Introduction to Managerial Accounting Edition 7 by Brewer

CORRECT ANSWERS ARE LOCATED IN THE 2ND HALF OF THIS DOC.

TRUE/FALSE - Write 'T' if the statement is true and 'F' if the statement is false.

1) All costs incurred in a merchandising firm are period costs.
   - ◎ true
   - ◎ false

2) Depreciation is always considered a product cost for external financial reporting purposes in a manufacturing firm.
   - ◎ true
   - ◎ false

3) Advertising costs are considered product costs for external financial reports since they are incurred in order to promote specific products.
   - ◎ true
   - ◎ false

4) Property taxes and insurance premiums paid on a factory building are examples of manufacturing overhead.
   - ◎ true
   - ◎ false

TBEXAM.COM

5) Manufacturing overhead combined with direct materials is known as conversion cost.
   - ◎ true
   - ◎ false

6) If the ending inventory of finished goods is overstated, net income will be overstated.
   - ◎ true
   - ◎ false

7) If the ending inventory of finished goods is understated, net income will be overstated.
   - ◎ true
   - ◎ false

8) In a manufacturing company, goods available for sale equals the sum of the cost of goods manufactured and the beginning finished goods inventory.
   - ◎ true
   - ◎ false

22) The cost of rent for a manufacturing equipment used in a manufacturing plant is generally considered to be a:

	Prime cost	Product cost
a.	No	Yes
b.	No	No
c.	Yes	No
d.	Yes	Yes

A) choice a.
B) choice b.
C) choice c.
D) choice d.

23) Each of the following would be a conversion cost except:
A) Cost of labour physically and conveniently traceable to a product
B) Cost of utilities used in a manufacturing plant.
C) Depreciation of a machine used in manufacturing.
D) Cost of material physically and conveniently traceable to a product

24) For a manufacturing company, which of the following is an example of a period rather than a product cost?
A) Depreciation of factory equipment.
B) Wages of salespersons.
C) Wages of machine operators.
D) Insurance on factory equipment.

25) Which of the following would be considered a product cost for external financial reporting purposes?
A) Cost of a warehouse used to store finished goods.
B) Cost of guided public tours through the company's facilities.
C) Cost of travel necessary to sell the manufactured product.
D) Cost of sand spread on the factory floor to absorb oil from manufacturing machines.

26) Which of the following would NOT be treated as a product cost for external financial reporting purposes?
A) Depreciation on a factory building.
B) Salaries of factory workers.
C) Indirect labour in the factory.
D) Advertising expenses.

35) Which of the following should NOT be included as part of manufacturing overhead at a company that makes office furniture?
A) Sheet steel in a file cabinet made by the company.
B) Manufacturing equipment depreciation.
C) Direct labour.
D) Hardware installed on desks

36) Rossiter Company failed to record a credit sale at the end of the year, although the reduction in finished goods inventories was correctly recorded when the goods were shipped to the customer. Which one of the following statements is correct?
A) Accounts receivable was not affected, inventory was not affected, sales were understated, and cost of goods sold was understated.
B) Accounts receivable was understated, inventory was overstated, sales were understated, and cost of goods sold was overstated.
C) Accounts receivable was not affected, inventory was understated, sales were understated, and cost of goods sold was understated.
D) Accounts receivable was understated, inventory was not affected, sales were understated, and cost of goods sold was not affected.

37) If the cost of goods sold is lower than the cost of goods manufactured, then:
A) Work in process inventory has decreased during the period.
B) Finished goods inventory has increased during the period.
C) Total manufacturing costs must be greater than cost of goods manufactured.
D) Finished goods inventory has decreased during the period.

38) Last month, when 10,000 units of a product were manufactured, the cost per unit was $60. At this level of activity, variable costs are 50% of total unit costs. If 10,500 units are manufactured next month and cost behaviour patterns remain unchanged the?
A) total variable cost will remain unchanged.
B) fixed costs will increase in total.
C) variable cost per unit will increase.
D) total cost per unit will decrease.

39) Variable cost:
A) increases on a per unit basis as the number of units produced increases.
B) remains constant on a per unit basis as the number of units produced increases.
C) remains the same in total as production increases.
D) decreases on a per unit basis as the number of units produced increases.

