transactions. Has shape like the letter T with

Copyright © 2018 McGraw-Hill Education. All rights reserved. No reproduction or distribution without the prior written consent of McGraw-Hill Education.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

account title on top.

IV. Debits and Credits

A. The *left* side of an account is called the *debit* side. A debit is an entry on the left side of an account.

B. The *right* side of an account is called the *credit* side. A credit is an entry on the right side of an account.

C. Accounts are *assigned balance sides* based on their classification or type.

D. To *increase* an account, an amount is placed on the *balance side,* and to *decrease* an account, the amount is placed on the *side opposite its assigned balance side*.

E. The *account balance* is the difference between the total debits and the total credits recorded in that account. When total debits exceed total credits the account has a debit balance. When total credits exceed total debits the account has a credit balance. When two sides are equal the account has a zero balance.

V. Double-Entry System—requires that each transaction affect, and be recorded in, at least two accounts. The total debits must equal total credits for each transaction.

A. The assignment of balance sides (debit or credit) follows the accounting equation.

1. *Assets* are on the *left side* of the equation; therefore, the left, or *debit,* side is the normal balance for assets.
2. *Liabilities and equities* are on the *right side;* therefore, the right, or credit, side is the normal balance for liabilities and equity.
3. *Dividends, revenues, and expenses* really are changes in equity, but it is necessary to set up temporary accounts for each of these items to accumulate data for statements. Dividends and expense accounts really represent decreases in equity; therefore, they are assigned debit balances. *Revenue* accounts really represent increases in equity; therefore, they are assigned credit balances.

B. Three important rules for recording transactions in a double-entry accounting system are:

1. Increases to assets are debits to the asset accounts. Decreases to assets are credits to the asset accounts.
2. Increases to liabilities are credits to the liability accounts. Decreases to liabilities are debits to the liability accounts.
3. Increases to equity are credits to the equity accounts. Decreases to equity are debits to the equity accounts.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Chapter Outline

Notes

VI. Journalizing and Posting Transactions

A. Four steps in processing transactions are as follows:

Journalizing--The process of recording each transaction in a journal.

1. Identify transaction and source documents.
2. Analyze using the accounting equation. Apply double entry accounting to determine account to be debited and credited.
3. Record journal entry—recorded chronologically (A journal gives us a complete record of each transaction in one place.)
   a. A *General Journal* is the most flexible type of journal because it can be used to record any type of transaction.
   b. When a transaction is recorded in the General Journal, it is called a *journal entry*. A journal entry that affects more than two accounts is called a compound journal entry.
   c. Each journal entry must contain equal debits and credits.
4. Posting Journal Entries to Ledger—transfer (or *post*) each entry from journal to ledger.
   a. Debits are posted as debit, and credits as credits to the accounts identified in the journal entry.
   b. Actual accounting systems use *balance column accounts* rather than T-accounts in the ledger.
   c. A *balance column account* has debit and credit columns for recording entries and a third column for showing the balance of the account after each entry is posted.

Note: To see an illustration of analyzing, journalizing and posting of 16 basic transactions refer to the textbook.

VII. Trial Balance

A. A *trial balance* is a list of accounts and their balances (either debit or credit) at a point in time. Account balances are reported in their appropriate debit or credit columns of the trial balance.

B. The trial balance tests for the equality of the debit and credit account balances as required by double-entry accounting.

C. Preparing a Trial Balance: three steps to prepare a trial balance are as follows:

1. List each account and its amount (from the ledger).
2. Compute the total debit balances and the total credit balances.
3. Verify (prove) total debit balances equal total credit balances.

D. Searching for Errors: when a trial balance does not balance, an error has occurred and must be corrected. Follow these steps:

1. Verify that the trial balance columns are correctly added.
2. Verify that account balances are accurately entered from ledger.
3. See whether a debit (or credit) balance is mistakenly listed in the trial balance as a credit (or debit).

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Chapter Outline

Notes

4. Re-compute each account balance in the ledger.
5. Verify that each journal entry is properly posted.
6. Verify that the original journal entry has equal debits and credits.

(***Note*:** Any errors must be located and corrected before preparing the financial statements. Financial Statements prepared from the trial balance are actually *unadjusted* statements. The purpose, content and format for each statement was presented in Chapter 1. The next chapter will address adjustments).

E. Presentation Issues

1. Dollar signs are not used in journals and ledgers but do appear in financial statements and other reports such as a trial balance.
2. Usual practice on statements is to put dollar signs before the first and last number in each column.
3. Commas are optional except for financial reports were they are always used.
4. Companies commonly round in reports to the nearest dollar, or even higher levels.
5. Double rule the final total(s) on the financial statements.

VIII. Decision Analysis—Debt Ratio

A. Companies finance their assets with either liabilities or equity.

B. A company that finances a relatively large portion of its assets with liabilities has a high degree of financial leverage.(greater risk)

C. The debt ratio describes the relationship between a company's liabilities and assets. It is calculated as total liabilities divided by total assets.

D. The debt ratio tells us how much (what percentage) of the assets are financed by creditors (non-owners), or liability financing. The higher this ratio, the more risk a company faces, because liabilities must be repaid and often require regular interest payments.

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

VISUAL #2-1

THREE PARTS OF AN ACCOUNT

(1) ACCOUNT TITLE	
Left Side called (2) DEBIT	Right Side called (3) CREDIT

Rules for using accounts

Accounts are assigned balance sides (Debit or Credit).

To increase any account, use the balance side.

To decrease any account, use the side opposite the balance.

Finding account balances

If total debits = total credits, the account balance is zero.

If total debits are greater than total credits, the account has a debit balance equal to the difference of the two totals.

If total credits are greater than total debits, the account has a credit balance equal to the difference of the two totals.

VISUAL #2-2

REAL ACCOUNTS

ALL ACCOUNTS ARE ASSIGNED BALANCE SIDES

BALANCE SIDES FOR ASSETS, LIABILITIES, AND EQUITY ACCOUNTS ARE ASSIGNED BASED ON SIDE OF EQUATION THEY ARE ON.

ASSETS	=	LIABILITIES + EQUITY
↓		↓
are on the left side of the equation therefore they are		are on the right side of the equation therefore they are
ASSIGNED LEFT SIDE BALANCE		ASSIGNED RIGHT SIDE BALANCE
DEBIT BALANCE		CREDIT BALANCE
↓		↓

All Asset Accts		All Liability Accts		All Equity Accts	
Normal Debit Balance + side	Credit - side	Debit - side	Normal Credit Balance + side	Debit - side	Normal Credit Balance + side

*In a sole proprietorship, there is only one equity account, which is called capital. For that reason, the terms equity and capital are often used interchangeably. With corporations, equity account are called Common Stock and Retained Earnings.

