Experience Sociology 5th edition Croteau Test Bank

SKU: 9781260726824-TEST-BANK

Experience Sociology Edition 5 by Croteau

CORRECT ANSWERS ARE LOCATED IN THE 2ND HALF OF THIS DOC.

TRUE/FALSE - Write 'T' if the statement is true and 'F' if the statement is false.

1) Sociology is just a perspective and a discipline.
   - ◎ true
   - ◎ false

2) The goal of basic research in sociology is to describe and help us better understand our social world.
   - ◎ true
   - ◎ false

3) The term public sociology refers to the efforts to reach beyond an academic audience to make the results of sociological research, both basic and applied, known to the broader public.
   - ◎ true
   - ◎ false

4) Randal found that as one's years of education increased, so did one's annual income. In his study, the independent variable is income.
   - ◎ true
   - ◎ false

TBEXAM.COM

5) Sociologists use empirical evidence to understand patterns in everyday life.
   - ◎ true
   - ◎ false

6) Researchers reason deductively from a general theory when they use it to inform the gathering of specific data.
   - ◎ true
   - ◎ false

7) Theory helps explain data collected by research.
   - ◎ true
   - ◎ false

8) Theory can only reveal connections among social phenomenon if they are apparent.
   - ◎ true
   - ◎ false

9) Intensive interviewing requires close-ended questions.
- ◎ true
- ◎ false

10) The final step in the research process is to analyze your data.
- ◎ true
- ◎ false

11) The operationalization of variables takes place during a study's design.
- ◎ true
- ◎ false

12) Critical social science believes that research must be value-free.
- ◎ true
- ◎ false

13) The process of peer-review is associated with credibility.
- ◎ true
- ◎ false

14) Digitization has provided researchers with new opportunities to study current ideas, politics, and popular culture in real time.
- ◎ true
- ◎ false

15) The internet and other related technologies have transformed social research by enabling researchers to both expand the scale of their work and to keep costs down.
- ◎ true
- ◎ false

MULTIPLE CHOICE - Choose the one alternative that best completes the statement or answers the question.

16) Studies that describe and help us better understand some aspects of society are examples of
- A) applied research.
- B) basic research.
- C) public sociology.
- D) experiments.

17) Researchers who make their findings known to nonacademic audiences are engaging in
A) the peer-review process.
B) public sociology.
C) applied research.
D) basic research.

18) Studies that aim to understand and work toward solving social problems are referred to as
A) basic research.
B) public sociology.
C) applied research.
D) field research.

19) Minoosh created a study to measure how different after-school programs affected students' grades. She will use her findings to help schools allocate funding into after-school programs. Her study is an example of
A) basic research.
B) applied research.
C) public sociology.
D) research methods.

20) Manuel interviewed new parents to learn how gender, both the parents' and the babies', shapes the interactions parents have with their babies. He is conducting
A) basic research.
B) applied research.
C) public sociology.
D) research methods.

21) Reina interviewed young girls about their perceptions of media images of women in order to understand how those images influenced the girls' self-esteem. She is conducting
A) applied research.
B) public sociology.
C) research methods.
D) basic research.

22) Evidence that is based in numbers is known as_____ data.
A) computer-based
B) survey
C) quantitative
D) qualitative

23) Evidence that is non-numerical, such as information gathered from interviews or observation, is known as_____ data.
A) survey
B) content
C) quantitative
D) qualitative

24) Bryan collected homicide and suicide statistics from different cities so he could examine the relationship between these two causes of death. What kind of data is he using?
A) quantitative
B) qualitative
C) survey
D) correlation

25) Heng uses interviews and field research to study how neighborhoods rebuild after natural disasters. What kind of data is he using?
A) quantitative
B) qualitative
C) interpretive
D) peer-process

TBEXAM.COM

26) Marisol conducted a study in which she counted the number of times world leaders used specific words in their speeches. What type of data is she using?
A) secondary
B) experimental
C) quantitative
D) qualitative

27) In a sociological study of the relationship between two variables, which one changes in response to changes in the other?
A) independent variable
B) dependent variable
C) quantitative variable
D) qualitative variable

28) In a sociological study of the relationship between variables, what is associated with and/or causes change in the value of the other?
A) independent variable
B) dependent variable
C) quantitative variable
D) qualitative variable

29) Hengemeh conducted a study and found that individuals with more education tend to marry later and have fewer children. What is the independent variable in her study?
A) education
B) individuals
C) age at marriage
D) number of children

30) In a study, Hans found that the length of a prison sentence varied based on the convict's race, social class, and number of prior arrests. What was the dependent variable in his study?
A) race
B) social class
C) length of prison sentence
D) number of prior arrests

TBEXAM.COM

31) An educated guess that explains the relationship between two variables in a study is called a(n)
A) operationalization.
B) hypothesis.
C) experiment.
D) variable.

32) In designing a study of the relationship between grades and class attendance, Mana states that she expects grades to improve as class attendance increases. This statement is her study's
A) generalization.
B) operationalization.
C) variable.
D) hypothesis.