40) Within the relevant range, the difference between variable costs and fixed costs is:
A) variable costs per unit fluctuate and fixed costs per unit remain constant.
B) variable costs per unit are constant and fixed costs per unit fluctuate.
C) both total variable costs and total fixed costs are constant.
D) both total variable costs and total fixed costs fluctuate.

41) Which of the following statements regarding fixed costs is incorrect?
A) Expressing fixed costs on a per unit basis usually is the best approach for decision-making.
B) Fixed costs expressed on a per unit basis will react inversely with changes in activity.
C) Assumptions by accountants regarding the behaviour of fixed costs rest heavily on the concept of the relevant range.
D) Fixed costs frequently represent long-term investments in property, plant, and equipment.

42) Last month, when 11,000 units of a product were manufactured, the cost per unit was $ 50. At this level of activity, variable costs are 40% of total unit costs. If 12,000 units are manufactured next month and cost behaviour patterns remain unchanged, the total cost of goods manufactured will be?
A) $ 570,000.
B) $600,000.
C) $ 770,000.
D) $630,000.

TBEXAM.COM

43) Which of the following statements is true?
A) An indirect cost can be easily traced to an individual cost object.
B) An indirect cost is one incurred to support several cost objects.
C) A direct cost cannot be easily and economically traced to a cost object.
D) The determination of a cost object is nor relevant to the traceability of costs.

44) An opportunity cost is:
A) the difference in total costs which results from selecting one alternative instead of another.
B) the potential benefit forgone by selecting one alternative instead of another.
C) a cost which may be saved by not adopting an alternative.
D) a cost which may be shifted to the future with little or no effect on current operations.

77) Assume that cost of goods sold for Boardman Company for January was $140,000. What was the cost of goods manufactured for the month?
A) $135,000
B) $139,000
C) $140,000
D) $145,000

78) At a sales volume of 30,000 units, CD Company's total fixed costs are $ 80,000 and total variable costs are $60,000. (Do not round intermediate calculations)

If CD Company were to sell 45,000 units, the total expected cost would be?
A) $124,000.
B) $144,625.
C) $146,000.
D) $ 170,000

79) At a sales volume of 32,000 units, CD Company's total fixed costs are $64,000 and total variable costs are $60,000. (Do not round intermediate calculations)

If CD Company were to sell 50,000 units, the total expected cost per unit would be (Do not round intermediate calculations. Round the final answer to two decimal places):
A) $2.48.
B) $3.16.
C) $3.20.
D) $3.88.

80) Jim-bob Company has two business alternatives - A & B with different total annual costs as set out below:

Total annual costs:	A	B
Advertising	$32,000	$31,000
Other marketing costs	$18,000	$12,000
Other expenses	$30,000	$35,000

Additionally, if alternative B is chosen the business will have to use some space for its own purposes that are currently being rented to an outside business for $5,000 per year.

What are the total differential costs between the two alternatives?

A) $2,000.
B) $3,000.
C) $5,000.
D) $7,000.

TBEXAM.COM

81) The following costs were incurred in May:

Direct materials	$44,800
Direct labour	$29,000
Manufacturing overhead	$29,300
Selling expenses	$26,800
Administrative expenses	$37,100

TBEXAM.COM

Conversion costs during the month totaled:

A) $58,300
B) $74,100
C) $167,000
D) $73,800

82) Abburi Company's manufacturing overhead is 45% of its total conversion costs. If direct labour is $57,200 and if direct materials are $22,100, the manufacturing overhead is:

A) $46,800
B) $69,911
C) $18,082
D) $64,882

83) During the month of May, direct labour cost totaled $13,055 and direct labour cost was 35% of prime cost. If total manufacturing costs during May were $79,700, the manufacturing overhead was:
A) $24,245
B) $37,300
C) $66,645
D) $42,400

84) In May direct labour was 30% of conversion cost. If the manufacturing overhead for the month was $116,200 and the direct materials cost was $21,000, the direct labour cost was:
A) $271,133
B) $49,800
C) $49,000
D) $9,000