VISUAL #2-3

TEMPORARY ACCOUNTS

Temporary accounts are established to facilitate efficient accumulation of data for statements. Temporary accounts are established for withdrawals, each revenue, and each expense. ***Temporary accounts are assigned balances based on how they affect equity.***

(Equity Account)

Common Stock and Retained Earnings

Debit	Credit Balance
- side	+ side

Temporary Accounts	Effect on equity? ↑E or ↓E
Dividends*	↓ E = Dr
Revenues	↑ E = Cr
Expenses	↓ E = Dr

Dividends Acct

Normal Debit Balance	
+ side	- side

All Revenue Accts

	Normal Credit Balance
Debit	Credit
- side	+ side

All Expense Accts

Normal Debit Balance	
+ side	- side

Note:
Transactions during the period always increase the balances of these temporary accounts since the transaction represent additional dividends, revenues, and expenses. We will later learn how to move these amounts back to the real account they affect → RETAINED EARNINGS. At the end of the accounting period, transferring withdrawals, revenues, and expenses back to capital is the main use for the decrease side of the temporary accounts.

*The "Dividends" is the account title and the classification of account is a contra-equity.

Chapter 2 Alternate Demonstration Problem

Record the following transactions of Speedy Computer Service, owned by Bill Smith, for the month of March 2017.

March 1. Bill Smith invested $3,000 cash in exchange for common stock.

15. Bill provided services and received cash amounting to $5,400 from customers.

16. Purchased supplies on account, $100.

17. Paid for gas and oil, $800.

18. Paid salaries, 5,000.

21. Provided service on credit, $600.

28. Bill provided services and received cash amounting to $6,000.

29. Paid for truck and equipment rental, $2,500.

30. Speedy Computer Service paid dividends of $2,000.

Required:

1. **Record the above transactions in general journal form.**
2. **Prepare a trial balance after posting the entries to t-accounts (you can make your own t-accounts).**
3. **Prepare an income statement from trial balance.**
4. **Prepare a statement of retained earnings from the trial balance and income statement.**
5. **Prepare a balance sheet using the trial balance totals and the statement of retained earnings.**

Explain why the company's cash balance does not agree with net income.

4.

Speedy Computer Service
Statement of Retained Earnings
For the month ended March 31, 2017

Beginning Retained Earnings	$0
Add: Net Income	3,700
Total	3,700
Less: Dividends	2,000
Ending Retained Earnings	$1,700

5.

Speedy Computer Service
Balance Sheet
March 31, 2017

Assets		Liabilities and Owner's Equity	
Cash	$4,100	Accounts payable	$ 100
Accts Receivable	600	Common stock	3,000
Supplies	100	Retained earnings	1,700
		Total liabilities and	
Total Assets	$4,800	equity	$4,800

6. **First, note that the common stock ($2,000) and cash dividend ($2,000) affect the cash balance but do not affect the amount of net income earned during the period. Also, revenues in the amount of $600 (March 21) are reflected in the net income figure, but have not yet been collected. As such, these revenues did not impact the cash balance.**

Exercise 2-9 page 83

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Prepare general journal entries to record the transactions below for Spade Company by using the following accounts: Cash; Accounts Receivable; Office Supplies; Office Equipment; Accounts Payable; Common stock; Dividends; Fees Earned; and Rent Expense. Use the letters beside each transaction to identify entries. After recording the transactions, post them to T-accounts, which serves as the general ledger for this assignment. Determine the ending balance of each T-account.

The transactions of Spade Company:

a. Kacy Spade, owner, invested $100,750 cash in the company in exchange for common stock
b. The company purchased office supplies for $1,250 cash.
c. The company purchased $10,050 of office equipment on credit.
d. The company received $15,000 cash as fees for services provided to a customer.
e. The company paid $10,050 cash to settle the payable for the office equipment purchased in transaction c.
f. The company billed a customer $2,700 as fees for services provided.
g. The company paid $1,225 cash for the monthly rent.
h. The company collected $1,125 cash as partial payment for the account receivable created in transaction f.
i. The company paid $10,000 cash to Spade (sole shareholder).

a. Kacy Spade, owner, invested $100,750 cash in the company in exchange for common stock.

Date	General Journal	Debit	Credit

Prepare general journal entries to record the transactions below for Spade Company by using the following accounts: Cash; Accounts Receivable; Office Supplies; Office Equipment; Accounts Payable; Common stock; Dividends; Fees Earned; and Rent Expense. Use the letters beside each transaction to identify entries. After recording the transactions, post them to T-accounts, which serves as the general ledger for this assignment. Determine the ending balance of each T-account.

a. Kacy Spade, owner, invested $11,250 cash in the company in exchange for common stock..
b. The company purchased office supplies for $300 cash.
c. The company purchased $6,200 of office equipment on credit.
d. The company received $1,300 cash as fees for services provided to a customer.
e. The company paid $6,200 cash to settle the payable for the office equipment purchased in transaction c.
f. The company billed a customer $2,300 as fees for services provided.
g. The company paid $500 cash for the monthly rent.
h. The company collected $1,000 cash as partial payment for the account receivable created in transaction f.
i. The company paid $3,000 cash in dividends to Spade (sole shareholder).

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

A corporation had the following assets and liabilities at the beginning and end of this year.

	Assets	Liabilities
Beginning of the year	$ 60,000	$ 20,000
End of the year	105,000	36,000

Determine the net income earned or net loss incurred by the business during the year for each of the following separate cases:

a. Owner made no investments in the business and no dividends were paid during the year.
b. Owner made no investments in the business but dividends were $1,250 cash per month.
c. No dividends were paid during the year, but the owner did invest an additional $55,000 cash in exchange for common stock.
d. Dividends were $1,250 cash per month for and the owner invested an additional $35,000 cash in exchange for common stock.

	a.	b.	c.	d.
Beginning of the year equity	$40,000	$40,000	$40,000	$40,000
Investments by stockholder	0	0	55,000	35,000
Dividends	0	(15,000)	0	(15,000)
Net income (loss)	29,000	44,000	(26,000)	9,000
End of the year equity	$69,000	$69,000	$69,000	$69,000

A corporation had the following assets and liabilities at the beginning and end of this year.

