4. Which doctorate in nursing focuses on research?
A) DNS
B) DNP
C) PhD
D) MD
Ans: C
Complexity: Easy
Ahead: Doctor of Nursing Practice
Subject: Chapter 2
Title: Historical Perspectives: The Art and Science of Nurse Practitionering and Advanced Practice Nursing

5. Which author formulated the 10 Carative Processes nursing philosophy?
A) King
B) Peplau
C) Swanson
D) Watson
Ans: D
Complexity: Easy
Ahead: Nurse Practitioners' Approach to Patient Care
Subject: Chapter 2
Title: Historical Perspectives: The Art and Science of Nurse Practitionering and Advanced Practice Nursing

6. The ability to relate to a patient's thoughts and feelings and develop an understanding of what the patient is experiencing is known as:
A) empathy.
B) active listening.
C) coaching.
D) negotiating.
Ans: A
Complexity: Moderate
Ahead: Nurse Practitioners' Unique Role
Subject: Chapter 2
Title: Historical Perspectives: The Art and Science of Nurse Practitionering and Advanced Practice Nursing

Essay

1. The term *advanced practice registered nursing (APRN)* encompasses which roles?
Ans: The term *APRN* has been used to indicate master's- or doctorally prepared nurses who provide direct clinical care. APRN roles include nurse practitioner (NP), certified nurse-midwife (CNM), certified registered nurse anesthetist (CRNA), and clinical nurse specialist (CNS).
Complexity: Moderate
Ahead: Nurse Practitioner Education and Title Clarification
Subject: Chapter 2

2. Describe the components of the DNP Scholarly Project as designated by the American Association of Colleges of Nursing (AACN).
Ans: As per the AACN whitepaper, *The Doctor of Nurse Practice: Current Issues and Clarifying Recommendations* (2015), the DNP Scholarly Project must meet the following criteria: (a) focus on a change that impacts healthcare outcomes either through direct or indirect care; (b) have a systems (micro-, meso-, or macro-level) or population/aggregate focus; (c) demonstrate implementation in the appropriate arena or area of practice; (d) include a plan for sustainability (e.g., financial, systems, or political realities, not only theoretical abstractions); (e) include an evaluation of processes and/or outcomes (formative or summative); (f) be designed so that processes and/or outcomes will be evaluated to guide practice and policy; and (g) provide a foundation for future practice scholarship.
Complexity: Difficult
Ahead: Doctor of Nursing Practice
Subject: Chapter 2
Title: Historical Perspectives: The Art and Science of Nurse Practitionering and Advanced Practice Nursing

3. Explain the relevance of nursing philosophies, theories, and models to the nurse practitioner's (NP's) delivery of patient care.
Ans: Nursing philosophies, theories, and models serve as the foundation for delivery of patient care by the NP. Concepts described in nursing philosophies, theories, and models form the basis for excellence in nursing practice. Many approaches focus on the need for the healthcare provider to be open to patients' needs, to hear what they have to say, to understand what they really believe is wrong or right, and to let them work with the NP to develop goals. The ability of the NP to be culturally sensitive, and to be flexible and willing to collaborate and compromise when needed and appropriate, will help to form the framework for a successful patient–NP relationship, and most important, will assist patients in reaching a state of optimum health.