85) The following costs were incurred in May:

Direct materials	$41,000
Direct labour	$29,900
Manufacturing overhead	$21,900
Selling expenses	$14,900
Administrative expenses	$30,400

TBEXAM.COM

Prime costs during the month totaled:
A) $92,800
B) $138,100
C) $70,900
D) $51,800

86) Perteet Corporation's relevant range of activity is 6,300 units to 12,500 units. When it produces and sells 9,400 units, its average costs per unit are as follows:

	Average Cost per Unit
Direct materials	$7.20
Direct labour	$3.65
Variable manufacturing overhead	$1.70
Fixed manufacturing overhead	$2.90
Fixed selling expense	$0.65
Fixed administrative expense	$0.35
Sales commissions	$0.45
Variable administrative expense	$0.50

If 7,000 units are produced, the total amount of manufacturing overhead cost is closest to:

A) $28,520
B) $49,890
C) $39,160
D) $22,010

87) A manufacturing company prepays its insurance coverage for a three-year period. The premium for the three years is $5,040 and is paid at the beginning of the first year. Seventy percent of the premium applies to manufacturing operations and thirty percent applies to selling and administrative activities. What amounts should be considered product and period costs respectively for the first year of coverage?

	Product	Period
A)	$ 504	$ 1,176
B)	$ 1,680	$ 0
C)	$ 0	$ 1,680
D)	$ 1,176	$ 504

A) Choice A
B) Choice B
C) Choice C
D) Choice D

88) At an activity level of 9,100 machine-hours in a month, Falks Corporation's total variable production engineering cost is $765,310 and its total fixed production engineering cost is $224,070. What would be the total production engineering cost per machine-hour, both fixed and variable, at an activity level of 9,700 machine-hours in a month? Assume that this level of activity is within the relevant range. **(Round intermediate calculations to 2 decimal places.)**

A) $102.00
B) $108.72
C) $107.20
D) $102.28

89) Schonhardt Corporation's relevant range of activity is 2,900 units to 7,500 units. When it produces and sells 5,200 units, its average costs per unit are as follows:

	Average Cost per Unit
Direct materials	$ 7.20
Direct labour	$ 3.40
Variable manufacturing overhead	$ 1.25
Fixed manufacturing overhead	$ 3.50
Fixed selling expense	$ 0.85
Fixed administrative expense	$ 0.55
Sales commissions	$ 0.65
Variable administrative expense	$ 0.55

TBEXAM.COM

If 6,500 units are produced, the total amount of fixed manufacturing cost incurred is closest to:

A) $23,400
B) $22,620
C) $18,460
D) $18,200

Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

Introduction to Managerial Accounting Edition 7 by Brewer

113) Management of Plascencia Corporation is considering whether to purchase a new model 370 machine costing $512,000 or a new model 220 machine costing $408,000 to replace a machine that was purchased 12 years ago for $455,000. The old machine was used to make product I43L until it broke down last week. Unfortunately, the old machine cannot be repaired.
Management has decided to buy the new model 220 machine. It has less capacity than the new model 370 machine, but its capacity is sufficient to continue making product I43L.
Management also considered, but rejected, the alternative of simply dropping product I43L. If that were done, instead of investing $408,000 in the new machine, the money could be invested in a project that would return a total of $485,000.

In making the decision to buy the model 220 machine rather than the model 370 machine, the sunk cost was:

A) $455,000
B) $408,000
C) $512,000
D) $485,000

114) Management of Plascencia Corporation is considering whether to purchase a new model 370 machine costing $524,000 or a new model 220 machine costing $438,000 to replace a machine that was purchased 7 years ago for $499,000. The old machine was used to make product I43L until it broke down last week. Unfortunately, the old machine cannot be repaired.
Management has decided to buy the new model 220 machine. It has less capacity than the new model 370 machine, but its capacity is sufficient to continue making product I43L.
Management also considered, but rejected, the alternative of simply dropping product I43L. If that were done, instead of investing $438,000 in the new machine, the money could be invested in a project that would return a total of $25,000.