	Assets	Liabilities
Beginning of the year	$ 85,000	$ 35,000
End of the year	130,000	50,000

Determine the net income earned or net loss incurred by the business during the year for each of the following separate cases:

a. Owner made no investments in the business and no dividends were paid during the year.
b. Owner made no investments in the business but dividends were $2,000 cash per month.
c. No dividends were paid during the year, but the owner did invest an additional $45,000 cash in exchange for common stock.
d. Dividends were $2,000 cash per month and the owner invested an additional $35,000 cash in exchange for common stock.

	a.	b.	c.	d.
Beginning of the year equity	$50,000	$50,000	$50,000	$50,000
Investments by stockholder	0	0	45,000	35,000
Dividends	0	(24,000)	0	(24,000)
Net income (loss)	30,000	54,000	(15,000)	19,000
End of the year equity	$80,000	$80,000	$80,000	$80,000

Exercise 2-20 page 85

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Posting errors are identified in the following table. In column (1), enter the amount of the difference between the two trial balance columns (debit and credit) due to the error. In column (2), identify the trial balance column (debit or credit) with the larger amount if they are not equal. In column (3), identify the account(s) affected by the error. In column (4), indicate the amount by which the account(s) in column (3) is under- or overstated. Item (a) is completed as an example.

Description of Posting Error	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify Account(s) Incorrectly Stated	(4) Amount that Account(s) is Over-or Understated
a. $3,600 debit to Rent Expense is posted as a $1,340 debit				
b. $6,500 credit to Cash is posted twice as two credits to Cash				
c. $10,900 debit to the Dividends account is debited to Common Stock.				
d. $2,050 debit to Prepaid Insurance is posted as a debit to Insurance Expense.				
e. $38,000 debit to Machinery is posted as a debit to Accounts Payable.				
f. $5,850 credit to Services Revenue is posted as a $585 credit.				
g. $1,390 debit to Store Supplies is not posted.				

Description of Posting Error	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify Account(s) Incorrectly Stated	(4) Amount that Account(s) is Over-or Understated
a. $3,600 debit to Rent Expense is posted as a $1,340 debit	$2,260	Credit	Rent Expense	Understated by $2,260
b. $6,500 credit to Cash is posted twice as two credits to Cash	$6,500	Credit	Cash	Understated by $6,500
c. $10,900 debit to the Dividends account is debited to Common Stock.	$0	N/A	Common Stock	Understated by $10,900
			Dividends	Understated by $10,900
d. $2,050 debit to Prepaid Insurance is posted as a debit to Insurance Expense.	$0	N/A	Prepaid Insurance	Understated by $2,050
			Insurance Expense	Overstated by $2,050
e. $38,000 debit to Machinery is posted as a debit to Accounts Payable.	$0	N/A	Machinery	Understated by $38,000
			Accounts Payable	Understated by $38,000
f. $5,850 credit to Services Revenue is posted as a $585 credit.	$5,265	Debit	Service Revenue	Understated by $5,265
g. $1,390 debit to Store Supplies is not posted.	$1,390	Credit	Store Supplies	Understated by $1,390

Posting errors are identified in the following table. In column (1), enter the amount of the difference between the two trial balance columns (debit and credit) due to the error. In column (2), identify the trial balance column (debit or credit) with the larger amount if they are not equal. In column (3), identify the account(s) affected by the error. In column (4), indicate the amount by which the account(s) in column (3) is under- or overstated. Item (a) is completed as an example.

Description of Posting Error	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify Account(s) Incorrectly Stated	(4) Amount that Account(s) is Over-or Understated
a. $4,300 debit to Rent Expense is posted as a $1,360 debit				
b. $5,800 credit to Cash is posted twice as two credits to Cash				
c. $12,000 debit to the Dividends account is debited to Common Stock.				
d. $3,100 debit to Prepaid Insurance is posted as a debit to Insurance Expense.				
e. $20,000 debit to Machinery is posted as a debit to Accounts Payable.				
f. $9,500 credit to Services Revenue is posted as a $950 credit.				
g. $1,900 debit to Store Supplies is not posted.				

Description of Posting Error	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify Account(s) Incorrectly Stated	(4) Amount that Account(s) is Over-or Understated
a. $4,300 debit to Rent Expense is posted as a $1,360 debit	$2,940	Credit	Rent Expense	Understated $2,940
b. $5,800 credit to Cash is posted twice as two credits to Cash	$5,800	Credit	Cash	Understated by $5,800
c. $12,000 debit to the Dividends account is debited to Common Stock.	$0	N/A	Common Stock	Understated by $12,000
			Dividends	Understated by $12,000
d. $3,100 debit to Prepaid Insurance is posted as a debit to Insurance Expense.	$0	N/A	Prepaid Insurance	Understated by $3,100
			Insurance Expense	Overstated by $3,100
e. $20,000 debit to Machinery is posted as a debit to Accounts Payable.	$0	N/A	Machinery	Understated by $20,000
			Accounts Payable	Understated by $20,000
f. $9,500 credit to Services Revenue is posted as a $950 credit.	$8,550	Debit	Service Revenue	Understated by $8,550
g. $1,900 debit to Store Supplies is not posted.	$1,900	Credit	Store Supplies	Understated by $1,900

Exercise 2-20 Alternate

Exercise 2-21 page 86

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

You are told the column totals in a trial balance are not equal. After careful analysis, you discover only one error. Specifically, a correctly journalized credit purchase of an automobile for $18,950 is posted from the journal to the ledger with a $18,950 debit to Automobiles and another $18,950 debit to Accounts Payable. The Automobiles account has a debit balance of $37,100 on the trial balance. Answer each of the following questions and compute the dollar amount of any misstatement.

Automobiles	
Balance	37,100

a. Is the debit column total of the trial balance overstated, understated, or correctly stated?
b. Is the credit column total of the trial balance overstated, understated, or correctly stated?
c. Is the Automobiles account balance overstated, understated, or correctly stated in the trial balance?
d. Is the Accounts Payable account balance overstated, understated, or correctly stated in the trial balance?
e. If the debit column total of the trial balance is $200,000 before correcting the error, what is the total of the credit column before correction?

	General Journal	Debit	Credit
	Automobiles	18,950	
	Accounts Payable		18,950

Assume Accounts payable related to all other items is $55,000.

