Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

SKU: 9781284122039-TEST-BANK

Name:_____ Class:_____ Date:_____

Chapter 02 Test

Indicate the answer choice that best completes the statement or answers the question.

1. Since 1981, the VIN has been made up of ____ characters.
   a. 11
   b. 13
   c. 15
   d. 17

2. VIN stands for _____.
   a. Vehicle information number
   b. Vehicle ignition number
   c. Vehicle identification number
   d. None of the above

3. Technician A says vehicle information numbers (VINs) are unique identifiers for each vehicle produced. Technician B says VINs are made up of 19 characters and are usually located on the engine. Who is correct?
   a. Technician A
   b. Technician B
   c. Both A and B
   d. Neither A nor B

4. In a North American VIN, the _____ character is the country of origin.
   a. First
   b. Second
   c. Third
   d. Fourth

5. The _____ character tells you the assembly plant or factory where the vehicle was put together.
   a. 10th
   b. 11th
   c. 12th
   d. 13th

6. Where might you find a VIN?
   a. Engine
   b. Left front corner of the windshield
   c. Trunk
   d. All of the above

7. Automotive service manuals come in two types: _____ and _____.
   a. After-market; shop
   b. Shop; factory

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

Chapter 02 Test

c. Factory; after-market
d. Paper; electronic

8. Manufacturers offer information online through _____ subscriptions.
a. Daily
b. Monthly
c. Yearly
d. All of the above

9. Shop manuals are organized according to _____ and have indexes for quick referencing.
a. VINs
b. Engine parts
c. Vehicle systems
d. None of the above

10. Technician A says that to use a service information program, you may be required to log in to the computer and the service information program. Technician B says make sure you have the username and login available before you start. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

11. Technician A says computer databases are used to input and retrieve customer information for billing, warranty work, and other information. Technician B says that dealerships have access to manufacturer databases for the purpose of accessing warranty information. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

12. Technician A says that computer databases provide information on procedures, parts, and service problems. Technician B says usernames and passwords may be required to log into the computer and the service information program. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

Indicate whether the statement is true or false.

13. The final six numbers make up the sequential number of the vehicle as it comes off the assembly line.
a. True

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

b. False

Indicate the answer choice that best completes the statement or answers the question.

14. The VIN contains all of the following information, EXCEPT:
a. tire size.
b. engine type.
c. seat restraints.
d. assembly plant.

15. The information found in shop manuals provides a systematic procedure and identifies _____, safety precautions, and specifications relevant to the task.
a. SDS
b. Computer databases
c. VINs
d. Special tools

16. At the time of vehicle _____, manufacturers prepare service and technical information and attempt to anticipate the information the technicians need to perform service and repairs.
a. Service
b. Invoicing
c. Repair
d. Production

17. Technician A says manufacturers provide technical service bulletins (TSBs) as updates to shop manuals when new problems or maintenance concerns arise for certain vehicle makes or models. Technician B says a TSB can be issued for an updated part or a change in the service procedure on a certain make of vehicle. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

18. Technician A says manufacturers provide technical service bulletins (TSBs) to technicians on unexpected problems, updated parts, or changes to repair procedures for certain vehicle makes or models. Technician B says that if a safety issue is discovered on a certain make of vehicle, the manufacturer may issue a service campaign or recall. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

19. All of the following are TSB guidelines EXCEPT:

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

Chapter 02 Test

a. Technicians must be able to locate where the TSBs are kept in your shop or look them up in the electronic service information system.
b. Prior to performing repairs, technicians must look through the TSBs and get to know the type of information contained in them.
c. After working on a vehicle, it is good practice to check whether a TSB has been issued for that vehicle and type of fault or repair.
d. Perform repairs to the vehicle following the TSB where appropriate while also referring to the shop manual.