In making the decision to buy the model 220 machine rather than the model 370 machine, the differential cost was:

A) $86,000
B) $61,000
C) $25,000
D) $11,000

115) Management of Plascencia Corporation is considering whether to purchase a new model 370 machine costing $531,000 or a new model 220 machine costing $444,000 to replace a machine that was purchased 10 years ago for $477,000. The old machine was used to make product I43L until it broke down last week. Unfortunately, the old machine cannot be repaired.
Management has decided to buy the new model 220 machine. It has less capacity than the new model 370 machine, but its capacity is sufficient to continue making product I43L. Management also considered, but rejected, the alternative of simply dropping product I43L. If that were done, instead of investing $444,000 in the new machine, the money could be invested in a project that would return a total of $458,000.

In making the decision to invest in the model 220 machine, the opportunity cost was:

A) $477,000
B) $444,000
C) $531,000
D) $458,000

116) Bolka Corporation, a merchandising company, reported the following results for October:

Sales	$ 467,000
Cost of goods sold (all variable)	$ 173,200
Total variable selling expense	$ 19,500
Total fixed selling expense	$ 17,500
Total variable administrative expense	$ 10,100
Total fixed administrative expense	$ 34,000

The gross margin for October is:

A) $264,200
B) $293,800
C) $212,700
D) $415,500

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

117) Stony Electronics Corporation manufactures a Wifi speaker designed for mounting on the wall of the bathroom. The following list represents some of the different types of costs incurred in the manufacture of these Wifi speakers:

1) The plant manager's salary.
2) The cost of heating the plant.
3) The cost of heating executive offices.
4) The cost of printed circuit boards used in the Wifi speakers.
5) Salaries and commissions of company salespersons.
6) Depreciation on office equipment used in the executive offices.
7) Depreciation on production equipment used in the plant.
8) Wages of janitorial personnel who clean the plant.
9) The cost of insurance on the plant building.
10) The cost of electricity to light the plant.
11) The cost of electricity to power plant equipment.
12) The cost of maintaining and repairing equipment in the plant.
13) The cost of printing promotional materials for trade shows.
14) The cost of solder used in assembling the Wifi speakers.
15) The cost of telephone service for the executive offices.

118) Bill Pope has developed a new device that is so exciting he is considering quitting his job in order to produce and market it on a large-scale basis. Bill will rent a garage for $300 per month for production purposes. Utilities will cost $40 per month. Bill has already taken an industrial design course at the local community college to help prepare for this venture. The course cost $300. Bill will rent production equipment at a monthly cost of $800. He estimates the material cost per unit will be $5, and the labour cost will be $3. He will hire workers and spend his time promoting the product. To do this he will quit his job, which pays $3,000 per month. Advertising and promotion will cost $900 per month.

Required:

Complete the chart below by placing an "X" under each heading that helps to identify the cost involved. There can be "Xs" placed under more than one heading for a single cost, e.g., a cost might be a sunk cost, an overhead cost and a product cost; there would be an "X" placed under each of these headings opposite the cost.

	Opportunity Cost	**Sunk Cost**	**Variable Cost**	**Fixed Cost**	**Manuf. Overhead**	**Product Cost**	**Selling Cost**	**Differential Cost***
General rent								
Utilities								
Cost of the industrial design course								
Equipment rented								
Material cost								
Labour cost								
Present salary								
Advertising

119) Logan Products, a small manufacturer, has submitted the items below concerning last year's operations. The president's secretary, trying to be helpful, has alphabetized the list.

Administrative salaries	$2,400
Advertising expense	1,200
Depreciation—factory building	800
Depreciation—factory equipment	1,600
Depreciation—office equipment	180
Direct labour cost	21,900
Raw materials inventory, beginning	2,100
Raw materials inventory, ending	3,200
Finished goods inventory, beginning	46,980
Finished goods inventory, ending	44,410
General liability insurance expense	240
Indirect labour cost	11,800
Insurance on factory	1,400
Purchases of raw materials	14,600
Repairs and maintenance of factory	900
Sales salaries	2,000
Taxes on factory	450
Travel and entertainment expense	1,410
Work in process inventory, beginning	1,670
Work in process inventory, ending	1,110

Introduction to Managerial Accounting Edition 7 by Brewer

120) Laco Company acquired its factory building about 20 years ago. For several years, the company has rented out a small, unused part of the building. The renter's lease will expire soon. Rather than renewing the lease, Laco Company is considering using the space itself to manufacture a new product. Under this option, the unused space will continue to be depreciated on a straight-line basis, as in past years.