Should have been:

Automobiles			
	18,150		
	18,950		
Balance	37,100		

Accounts Payable			
			55,000
			18,950
		Balance	73,950

With error:

Automobiles			
	18,150		
	18,950		
Balance	37,100		

Accounts Payable			
			55,000
	18,950		
		Balance	36,050

a. Is the debit column total of the trial balance overstated, understated, or correctly stated? **Correctly Stated**
b. Is the credit column total of the trial balance overstated, understated, or correctly stated? **Understated by $37,900**
c. Is the Automobiles account balance overstated, understated, or correctly stated in the trial balance? **Correctly Stated**
d. Is the Accounts Payable account balance overstated, understated, or correctly stated in the trial balance? **Understated by $37,900**

e. If the debit column total of the trial balance is $200,000 before correcting the error, what is the total of the credit column before correction? **$162,100**

You are told the column totals in a trial balance are not equal. After careful analysis, you discover only one error. Specifically, a correctly journalized credit purchase of an automobile for $20,000 is posted from the journal to the ledger with a $20,000 debit to Automobiles and another $20,000 debit to Accounts Payable. The Automobiles account has a debit balance of $57,000 on the trial balance. Answer each of the following questions and compute the dollar amount of any misstatement.

Automobiles	
Balance	57,000

a. Is the debit column total of the trial balance overstated, understated, or correctly stated?
b. Is the credit column total of the trial balance overstated, understated, or correctly stated?
c. Is the Automobiles account balance overstated, understated, or correctly stated in the trial balance?
d. Is the Accounts Payable account balance overstated, understated, or correctly stated in the trial balance?
e. If the debit column total of the trial balance is $260,000 before correcting the error, what is the total of the credit column before correction?

	General Journal	Debit	Credit
	Automobiles	20,000	
	Accounts Payable		20,000

Assume Accounts payable related to all other items is $55,000.

Should have been:

Automobiles			Accounts Payable		
	37,000				55,000
	20,000				20,000
Balance	57,000			Balance	75,000

With error:

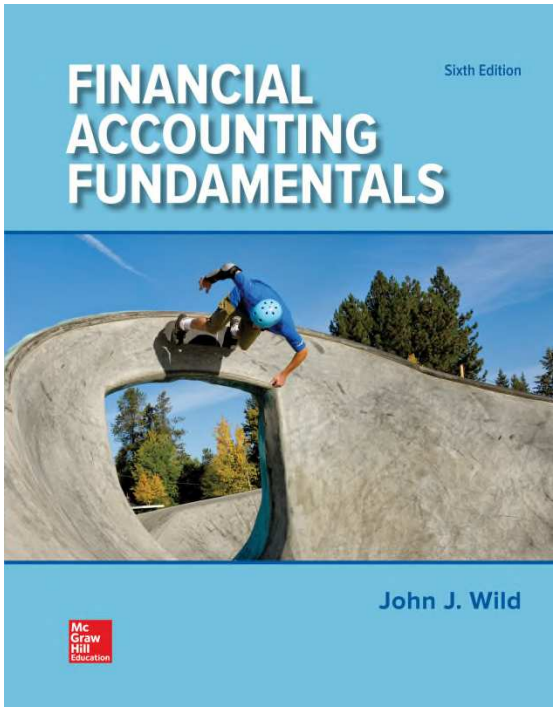

Automobiles			Accounts Payable		
	37,000				55,000
	20,000		20,000		
Balance	57,000			Balance	35,000

a. Is the debit column total of the trial balance overstated, understated, or correctly stated? **Correctly Stated**
b. Is the credit column total of the trial balance overstated, understated, or correctly stated? **Understated by $40,000**
c. Is the Automobiles account balance overstated, understated, or correctly stated in the trial balance? **Correctly Stated**
d. Is the Accounts Payable account balance overstated, understated, or correctly stated in the trial balance? **Understated by $40,000**

e. If the debit column total of the trial balance is $260,000 before correcting the error, what is the total of the credit column before correction? **$220,000**

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Chapter 2 Learning Objectives

CONCEPTUAL

C1 Explain the steps in processing transactions and the role of source documents.
C2 Describe an account and its use in recording transactions.
C3 Describe a ledger and a chart of accounts.
C4 Define *debits* and *credits* and explain double-entry accounting.

ANALYTICAL

A1 Analyze the impact of transactions on accounts and financial statements.
A2 Compute the debt ratio and describe its use in analyzing financial condition.

PROCEDURAL

P1 Record transactions in a journal and post entries to a ledger.
P2 Prepare and explain the use of a trial balance.
P3 Prepare financial statements from business transactions.

© McGraw-Hill Education

Financial Accounting Fundamentals 6th edition Wild Solutions Manual

Learning Objective

C1:
Explain the steps in processing transactions and the role of source documents.

