6. The income statement shows the difference between a firm's income and its costs– i.e., its profits– during a specified period of time. However, not all reported income comes in the form or cash, and reported costs likewise may not correctly reflect cash outlays. Therefore, there may be a substantial difference between a firm's reported profits and its actual cash flow for the same period.

a. True

Multiple Choice

21. Which of the following statements is CORRECT?

a. The statement of cash needs tells us how much cash the firm will require during some future period, generally a month or a year.
b. The four most important financial statements provided in the annual report are the balance sheet, income

Financial Management Theory and Practice 15th edition Brigham Test Bank

statement, cash budget, and the statement of stockholders' equity.

c. The balance sheet gives us a picture of the firm's financial position at a point in time.

d. The income statement gives us a picture of the firm's financial position at a point in time.

e. The statement of cash flows tells us how much cash the firm has in the form of currency and demand deposits.

*ANSWER:* c

26. Below are the year-end balance sheets for Wolken Enterprises:

| Assets: | 2015 | 2014 |
|---|---|---|
| Cash | $ 200,000 | $ 170,000 |
| Accounts receivable | 864,000 | 700,000 |
| Inventories | 2,000,000 | 1,400,000 |
| Total current assets | $3,064,000 | $2,270,000 |
| Net fixed assets | 6,000,000 | 5,600,000 |
| Total assets | $9,064,000 | $7,870,000 |
| | | |
| Liabilities and equity: | | |
| Accounts payable | $1,400,000 | $1,090,000 |
| Notes payable | 1,600,000 | 1,800,000 |
| Total current liabilities | $3,000,000 | $2,890,000 |
| Long-term debt | 2,400,000 | 2,400,000 |
| Common stock | 3,000,000 | 2,000,000 |
| Retained earnings | 664,000 | 580,000 |
| Total common equity | $3,664,000 | $2,580,000 |
| Total liabilities and equity | $9,064,000 | $7,870,000 |

Wolken has never paid a dividend on its common stock, and it issued $2,400,000 of 10-year non-callable, long-term debt in 2014. As of the end of 2015, none of the principal on this debt had been repaid. Assume that the company's sales in 2014 and 2015 were the same. Which of the following statements must be CORRECT?

a. Wolken increased its short-term bank debt in 2015.
b. Wolken issued long-term debt in 2015.
c. Wolken issued new common stock in 2015.
d. Wolken repurchased some common stock in 2015.
e. Wolken had negative net income in 2015.

*ANSWER:* c

33. Companies generate income from their "regular" operations and from other sources like interest earned on the securities they hold, which is called non-operating income. Lindley Textiles recently reported $12,500 of sales, $7,250 of operating costs other than depreciation, and $1,000 of depreciation. The company had no amortization charges and no non-operating income. It had $8,000 of bonds outstanding that carry a 7.5% interest rate, and its federal-plus-state income tax rate was 40%. How much was Lindley's operating income, or EBIT?

a. $3,462
b. $3,644
c. $3,836
d. $4,038
e. $4,250

*ANSWER:* e
*RATIONALE:*

| | |
|---|---|
| Sales | $12,500 |
| Operating costs excluding depr'n | $7,250 |
| Depreciation | $1,000 |
| Operating income (EBIT) | **$4,250** |

35. Meric Mining Inc. recently reported $15,000 of sales, $7,500 of operating costs other than depreciation, and $1,200 of depreciation. The company had no amortization charges, it had outstanding $6,500 of bonds that carry a 6.25% interest rate, and its federal-plus-state income tax rate was 35%. How much was the firm's net income after taxes? Meric uses the same depreciation expense for tax and stockholder reporting purposes.

a. $3,284.55
b. $3,457.42
c. $3,639.39
d. $3,830.94
e. $4,022.48

*ANSWER:* d

*RATIONALE:*

| | |
|---|---|
| Bonds | $6,500 |
| Interest rate | 6.25% |
| Tax rate | 35% |
| Sales | $ 15,000 |
| Operating costs excluding depr'n | $ 7,500 |
| Depreciation | $ 1,200 |
| Operating income (EBIT) | $6,300.00 |
| Interest charges | −$ 406.25 |

36. Last year Tiemann Technologies reported $10,500 of sales, $6,250 of operating costs other than depreciation, and $1,300 of depreciation. The company had no amortization charges, it had $5,000 of bonds that carry a 6.5% interest rate, and its federal-plus-state income tax rate was 35%. This year's data are expected to remain unchanged except for one item, depreciation, which is expected to increase by $750. By how much will net after-tax income change as a result of the change in depreciation? The company uses the same depreciation calculations for tax and stockholder reporting purposes.