33) What is the term that refers to a relationship in which one variable is connected to change in another variable?
A) correlation
B) operationalization
C) relationship
D) association

34) Which of the following is NOT an element of social research?
A) learning the truth about human nature
B) collecting empirical evidence
C) explaining how the research was conducted
D) observing patterns in social life

35) Raymond found that as mothers' educational achievement increases, the greater the level of education their daughters are likely to attain. What is the dependent variable?
A) daughters' education
B) education
C) mothers' education
D) years of schooling

TBEXAM.COM

36) Mahmoud found that unemployed young men are more likely to engage in deviant activities than employed young men. What is the independent variable?
A) unemployment
B) employment
C) employment status
D) deviant behaviors

37) Which term refers to when researchers share how they collected and analyzed their data?
A) methodology
B) transparency
C) lucidity
D) explanation of data

38) When completing her research on reasons couples make the decision to live together, Lavonne included a section in her report that described the data she collected and how she reached her conclusions. What aspect of social research is she conducting?
A) finding patterns in everyday life
B) collecting empirical data
C) providing transparency in methods
D) reporting provisional knowledge

TBEXAM.COM

39) Qualitative data and quantitative data are examples of
A) finding patterns in everyday life.
B) empirical evidence.
C) transparency.
D) reporting provisional knowledge.

40) Which of the following types of data allows researchers to gather information on many different cases, but provides a limited amount of information on each case?
A) quantitative
B) qualitative
C) interview
D) content

41) Which term is used for data that represent different values?
A) facts
B) samples
C) figures
D) variables

42) What does it mean for a sociologist to report provisional knowledge?
A) The findings represent the truth about the study from the data collected.
B) The findings represent the truth about what sociologists know about the topic.
C) The findings are subject to change with the discovery of new information.
D) The findings are temporary and based on early data analysis.

43) To establish causality, which of the following conditions does NOT need to be met?
A) The variables must be correlated.
B) The cause must precede effect.
C) The causal relationship must not be explainable by some third variable.
D) The change in the dependent variable must occur before the change in the independent variable.

44) Which of the following is NOT one of the problems researchers face when conducting social research using human participants?
A) It is difficult to control research settings and human participants.
B) Human participants can change their behaviors when studied.
C) Research using existing data provides more valid results.
D) Social life is harder to predict than natural laws.

45) Garner is conducting a study on how students who live on campus eat. He asked participants to record where they ate each of their meals. He found that during the week he collected data, there was a large increase in the number of students eating in the dining hall when compared to the weeks before and after he conducted his study. With what phenomena should Garner be concerned in his findings?
A) Hawthorne effect
B) Hamburg effect
C) Higgins process
D) Hutchens process

46) The two key components of social research are theory and
A) data.
B) patterns.
C) transparency.
D) knowledge.

47) The term that refers to scholars' gathering and evaluation of data is
A) research methods.
B) field methods.
C) applied research.
D) basic research.

TBEXAM.COM

48) Closed-ended questions are used in_____ research.
A) content analysis
B) survey
C) secondary data analysis
D) intensive interviewing

49) Juanita works for Knowledge Works, a company that calls individuals in the United States and asks them closed-ended questions about their knowledge of different social policies. What kind of research is she conducting?
A) focus group
B) intensive interviewing
C) content analysis
D) survey

61) Tanisha created a survey to study how much alcohol students drink. On the survey she asked the following question: In the past seven days, how many times have you consumed alcohol or smoked marijuana? What is the main problem with how this survey question is worded?
A) It is unclear what the question is asking.
B) It contains loaded language.
C) It is a double-barreled question.
D) Students might define drinking differently.

62) Laud was interested in what type of men engaged in anonymous sex in public places. He spent time in a public bathroom where men engaged in sex with other men, and he secretly observed the types of men who visited the bathroom. What kind of research was he conducting?
A) intensive interviewing
B) content analysis
C) field research
D) secondary data analysis

63) What data-gathering technique includes focus groups?
A) field research
B) intensive interviewing
C) content analysis
D) survey

TBEXAM.COM

64) Amelie used data collected by the United States Census Bureau to study changes in family size over the past 100 years. What kind of research is she conducting?
A) survey
B) secondary data analysis
C) experiment
D) content analysis

65) In what data collection technique does the researcher ask open-ended questions to participants and record their responses for analysis?
A) field research
B) experiment
C) survey
D) intensive interview

71) Which of the following is considered to be very difficult to achieve?
A) confidentiality
B) informed consent
C) anonymity
D) uninformed consent

72) Studies that provide anonymity
A) do not allow the participant to know the true purpose of the research study.
B) change the names of participants so that their identity will not be known.
C) group participant data based on characteristics like race or gender.
D) guarantee that even the researcher is not aware of who the participant is.

73) Which of the following is one way a researcher can ensure confidentiality?
A) ensuring that participants understand the research process
B) keeping a list of participant contact information
C) including the names of participants in the final report
D) changing personal details that might identify a person

74) In his study of workplace harassment, Hammid changed the names of the participants that he quoted in his final report. This was done to ensure
A) anonymity.
TBEXAM.COM
B) informed consent.
C) confidentiality.
D) secrecy.