© McGraw-Hill Education

System of Accounts

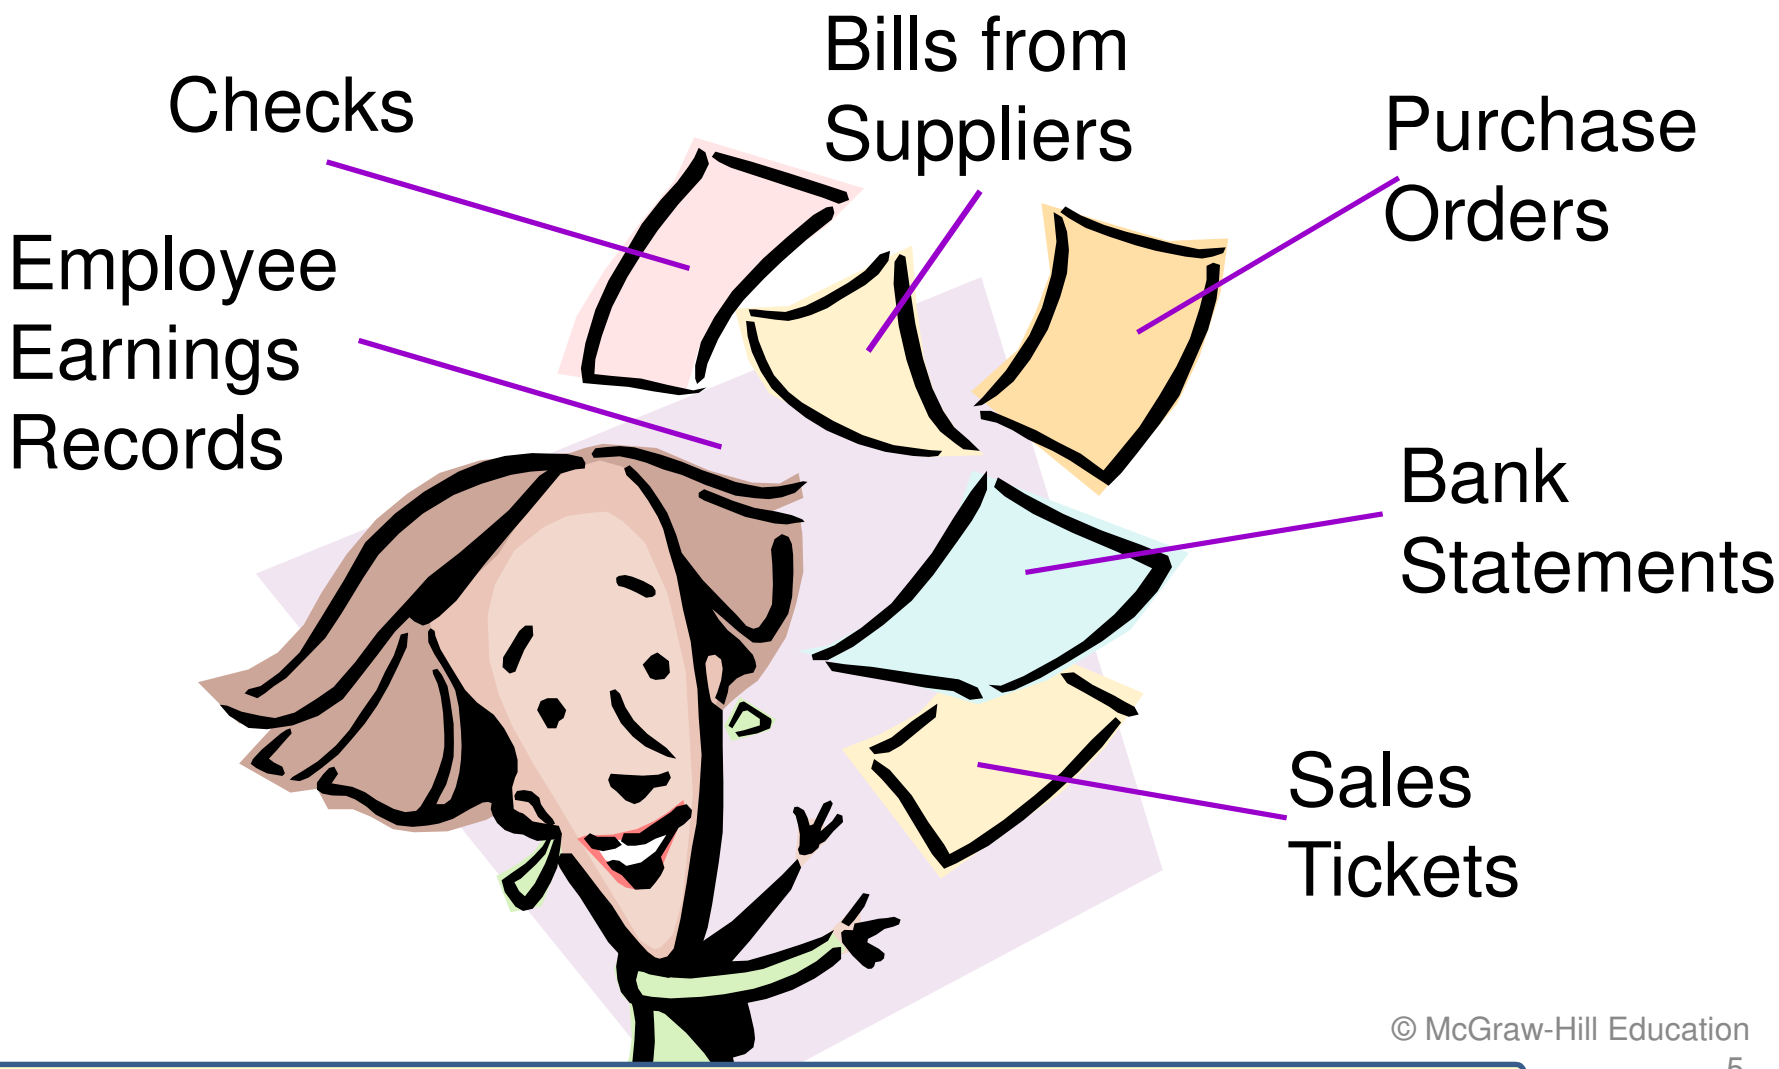

Business transactions and events are the starting points of financial statements. Process from transactions to financial statements is as follows:

- Identify each transaction and event from source documents.
- Analyze each transaction and event using the accounting equation.
- Record relevant transactions and events in a journal.
- Post journal information to ledger accounts.
- Prepare and analyze the trial balance and financial statements.

© McGraw-Hill Education

Learning Objective C1: Explain the steps in processing transactions and the role of source documents.

Source Documents

© McGraw-Hill Education

Learning Objective -C1: Explain the steps in processing transactions and the role of source documents.

Learning Objective

C2:
Describe an account and its use in recording transactions.

© McGraw-Hill Education

The Account and Its Analysis

An account is a record of increases and decreases in a specific asset, liability, equity, revenue, or expense.

The general ledger is a record of all accounts used by the company.

Learning Objective C2: Describe an account and its use in recording transactions.

© McGraw-Hill Education

The Account and Its Analysis

Liability Accounts

Learning Objective C2: Describe an account and its use in recording transactions.

© McGraw-Hill Education

Equity Accounts

Learning Objective C2: Describe an account and its use in recording transactions.

© McGraw-Hill Education

The Account and Its Analysis

Revenues and common stock increases equity.
Expenses and dividends decrease equity.