a. −463.13
b. −487.50
c. −511.88
d. −537.47
e. −564.34

*ANSWER:* b

*RATIONALE:* This problem can be worked very easily– just multiply the increase in depreciation by (1 − T) to get the decrease in net income:

| | |
|---|---|
| Change in depreciation | $750 |
| Tax rate | 35% |
| Reduction in net income | −**$487.50** |

We can also get the answer a longer way, which explains things more clearly:

| Item | Old | New | Change |
|---|---|---|---|
| Bonds | $ 5,000.00 | $ 5,000.00 | $ 0.00 |
| Interest rate | 6.5% | 6.5% | 0.0% |
| Tax rate | 35% | 35% | 0% |
| Sales | $10,500.00 | $10,500.00 | $ 0.00 |
| Operating costs excluding depr'n | $ 6,250.00 | $ 6,250.00 | $ 0.00 |
| Depreciation | $ 1,300.00 | $ 2,050.00 | $750.00 |
| Operating income (EBIT) | $ 2,950.00 | $ 2,200.00 | −$750.00 |
| Interest charges | $ 325.00 | $ 325.00 | $0.00 |
| Taxable income | $ 2,625.00 | $ 1,875.00 | −$750.00 |
| Taxes | $ 918.75 | $ 656.25 | −$262.50 |
| Net income | $ 1,706.25 | $ 1,218.75 | −**$487.50** |

37. For managerial purposes, i.e., making decisions regarding the firm's operations, the standard financial statements as prepared by accountants under Generally Accepted Accounting Principles (GAAP) are often modified and used to create alternative data and metrics that provide a somewhat different picture of a firm's operations. Related to these modifications, which of the following statements is CORRECT?

a. The standard statements make adjustments to reflect the effects of inflation on asset values, and these adjustments are normally carried into any adjustment that managers make to the standard statements.
b. The standard statements focus on accounting income for the entire corporation, not cash flows, and the two can be quite different during any given accounting period. However, for valuation purposes we need to discount cash flows, not accounting income. Moreover, since many firms have a number of separate divisions, and since division managers should be compensated on their divisions' performance, not that of the entire firm, information that focuses on the divisions is needed. These factors have led to the development of information that is focused on cash flows and the operations of individual units.
c. The standard statements provide useful information on the firm's individual operating units, but management needs more information on the firm's overall operations than the standard statements provide.
d. The standard statements focus on cash flows, but managers are less concerned with cash flows than with accounting income as defined by GAAP.
e. The best feature of standard statements is that, if they are prepared under GAAP, the data are always consistent from firm to firm. Thus, under GAAP, there is no room for accountants to "adjust" the results to make earnings look better.

*ANSWER:* b

38. Which of the following statements is CORRECT?

a. Net cash flow (NCF) is defined as follows:
NCF = Net income - Depreciation and Amortization.

b. Changes in working capital have no effect on free cash flow.

c. Free cash flow (FCF) is defined as follows:
FCF = EBIT(1 − T)
+ Depreciation and Amortization
− Capital expenditures required to sustain operations
− Required changes in net operating working capital.

d. Free cash flow (FCF) is defined as follows:
FCF = EBIT(1 − T)+ Depreciation and Amortization + Capital expenditures.

e. Net cash flow is the same as free cash flow (FCF).

39. Danielle's Sushi Shop last year had (1) a negative net cash flow from operations, (2) a negative free cash flow, and (3) an increase in cash as reported on its balance sheet. Which of the following factors could explain this situation?

a. The company had a sharp increase in its depreciation and amortization expenses.

b. The company had a sharp increase in its inventories.

c. The company had a sharp increase in its accrued liabilities.

d. The company sold a new issue of common stock.

e. The company made a large capital investment early in the year.

Financial Management Theory and Practice 15th edition Brigham Test Bank

*ANSWER:* d

40. Swinnerton Clothing Company's balance sheet showed total current assets of $2,250, all of which were required in operations. Its current liabilities consisted of $575 of accounts payable, $300 of 6% short-term notes payable to the bank, and $145 of accrued wages and taxes. What was its net operating working capital that was financed by investors?

a. $1,454
b. $1,530
c. $1,607
d. $1,687
e. $1,771

*ANSWER:* b
*RATIONALE:*

| | |
|---|---|
| Current assets | $2,250 |
| Accounts payable | $575 |
| Accrued wages and taxes | $145 |
| Net operating working capital | **$1,530** |

Note that NOWC represents the current assets required in operations that are financed by investors, given that payables and accruals are generated spontaneously by operations and are thus "free."