Direct materials and direct labour cost for the new product would be $50 per unit. In order to have a place to store finished units of the new product, the company would have to rent a small warehouse nearby. The rental cost would be $2,000 per month. It would cost the company an additional $4,000 each month to advertise the new product. A new production supervisor would be hired to oversee production of the new product who would be paid $3,000 per month. The company would pay a sales commission of $10 for each unit of product that is sold.

Required:

Complete the chart below by placing an "X" under each column heading that helps to identify the costs listed to the left. There can be "X's" placed under more than one heading for a single cost. For example, a cost might be a product cost, an opportunity cost, and a sunk cost; there would be an "X" placed under each of these headings on the answer sheet opposite the cost.

	Opportunity Cost	Sunk Cost	Variable Cost	Fixed Cost	Product Cost	Selling & Admin. Cost	Differential Cost*
Rent on unused factory space							
Depreciation on the factory space							
Direct material and direct labour							
Rental cost of the small warehouse							
Advertising cost							
Production supervisor's salary							
Sales commissions

123) The following information is from Marchant Manufacturing Co. for September:

Direct materials used in production	$95,000
Direct labour	67,000
Total manufacturing cost	234,000
Raw materials inventory, Sept. 1	24,000
Work in process inventory, Sept. 1	6,000
Finished goods inventory, Sept. 1	101,000
Purchases of raw materials	102,000
Cost of goods manufactured	233,000
Administrative expense	41,000
Selling expense	56,000
Sales	344,000
Gross margin	127,000
Net income	30,000

Required:

a. Compute the Cost of Goods Sold.
b. Compute the balance in Finished Goods Inventory at September 30.
c. Compute the balance in Work in Process Inventory at September 30.
d. Compute the balance in Raw Materials Inventory at September 30.
e. Compute the total Manufacturing Overhead.

(Hint: The easiest method of solving this problem is to sketch out the income statement and the schedule of cost of goods manufactured, enter the given amounts, and then enter the unknowns as plug figures.)

136.2) The cost of goods manufactured, or the year (in thousands of dollars) was:
A) $450.
B) $470.
C) $530.
D) $540.

136.3) The cost of goods sold for the year (in thousands of dollars) was:
A) $410.
B) $ 490
C) $570.
D) $610.

136.4) The net income for the year (in thousands of dollars) was:
A) $70.
B) $130.
C) $190.
D) $390.

137) The following data pertain to Harriman Company's operations during July:

TBEXAM.COM	**July 1**	**July 31**
Raw materials inventory	0	$5,000
Work in process inventory	?	4,000
Finished goods inventory	$12,000	?
Other data:		
Cost of goods manufactured		$105,000
Raw materials used		40,000
Manufacturing overhead costs		20,000
Direct labour costs		39,000
Gross profit		100,000
Sales		210,000

Introduction to Managerial Accounting Edition 7 by Brewer

137.1) The beginning work in process inventory was:
A) $1,000.
B) $4,000.
C) $10,000.
D) $14,000.

137.2) The ending finished goods inventory was:
A) $2,000.
B) $7,000.
C) $12,000.
D) $17,000.

138) Bergeron Inc. reported the following data for last year:

Work in process inventory, beginning	$90
Work in process inventory, ending	$140
Finished goods inventory, beginning	$200
Finished goods inventory, ending	$180
Direct labour cost	$350
Direct materials cost	$ 550
Manufacturing overhead cost	$ 450

TBEXAM.COM

139) Geneva Steel Corporation produces large sheets of heavy gauge steel. The company showed the following amounts relating to its production for the year just completed:

Direct materials used in production	$120,000
Direct labour costs for the year	70,000
Work in process, beginning	25,000
Finished goods, beginning	50,000
Cost of goods available for sale	310,000
Cost of goods sold	260,000
Work in process, ending	16,000

139.1) The balance of the finished goods inventory at the end of the year was:

A) $45,000.
B) $50,000.
C) $95,000.
D) $193,000.