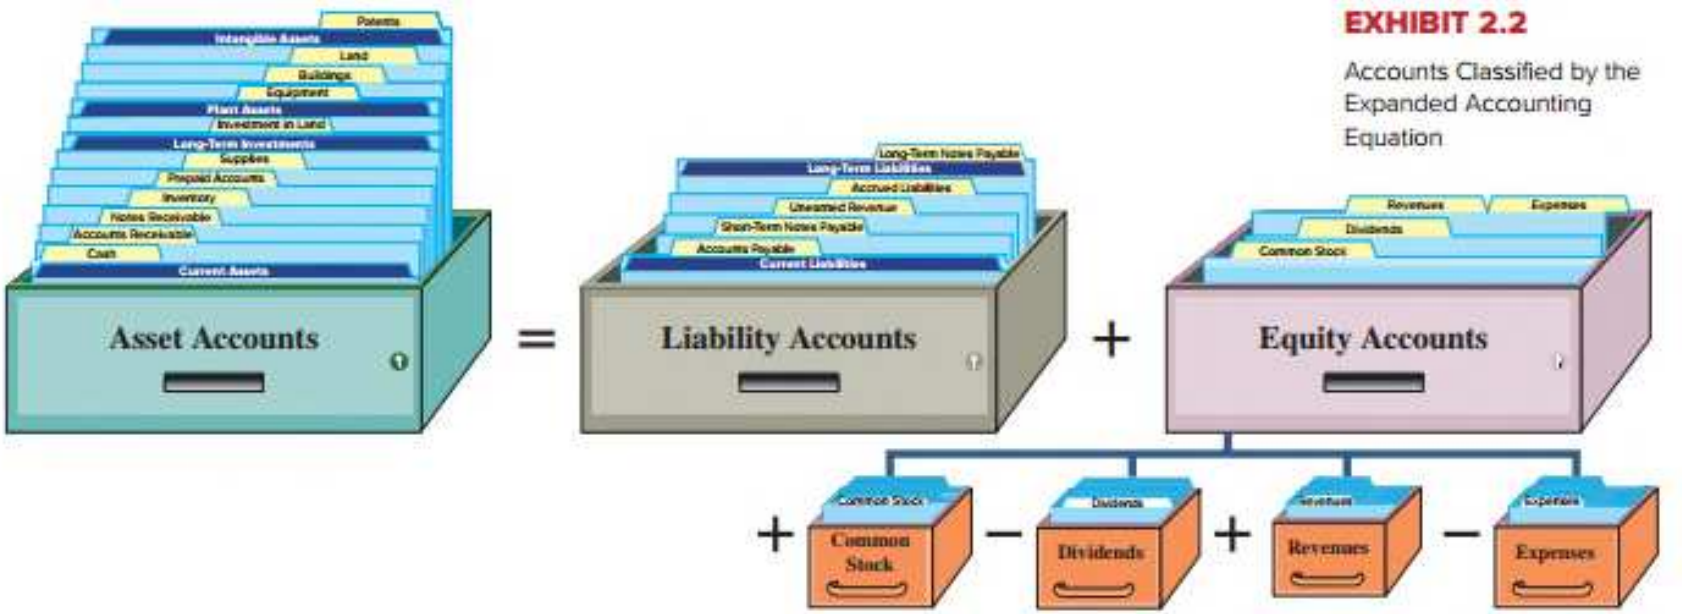

EXHIBIT 2.2

Accounts Classified by the Expanded Accounting Equation

Learning Objective C2: Describe an account and its use in recording transactions.

© McGraw-Hill Education

Learning Objective

C3:
Describe a ledger and chart of accounts.

© McGraw-Hill Education

Ledger and Chart of Accounts

The ledger is a collection of all accounts for an accounting system. A company's size and diversity of operations affect the number of accounts needed.

The chart of accounts is a list of all accounts and includes an identifying number for each account.

Exhibit 2.4

Chart of Accounts

Assets		Liabilities		Equity			
101	Cash	201	Accounts payable	307	Common stock		
106	Accounts receivable	236	Unearned consulting revenue	318	Retained earnings		
126	Supplies			319	Dividends		
128	Prepaid insurance			**Revenues**		**Expenses**	
167	Equipment			403	Consulting revenue	622	Salaries expense
				406	Rental revenue	637	Insurance expense
						640	Rent expense
						652	Supplies expense
						690	Utilities expense

Learning Objective C3: Describe a ledger and chart of accounts .

© McGraw-Hill Education

NEED-TO-KNOW 2-1

Classify each of the following as assets (A), liabilities (L), or equity (EQ).

1)	(A) Asset	Prepaid Rent
2)	(EQ) Equity	Common stock
3)	(A) Asset	Note Receivable
4)	(L) Liability	Accounts Payable
5)	(A) Asset	Accounts Receivable
6)	(A) Asset	Equipment
7)	(L) Liability	Interest Payable
8)	(L) Liability	Unearned Revenue
9)	(A) Asset	Land
10)	(A) Asset	Prepaid Insurance
11)	(L) Liability	Wages Payable
12)	(L) Liability	Rent Payable

Key words to look for in account titles:

Prepaid	Always an asset
Receivable	Always an asset
Payable	Always a liability
Unearned	Always a liability

Learning Objective C1: Explain the steps in processing transactions and the role of source documents.

Learning Objective C2: Describe an account and its use in recording transactions.

Learning Objective C3: Describe a ledger and chart of accounts .

© McGraw-Hill Education

Learning Objective

C4:
Define debits and credits and explain double-entry accounting.

© McGraw-Hill Education

Debits and Credits

A T-account represents a ledger account and is used to depict the effects of one or more transactions.

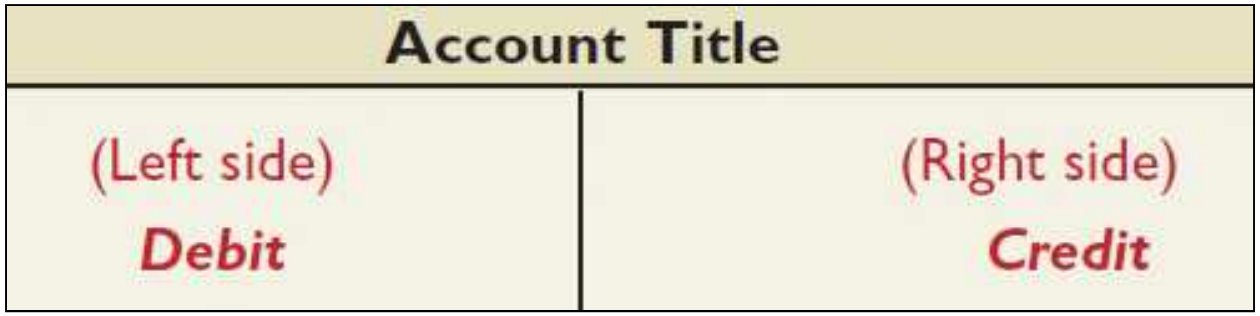

Exhibit 2.5

Learning Objective C4: Define debits and credits and explain double-entry accounting.

Balance Account Column

Exhibit 2.11

T-accounts are useful illustrations, but balance column ledger accounts are used in practice.