75) What is the first step in the sociological research process?
A) designing the research
B) identifying a research question
C) considering the ethics of the study
D) exploring a topic

76) What is the second step in the sociological research process?
A) Consider the ethical problems present in your question.
B) Decide what type of methods you will use.
C) Identify a specific research question.
D) Explore the topic to find similar studies.

77) Baxter is interested in studying gender and voting patterns. He asks you what he should do next. You should advise him to
A) think of a specific research question to investigate.
B) look up studies on gender and voting to see what has already been done.
C) determine what research method he wants to use in his study.
D) start collecting data to analyze his topic.

78) During what phase of the research process would you operationalize your concepts?
A) analyzing data
B) collecting data
C) developing a specific question to study
D) designing the study

79) Mei is doing intensive interview research with domestic violence victims. She has designed her study and asks you what she should do next. You should advise her to
A) consider the ethical issues in her study.
B) develop the list of questions she will ask in her interviews.
C) start conducting interviews to collect data.
D) develop a specific research question to focus on in her interviews.

TBEXAM.COM

80) Determining who will receive your survey is a component of which of the following research stages?
A) exploring a topic
B) collection data
C) designing the study
D) considering the ethical dimensions

81) Receiving approval from your school's Institutional Review Board (IRB) is a part of the
A) exploring your topic stage.
B) considering the ethical dimensions stage.
C) interpreting data stage.
D) designing the study stage.

82) What type of research focuses on how individuals create meaning in their everyday lives?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

83) What type of research views the world as being guided by natural laws that can be discovered though research?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

84) Which position strives for value neutrality?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

85) Kai's college has a major problem with student drinking on campus. He decided to study student drinking behavior by focusing on the reasons students drink and the meanings they attach to their behaviors. What type of research is he conducting?
A) positivist social science
B) interpretive social science
C) critical social science
D) All of these answers are correct.

TBEXAM.COM

86) Lebron's college has a major problem with student drinking on campus. He decided to study student drinking behavior by focusing on the factors that influence drinking behavior and the variables that predict that a student will engage in heavy drinking. What type of research is he conducting?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

87) Which term refers to the process of removing one's personal viewpoints and opinions from the research process?
A) transparency
B) value-detachment
C) value-neutrality
D) objectivity

88) What type of research seeks to create knowledge that can be used to make society a better place?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

89) Which position rejects the idea of value-neutrality?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

90) Which type(s) of research is/are based on the belief that recognizing the values of the researcher is important when conducting research?
A) positivist social science and interpretive social science
B) positivist social science and critical social science
C) interpretive social science and critical social science
D) Only critical social science recognizes values.

91) Which of the following rejects the idea of value-neutrality and embraces the goal of bringing about social change?
A) positivist social science
B) interpretive social science
C) critical social science
D) classical social science

92) Sociological research is evaluated for quality prior to publication. This is known as
A) public sociology.
B) basic research.
C) the peer-review process.
D) quality assurance.

93) What is the purpose of the peer-review process?
A) It allows researchers to share their research with other sociologists.
B) It helps to ensure that only quality research is published.
C) It provides a way for sociologists to share their findings with the public.
D) It helps researchers improve their methods prior to collecting data.

94) De'Shawn submitted a manuscript to a journal for publication. The editor at the journal asked experts in the topic De'Shawn studied to read and comment on her work. De'Shawn received feedback from these experts that she then used to improve her manuscript before it was published. What practice is described here?
A) collecting manuscript feedback
B) the peer-review process
C) gaining expert feedback
D) draft editing for publication

95) Glenna was asked by a journal to evaluate a research study written by another scholar. After reading the paper, she provided feedback to the author and said that more work was needed to improve the quality of the paper before it was published. Glenna is participating in
A) providing expert feedback on the draft.
B) editing a draft for publication.
C) ensuring only quality research is published.
D) the journal's peer-review process.

96) When evaluating research, you should ask all EXCEPT for which of the following questions?
A) Who conducted this research?
B) What sample was used?
C) What theory informed this research?
D) Do the findings reflect the data?

TBEXAM.COM

97) Quinn came across a study regarding homelessness and its potential causes. He is interested in knowing more about the concepts and perspectives that the researcher utilized. Which question would be the most important for Quinn to ask?
A) What is the sample?
B) What theory informed this research?
C) What data was used?
D) Who paid for this research?

98) Connell saw a research study that found that individuals who owned a smartphone had more sex partners than individuals who did not own a smartphone. Which question would be the most important for Connell to examine to assess the findings of this study?
A) What was the sample?
B) What theory informed this research?
C) Where was this study conducted?
D) What is the research question?

99) Diallo read two research studies on men's contributions to housework. One study found that men did 50 percent of the housework and the other study found that men did 30 percent of the housework. In order to assess the differences in these findings, what question should Diallo ask?

A) What was the sample?
B) Are these findings justified?
C) How were the variables operationalized?
D) What was the research question?

100) How have modern technological advances assisted the research process?

A) Technology has not assisted the research process.
B) Qualitative data are easier to collect and analyze.
C) Both qualitative and quantitative data are easier to collect and analyze.
D) Quantitative data are easier to collect and analyze.