139.2) Manufacturing overhead cost for the year was:

A) $ 44,000
B) $61,000
C) $78,000.
D) $84,000.

TBEXAM.COM

139.3) Cost of goods manufactured for the year was:

A) $160,000.
B) $171,000.
C) $ 260,000.
D) $ 290,0000

140) Boardman Company reported the following data for the month of January:

Inventories:	1/1	1/31
Raw materials	$32,000	$31,000
Work in process	$18,000	$12,000
Finished goods	$30,000	$35,000

Additional information:

Sales revenue	$210,000
Direct labour costs	40,000
Manufacturing overhead costs	70,000
Selling expenses	25,000
Administrative expenses	35,000

140.1) If raw materials costing $35,000 were purchased during January, the total manufacturing costs for the month was?

A) $144,000.
B) $145,000.
C) $146,000.
D) $151,000.

TBEXAM.COM

140.2) Assume that cost of goods sold for January was $124,000. The net income for January was:

A) $25,000.
B) $26,000.
C) $51,000.
D) $61,000.

140.3) Boardman Company's total conversion cost for January was:

A) $110,000.
B) $130,000.
C) $135,000.
D) $170,000.

141) Tech Computer manufactures tablets in its plant located in Toronto and then ships the computers directly to distributors and retailers. The company's accountant has enlisted you to classify the following company's expenses:

141.1) Cost of a new advertising campaign on YouTube.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.2) Straight line depreciation on the factory building.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.3) Units of production depreciation on the factory equipment.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.4) The salary of the Vice President of Sales.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

TBEXAM.COM

141.5) The delivery charges incurred when shipping the tablet drives to be installed in the tablet.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.6) The drive installed in each tablet.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.7) Cost of computer motherboard, which is a part of the finished product.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

141.8) Cost of a warehouse (i.e., rent) used to store finished goods (tablets) prior to selling them to the customer.
A) Fixed product cost.
B) Variable product cost.
C) Fixed period cost.
D) Variable period cost.

142) Charlie's Chocolate Factory manufactures chocolate bars and ships them directly to wholesalers and retailers across the country. The company has two product lines: milk chocolate bars and chocolate covered almonds. Classify the following company's expenses if the cost object is a single product line (either milk chocolate bars or chocolate covered almonds).

142.1) The cost of cocoa used in the factory.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

TBEXAM.COM

142.2) Lease expenses on equipment used in the production factory.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

142.3) Almonds used in the chocolate covered almonds.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

142.4) Shipping costs to deliver ingredients ordered from the suppliers to the production factory.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

142.5) Salaries for milk chocolate bars production line workers
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

142.6) Advertising campaign for chocolate covered almonds.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

142.7) Sales Commissions paid to Business Development Managers.
A) Direct product cost.
B) Indirect product cost.
C) Direct period cost.
D) Indirect period cost.

143) Frosting Corp. has provided the following relating to the most recent month (August 31, 2020) of operations, for their main product, cupcakes

Baker's salaries	20,000
Finished goods inventory, beginning	18,000
Finished goods inventory, ending	20,000
General & administrative expenses	20,000
Indirect materials	17,500
Production Supervisor, Salary	21,000
Purchases of raw materials	28,000
Raw materials inventory, ending	19,000
Raw materials inventory, beginning	18,000
Rent on production factory	19,000
Rent, retail store	18,000
Sales	243,000
Utilities on production factory	17,500
Utilities, retail store	17,000
Wages, retail staff	20,000
WIP inventory, beginning	19,500
WIP inventory, ending	21,500

TBEXAM.COM

143.1) What was the amount of raw materials used in production?

A) $18,000
B) $27,000
C) $28,000
D) $46,000

143.2) What was the total manufacturing overhead incurred during the period?

A) $40,000
B) $57,500
C) $75,000
D) $92,000

143.3) What was the total manufacturing costs for the period?