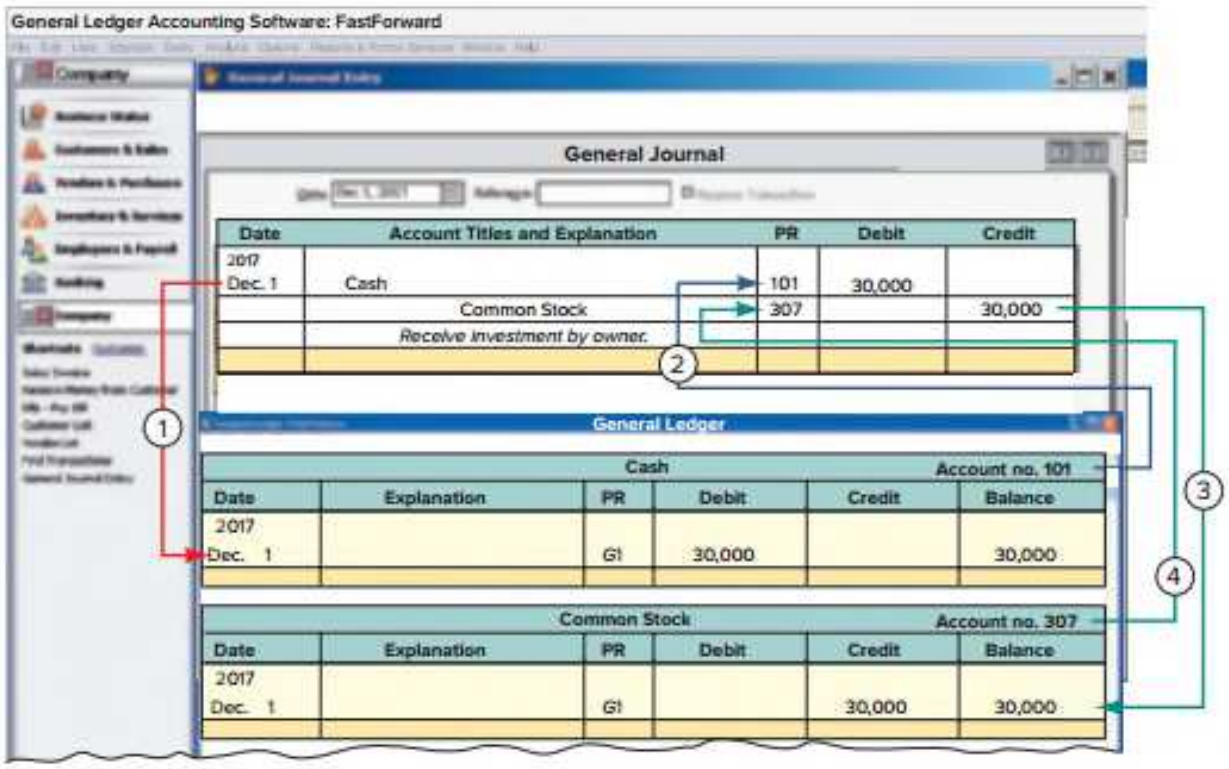

General Ledger					
Cash					Account No. 101
Date	**Explanation**	**PR**	**Debit**	**Credit**	**Balance**
2017 Dec. 1		G1	30,000		30,000
Dec. 2		G1		2,500	27,500
Dec. 3		G1		26,000	1,500
Dec. 10		G1	4,200		5,700

Learning Objective P1: Record transactions in a journal and post entries to a ledger.

© McGraw-Hill Education

Posting Journal Entries

Exhibit 2.12

Key:
1. Identify debit account in ledger: enter date, journal page, amount, and balance (in red).
2. Enter the debit account number from the ledger in the PR column of the journal (in blue).
3. Identify credit account in ledger: enter date, journal page, amount, and balance (in green).
4. Enter the credit account number from the ledger in the PR column of the journal (in green).

Learning Objective P1: Record transactions in a journal and post entries to a ledger.

© McGraw-Hill Education

Learning Objective

A1:
Analyze the impact of transactions on accounts and financial statements.

© McGraw-Hill Education

Processing Transactions

Double-entry accounting is useful in analyzing and processing transactions. Analysis of each transaction follows these four steps.

Step 1 Identify the transaction and any source documents.

Step 2 Analyze the transaction using the accounting equation.

Step 3 Record the transaction in journal entry form applying double-entry accounting.

Step 4 Post the entry (for simplicity, we use T-accounts to represent ledger accounts).

© McGraw-Hill Education

Learning Objective A1: Analyze the impact of transactions on accounts and financial statements.

Processing Transactions

1. Receive Investment by Owner

1 IDENTIFY FastForward receives $30,000 cash from Chas Taylor in exchange for common stock.

2 ANALYZE

Assets	=	Liabilities	+	Equity
Cash				Common Stock
+30,000	=	0		+30,000

3 RECORD

Date	Account Titles and Explanation	PR	Debit	Credit
(1)	Cash	101	30,000	
	Common Stock	307		30,000

4 POST

Cash		101

NEED-TO-KNOW 2-3

Assume Tata began operations on January 1 and completed the following transactions during its first month of operations.

Jan. 1	Jamsetji invested $4,000 cash in exchange for common stock in the Tata company.
Jan. 5	The company purchased $2,000 of equipment on credit.
Jan. 14	The company provided $540 of services for a client on credit.

For each transaction, (a) analyze the transaction using the accounting equation, (b) record the transaction in journal entry form, and c) post the entry using T-accounts to represent the general ledger accounts.

Learning Objective A1: Analyze the impact of transactions on accounts and financial statements.

Learning Objective

P2:

Prepare and explain the use of a trial balance.