41. NNR Inc.'s balance sheet showed total current assets of $1,875,000 plus $4,225,000 of net fixed assets. All of these assets were required in operations. The firm's current liabilities consisted of $475,000 of accounts payable, $375,000 of 6% short-term notes payable to the bank, and $150,000 of accrued wages and taxes. Its remaining capital consisted of long-term debt and common equity. What was NNR's total investor-provided operating capital?

a. $4,694,128
b. $4,941,188
c. $5,201,250
d. $5,475,000
e. $5,748,750

*ANSWER:* d

*RATIONALE:*

| | | |
|---|---|---|
| Current assets | | $1,875,000 |
| Net fixed assets | | $4,225,000 |
| Total assets (all are operating assets) | | $6,100,000 |
| Spontaneous "free" capital: | Acc'ts payable | $475,000 |
| | Accruals | $150,000 |
| Total investor-provided operating capital | | **$5,475,000** |

Note that the total operating capital is the amount of the capital, or assets, that are required in operations and that must be financed by investors, given that payables and accruals are generated spontaneously by operations and do not have to be financed by investors.

42. TSW Inc. had the following data for last year: Net income = $800; Net operating profit after taxes (NOPAT) = $700; Total assets = $3,000; and Total operating capital = $2,000. Information for the just-completed year is as follows: Net income = $1,000; Net operating profit after taxes (NOPAT) = $925; Total assets = $2,600; and Total operating capital = $2,500. How much free cash flow did the firm generate during the just-completed year?

a. $383
b. $425
c. $468
d. $514
e. $566

*ANSWER:* b

*RATIONALE:*

| | Prior Year | Current Year |
|---|---|---|
| NOPAT = EBIT(1 − T) | $700 | $925 |
| Total operating capital | $2,000 | $2,500 |

FCF this year = NOPAT − Net investment in new operating capital FCF this year = $925 − $500 FCF this year = **$425**

Financial Management Theory and Practice 15th edition Brigham Test Bank

48. Wells Water Systems recently reported $8,250 of sales, $4,500 of operating costs other than depreciation, and $950 of depreciation. The company had no amortization charges, it had $3,250 of outstanding bonds that carry a 6.75% interest rate, and its federal-plus-state income tax rate was 35%. In order to sustain its operations and thus generate sales and cash flows in the future, the firm was required to spend $750 to buy new fixed assets and to invest $250 in net operating working capital. How much free cash flow did Wells generate?

a. $1,770.00
b. $1,858.50
c. $1,951.43
d. $2,049.00
e. $2,151.45

*ANSWER:* a

*RATIONALE:*

| | |
|---|---|
| Bonds | $3,250.00 |
| Interest rate | 6.75% |
| Tax rate | 35% |
| Required addition to net operating working capital | $250.00 |
| Required capital expenditures (fixed assets) | $750.00 |
| Sales | $8,250.00 |
| Operating costs excluding depr'n | $4,500.00 |
| Depreciation | $950.00 |
| Operating income (EBIT) | $2,800.00 |

FCF = EBIT(1 − T) + Depr'n − Cap Ex − ΔNet Op WC FCF = $1,820 + $950 − $750 − $250
FCF = **$1,770.00**

*POINTS:* 1
*DIFFICULTY:* Difficulty: Moderate

49. Last year, Michelson Manufacturing reported $10,250 of sales, $3,500 of operating costs other than depreciation, and $1,250 of depreciation. The company had no amortization charges, it had $3,500 of bonds outstanding that carry a 6.5% interest rate, and its federal-plus-state income tax rate was 35%. This year's data are expected to remain unchanged except for one item, depreciation, which is expected to increase by $725. By how much will the depreciation change cause the

Financial Management Theory and Practice 15th edition Brigham Test Bank

firm's net after-tax income and its net cash flow to change? Note that the company uses the same depreciation calculations for tax and stockholder reporting purposes.

a. −$383.84; $206.68
b. −$404.04; $217.56
c. −$425.30; $229.01
d. −$447.69; $241.06
e. −$471.25; $253.75