A) $47,000
B) $95,000
C) $102,000
D) $ 122,000

($3.155, Rounded off to 2 decimals)

80) B
Option B
($31,000 – $32,000) +($12,000 -$18,000) +($35,000 – $30,000) +$5,000 = $3,000

TBEXAM.COM

81) A
Conversion cost = Direct labour + Manufacturing overhead = $29,000 + $29,300 = $58,300

82) A
Manufacturing overhead = 0.45 × Conversion cost
Direct labour = $57,200

Conversion cost = Direct labour + Manufacturing overhead
Conversion cost = $57,200 + Manufacturing overhead
Conversion cost = $57,200 + (0.45 × Conversion cost)
0.55 × Conversion cost = $57,200
Conversion cost = $57,200 ÷ 0.55 = $104,000
Manufacturing overhead = 0.45 × Conversion cost
Manufacturing overhead = 0.45 × $104,000 = $46,800

83) D

TBEXAM.COM – THE WORLD'S LARGEST TEST BANK AND SOLUTIONS DATABASE WITH UNBEATABLE RATES
Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

TBEXAM.COM

Direct labour cost = $13,055
Direct labour cost = 0.35 × Prime cost
Total manufacturing cost = $79,700

Direct labour cost = 0.35 × Prime cost
Prime cost = Direct labour cost ÷ 0.35
Prime cost = $13,055 ÷ 0.35 = $37,300

Total manufacturing cost = Prime cost + Manufacturing overhead cost
$79,700 = $37,300 + Manufacturing overhead cost
Manufacturing overhead cost = $42,400

84) B
Direct labour = 0.30 × Conversion cost
Manufacturing overhead = $116,200

Conversion cost = Direct labour + Manufacturing overhead
Conversion cost = Direct labour + $116,200
Conversion cost = (0.30 × Conversion cost) + $116,200
0.70 × Conversion cost = $116,200
Conversion cost = $116,200 ÷ 0.70
Conversion cost = $166,000
Direct labour = 0.30 × Conversion cost = 0.30 × $166,000 = $49,800

TBEXAM.COM

TBEXAM.COM

85) C
Prime cost = Direct materials + Direct labour
= $41,000 + $29,900 = $70,900

86) C

Total variable manufacturing overhead cost ($1.70 per unit × 7,000 units)	$11,900
Total fixed manufacturing overhead cost ($2.90 per unit × 9,400 units*)	27,260
Total manufacturing overhead cost	$39,160

*The average fixed manufacturing overhead cost per unit was determined by dividing the total fixed manufacturing overhead cost by 9,400 units.

87) D

TBEXAM.COM – THE WORLD'S LARGEST TEST BANK AND SOLUTIONS DATABASE WITH UNBEATABLE RATES
Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

Introduction to Managerial Accounting Edition 7 by Brewer

Annual insurance expense = $5,040 ÷ 3 = $1,680
Portion applicable to product cost = 0.70 × $1,680 = $1,176
Portion applicable to period cost = 0.30 × $1,680 = $504

88) C
Variable cost per machine-hour = $765,310 ÷ 9,100 machine-hours = $84.10 per machine-hour
Fixed cost per machine-hour at 9,700 machine-hours = $224,070 ÷ 9,700 machine-hours = $23.10 per machine-hour

Total cost = Variable cost + Fixed cost
= $84.10 per machine-hour + $23.10 per machine-hour
= $107.20 per machine-hour

89) D

Fixed manufacturing overhead per unit	$ 3.50
Number of units produced*	5,200
Total fixed manufacturing overhead cost	$ 18,200

*The average fixed manufacturing overhead cost per unit was determined by dividing the total fixed manufacturing overhead cost by 5,200 units.