© McGraw-Hill Education

Preparing a Trial Balance

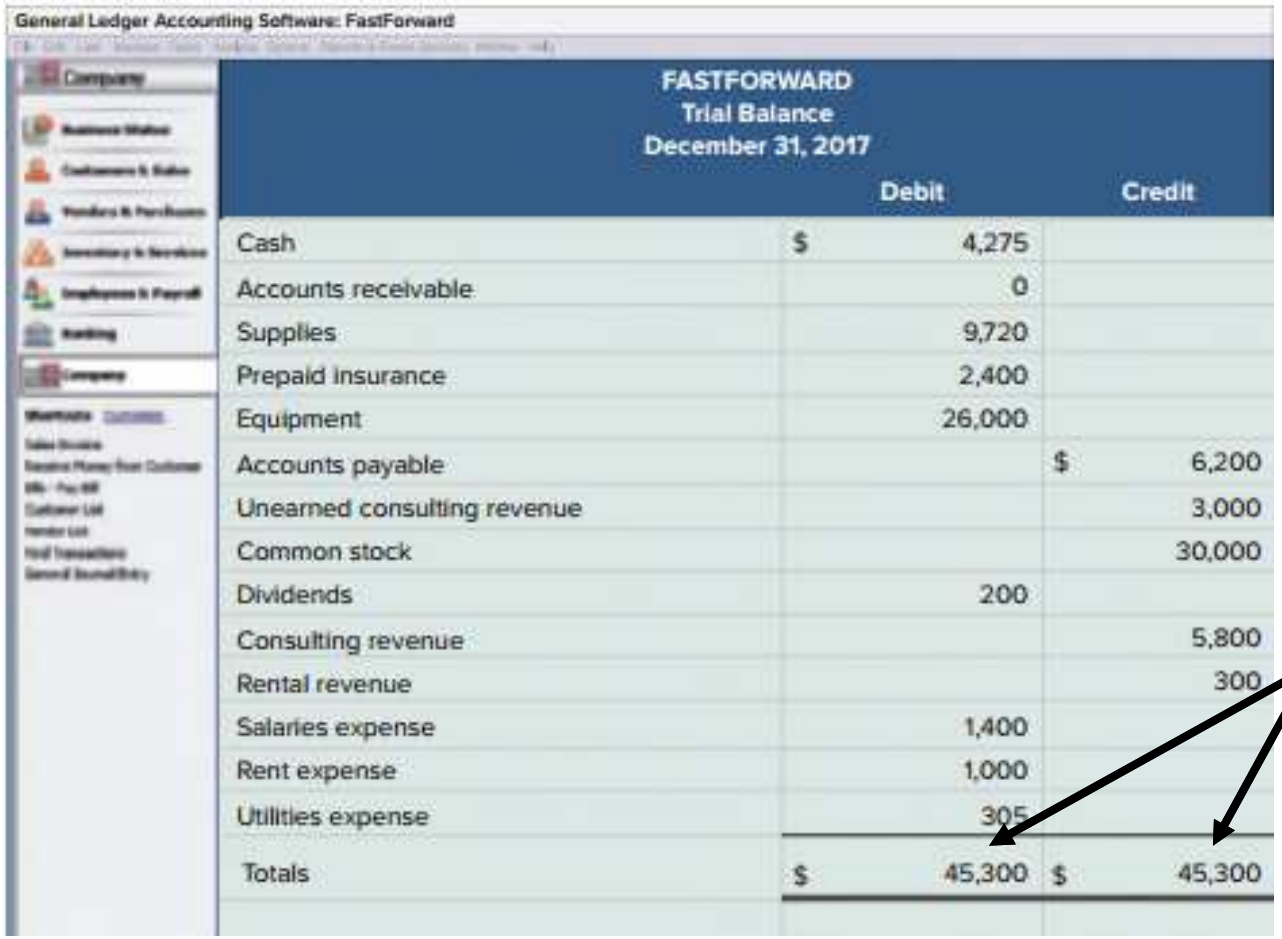

Preparing a trial balance involves three steps:

1. List each account title and its amount (from ledger) in the trial balance. If an account has a zero balance, list it with a zero in the normal balance column (or omit it entirely).
2. Compute the total of debit balances and the total of credit balances.
3. Verify (prove) total debit balances equal total credit balances.

Learning Objective P2: Prepare and explain the use of a trial balance.

© McGraw-Hill Education

After processing its remaining transactions for December, FastForward's Trial Balance is prepared.

FASTFORWARD
Trial Balance
December 31, 2017

	Debit	Credit
Cash	$ 4,275	
Accounts receivable	0	
Supplies	9,720	
Prepaid insurance	2,400	
Equipment	26,000	
Accounts payable		$ 6,200
Unearned consulting revenue		3,000
Common stock		30,000
Dividends	200	
Consulting revenue		5,800
Rental revenue		300
Salaries expense	1,400	
Rent expense	1,000	
Utilities expense	305	
Totals	$ 45,300	$ 45,300

The trial balance lists all ledger accounts and their balances at a point in time. If the books are in balance, the total debits will equal the total credits.

© McGraw-Hill Education

Learning Objective P2: Prepare and explain the use of a trial balance.

Searching for Errors

If the trial balance does not balance, the error(s) must be found and corrected.

❶ **Make sure the trial balance columns are correctly added.**

❷ **Make sure account balances are correctly entered from the ledger.**

❸ **See if debit or credit accounts are mistakenly placed on the trial balance.**

❹ **Re-compute each account balance in the ledger.**

❺ **Verify that each journal entry is posted correctly.**

❻ **Verify that each original journal entry has equal debits and credits.**

Learning Objective P2: Prepare and explain the use of a trial balance.

Financial Statements Prepared from Trial Balance

Exhibit 2.15

Learning Objective P3: Prepare financial statements from business transactions.

© McGraw-Hill Education

Financial Statements

The four financial statements and their purposes are:

1. Income statement — reports revenues less expenses along with the resulting net income or loss over a period of time due to earnings activities.
2. Statement of retained earnings— reports how equity changes over the reporting period from net income (or loss) and from any owner investments and withdrawals over a period of time.
3. Balance sheet — reports the financial position (types and amounts of assets, liabilities, and equity) at a point in time.
4. Statement of Cash Flows — The statement of cash flows lists the cash inflows and cash outflows for the period.
For simplicity, we do not show the statement of cash flows for FastForward in this chapter, but we do return to this statement in the next chapter.

Learning Objective P3: Prepare financial statements from business transactions.

Presentation Issues

1. Dollar signs are not used in journals and ledgers.
2. Dollar signs appear in financial statements and other reports such as trial balances. The usual practice is to put dollar signs beside only the first and last numbers in a column.
3. When amounts are entered in the journal, ledger, or trial balance, commas are optional to indicate thousands, millions, and so forth.
4. Commas are always used in financial statements.
5. Companies commonly round amounts in reports to the nearest dollar, or even to a higher level.

Learning Objective P3: Prepare financial statements from business transactions.

Learning Objective

A2:

Compute the debt ratio and describe its use in analyzing financial condition.

© McGraw-Hill Education

Debt Ratio

$$\text{Debt Ratio} = \frac{\text{Total Liabilities}}{\text{Total Assets}}$$

Evaluates the level of debt risk.

A higher ratio indicates that there is a greater probability that a company will not be able to pay its debt in the future.

Learning Objective A2: Compute the debt ratio and describe its use in analyzing financial condition.

© McGraw-Hill Education

Debt Ratio

Exhibit 2.18

$$\text{Debt Ratio} = \frac{\text{Total Liabilities}}{\text{Total Assets}}$$

$ millions	2015	2014	2013	2012	2011
Total liabilities	$ 672	$ 541	$ 429	$ 421	$ 389
Total assets	$2,047	$1,675	$1,409	$1,340	$1,282
Debt ratio	**0.33**	**0.32**	**0.30**	**0.31**	**0.30**
Industry debt ratio	0.49	0.49	0.47	0.46	0.47
