Chapter 2

Classroom Activity 2-1

Divide into small groups and give each group a copy of the same case study. Assign a different nursing theory to each group and ask the groups to develop a plan of care using the assigned nursing theory as the basis for practice. Each group should share its plan of care with the class. Discuss the differences and similarities in the foci of care based on each of the selected theories.

Classroom Activity 2-2

Think about the metaparadigm concepts of nursing. Draw each of the concepts in relation to the other concepts to show your ideas of how each concept interfaces with the others. Present your "conceptual model" to the class and discuss your ideas about each of the concepts represented. This activity works best if you use colored pencils, crayons, or markers and a large piece of paper or newsprint. Actual student examples are presented in **Figures 2-22** and **2-23**.