Variable cost per unit sold	$ 13.45
Variable cost per unit sold (a)	$ 13.45
Number of units sold (b)	4,000
Total variable costs (a) × (b)	$ 53,800

105) A

Total variable manufacturing overhead cost ($1.45 per unit × 7,000 units)	$ 10,150
Total fixed manufacturing overhead cost	25,900
Total manufacturing overhead cost	$ 36,050

TBEXAM.COM

106) A

Sales commissions	$ 1.60
Variable administrative expense	0.50
Variable selling and administrative expense per unit	$ 2.10
Total variable selling and administrative expense ($2.10 per unit × 6,500 units sold)	$ 13,650
Total fixed selling and administrative expense	3,000
Total period (nonmanufacturing) cost	$ 16,650

107) B

Direct materials	$ 5.00
Direct labour	3.40
Variable manufacturing overhead	1.70
Sales commissions	1.30
Variable administrative expense	0.45
Variable cost per unit sold	$ 11.85

TBEXAM.COM

TBEXAM.COM – THE WORLD'S LARGEST TEST BANK AND SOLUTIONS DATABASE WITH UNBEATABLE RATES
Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

Introduction to Managerial Accounting Edition 7 by Brewer

108) C

Direct materials	$ 4.80
Direct labour	3.80
Variable manufacturing overhead	1.50
Sales commissions	1.80
Variable administrative expense	0.60
Variable cost per unit sold	$ 12.50
Variable cost per unit sold (a)	$ 12.50
Number of units sold (b)	4,000
Total variable costs (a) × (b)	$ 50,000

109) C

Sales commission per unit = Total sales commissions ÷ Unit sales = $646,800 ÷ 38,500 = $16.80

Total sales commission = Sales commission per unit × Unit sales = $16.80 × 36,000 = $604,800

110) A

Sales commission per unit = Total sales commissions ÷ Unit sales = $741,200 ÷ 34,000 = $21.80

The average sales commission per unit is constant within the relevant range.

TBEXAM.COM

111) D

Average fixed inspection cost = Total fixed inspection cost ÷ Total activity

= $166,530 ÷ 7,000 machine-hours

= $23.79 per machine-hour

112) C

TBEXAM.COM

TBEXAM.COM – THE WORLD'S LARGEST TEST BANK AND SOLUTIONS DATABASE WITH UNBEATABLE RATES
Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

Introduction to Managerial Accounting Edition 7 by Brewer

Unit sales = $980,000 ÷ $70 per book = 14,000 books

Selling expenses = Fixed selling expenses + ($4 per book × 14,000 books)
$110,000 = Fixed selling expenses + $56,000
Fixed selling expenses = $110,000 − $56,000 = $54,000

Administrative expenses = Fixed administrative expenses + (0.03 × $980,000)
$124,000 = Fixed administrative expenses + $29,400
Fixed administrative expenses = $124,000 − $29,400 = $94,600

Variable administrative expense per unit = 0.03 × $70 per book = $2.10 per book

Y = ($54,000 + $94,600) + ($4 + $2.10) X
Y = $148,600 + $6.10X

113) A
Sunk cost = Cost of old machine = $455,000

114) A
Differential cost = $524,000 − $438,000 = $86,000

TBEXAM.COM

115) D
Opportunity cost = Return from alternative investment = $458,000

116) B

Sales	$ 467,000
Cost of goods sold	173,200
Gross margin	$ 293,800

TBEXAM.COM

We suggest you allow either answers (a blank or an X) in this cell. Some experts would consider an opportunity cost to be a differential cost and others would not. It is all a matter of definition and the definitions given in the text do not really cover this contingency.

121) Short Answer
Cost of goods sold = 39,000 - 11,700 = 27,300.
Direct materials used = 1,000 + 11,000 - 3,000 = 9,000.
Cost of goods manufactured = 9,000 + 5,000 + (2,000 + 4,000 + 3,000 + 7,000) +800 - 3,000 = 27,800.
Finished goods inventory, ending = 5,000 + 27,800 - 27,300 = 5,500.

122) Short Answer

TBEXAM.COM - THE WORLD'S LARGEST TEST BANK AND SOLUTIONS DATABASE WITH UNBEATABLE RATES
Introduction to Managerial Accounting (Canadian) 7th edition Brewer Test Bank

TBEXAM.COM

Direct materials used = 6,000 + 7,000 - 1,000 = 12,000.
Cost of goods manufactured = 12,000 + 5,000 + (600 + 500 + 1,900 + 3,500)
+800 - 3,000 = 21,300.
Cost of goods sold = 4,000 + 21,300 - 5,300 = 20,000.
Gross margin = 31,800 - 20,000 = 11,800