20. Usually, all costs associated with the recall are paid for by the:
a. owner.
b. seller.
c. manufacturer.
d. dealer.

21. Technician A says that service information programs are extremely helpful, as the technician can use a laptop at the vehicle for quick access to repair procedures. Technician B says that a fault from the factory within the airbag system would likely trigger a recall. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

22. A critical change in the procedure that bleeds air from the cooling system is needed to resolve overheating concerns. Technician A states that in this situation, the manufacturer would issue a service bulletin explaining the problem. Technician B states that this can be done by the shop itself. Who is correct?
a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

23. A technical service bulletin may provide information on all of the following *except*:
a. unexpected problems.
b. updated parts.
c. changes to repair procedures.
d. the scheduled maintenance chart.

24. Which of the following is an example of a mandatory recall?
a. A vehicle's radio malfunctioning
b. A vehicle's airbag not deploying
c. A vehicle's dashboard prematurely fading
d. None of the answers listed

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

Chapter 02 Test

25. There is a fault within the airbag system of a vehicle that results in the airbag not deploying or deploying when it should not. In this case, the manufacturer would need to do all of the following EXCEPT:

a. identify the problem.
b. identify the cause.
c. note the vehicles that are affected.
d. calculate the cost and decide on a recall.

26. To identify the correct part, the technician will need to know _____.

a. Where on the vehicle the part is installed
b. What system or subsystem it comes from
c. Vehicle identification information
d. All of the above

27. Technician A says that aftermarket transmission manuals can save a technician valuable time when servicing a transmission. Technician B says that it is recommended a technician start a binder for each transmission model to collect valuable service information, service bulletins, and articles. Who is correct?

a. Technician A
b. Technician B
c. Both technicians
d. Neither technician

28. Which of the following are available to supplement the manufacturer's service information to repair automatic transmission repairs?

a. Technician's personal library of binders
b. ATSG repair manuals
c. ATRA online database
d. All of the above

29. Which of the following publish manuals on the repair of automatic transmissions?

a. ATRA
b. ATSG
c. ASE
d. Both A and B

30. Manuals from the Automatic Transmission Service Group are written for a specific transmission.

a. True
b. False

31. Technician A says that ATSG manuals cover the operation, diagnosis, and repair of a specific transmission. Technician B says that these manuals also include a "known problem" section with procedures to correct those problems. Who is correct?

a. Technician A
b. Technician B
c. Both technicians

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

d. Neither technician

32. An ATSG manual is available in print or download.
a. True
b. False

33. Technician A says that the ATSG provides online and in-person training. Technician B says that ATRA provides inline and in-person training. Who is correct?
a. Technician A
b. Technician B
c. Both technicians
d. Neither technician

34. ATGS manuals can help a technician identify all of the thrust bearings and valve springs by providing scaled down images.
a. True
b. False

35. An online database such as ATRA can include which of the following information?
a. Known problems and repairs
b. Service bulletins
c. Transmission tips and tricks
d. All of the above

36. Which of the following is needed to look up the correct repair parts for a vehicle?
a. Vehicle year, make, and model
b. Engine size and code
c. VIN
d. All of the choices listed

37. Technician A says that an experienced technician can complete a repair task more quickly than the labor guide specifies. Technician B says that the labor time guide indicates the time taken by an average technician to complete a task. Who is correct?
a. Technician A
b. Technician B
c. Both technicians A and B
d. Neither technician A nor B

38. The length of time for service or repair work is usually listed in tenths of an hour; 0.6 tenths of an hour would be how many minutes?
a. 6 minutes
b. 36 minutes
c. 18 minutes
d. 42 minutes

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank

Chapter 02 Test

39. Technician A states that flat rate servicing costs are usually derived from a labor guide. Technician B states that labor guides list how much time will be involved in performing a standard repair. Who is correct?

a. Technician A
b. Technician B
c. Both A and B
d. Neither A nor B

40. _____ is extra time needed to deal with situations that occur on a relatively common basis, such as vehicle-installed options that are not common to all vehicles, like wheel locks.

a. Warranty time
b. Total time
c. Additional time
d. Combination time

Automotive Automatic Transmission and Transaxles 1st edition Santini Test Bank