*ANSWER:* e

*RATIONALE:* This problem can be worked very easily– just multiply the increase in depreciation by (1 − T) to get the decrease in net income, and then add to the change in income the change in depreciation to get the change in net cash flow:

| | |
|---|---|
| Change in depreciation | $725 |
| Tax rate | 35.00% |
| Reduction in net income = Change in Depr'n (1 − Tax rate) | −**$471.25** |
| Increase in net cash flow = Change in Depr'n − reduction in NI | **$253.75** |

We can also get the answer the long way, which explains things in more detail:

| | Old | New | Change |
|---|---|---|---|
| Bonds | $3,500 | $3,500 | $0.00 |
| Interest rate | 6.50% | 6.50% | $0.00 |
| Tax rate | 35% | 35% | $0.00 |
| Sales | $10,250 | $10,250 | $0.00 |
| Operating costs excluding depr'n | $3,500 | $3,500 | $0.00 |
| Depreciation | $1,250 | $1,975 | $725.00 |
| Operating income (EBIT) | $5,500 | $4,775 | −$725.00 |
| Interest charges | $228 | $228 | $0.00 |
| Taxable income | $5,273 | $4,548 | −$725.00 |
| Taxes | $1,845 | $1,592 | −$253.75 |
| Net income after taxes | $3,427 | $2,956 | −**$471.25** |
| Net cash flow | $4,677 | $4,931 | **$253.75** |
| Check on NCF: ΔNCF = change in depreciation × tax rate | | | **$253.75** |

We like this problem because it illustrates that an increase in depreciation will decrease the firm's net income yet increase its net cash flow, and cash is king.

50. Bartling Energy Systems recently reported $9,250 of sales, $5,750 of operating costs other than depreciation, and $700 of depreciation. The company had no amortization charges, it had $3,200 of outstanding bonds that carry a 5% interest rate, and its federal-plus-state income tax rate was 35%. In order to sustain its operations and thus generate sales and cash flows in the future, the firm was required to make $1,250 of capital expenditures on new fixed assets and to invest $300 in net operating working capital. By how much did the firm's net income exceed its free cash flow?

a. $673.27
b. $708.70
c. $746.00
d. $783.30
e. $822.47

*ANSWER:* c

*RATIONALE:*

| | |
|---|---|
| Bonds | $3,200.00 |
| Interest rate | 5.00% |
| Tax rate | 35.00% |
| Required capital expenditures (fixed assets) | $1,250.00 |
| Required addition to net operating working capital | $300.00 |
| Sales | $9,250.00 |
| Operating costs excluding depr'n | $5,750.00 |
| Depreciation | $700.00 |
| Operating income (EBIT) | $2,800.00 |
| Interest charges | $160.00 |
| Taxable income (EBT) | $2,640.00 |
| Taxes | $924.00 |
| Net income after taxes | $1,716.00 |

FCF = BIT(1 − T) + Depr'n − Cap Ex − ΔNet Op WC
FCF = $1,820 + $700 − $1,250 − $300
FCF = $970.00

Difference between net income and FCF = **$746.00**

51. Which of the following statements is CORRECT?
    a. The maximum federal tax rate on personal income in 2014 was 50%.
    b. Since companies can deduct dividends paid but not interest paid, our tax system favors the use of equity financing over debt financing, and this causes companies' debt ratios to be lower than they would be if interest and dividends were both deductible.
    c. Interest paid to an individual is counted as income for tax purposes and taxed at the individual's regular tax rate, which in 2014 could go up to 35%, but dividends received were taxed at a maximum rate of 15%.
    d. The maximum federal tax rate on corporate income in 2014 was 50%.
    e. Corporations obtain capital for use in their operations by borrowing and by raising equity capital, either by selling new common stock or by retaining earnings. The cost of debt capital is the interest paid on the debt, and the cost of the equity is the dividends paid on the stock. Both of these costs are deductible from income when calculating income for tax purposes.

52. Which of the following statements is CORRECT?
    a. All corporations other than non-profit corporations are subject to corporate income taxes, which are 15% for the lowest amounts of income and 35% for the highest amounts of income.
    b. The income of certain small corporations that qualify under the Tax Code is completely exempt from

Financial Management Theory and Practice 15th edition Brigham Test Bank

corporate income taxes. Thus, the federal government receives no tax revenue from these businesses.

c. All businesses, regardless of their legal form of organization, are taxed under the Business Tax Provisions of the Internal Revenue Code.

d. Small businesses that qualify under the Tax Code can elect not to pay corporate taxes, but then their owners must report their pro rata shares of the firm's income as personal income and pay taxes on that income.

e. Congress recently changed the tax laws to make dividend income received by individuals exempt from income taxes. Prior to the enactment of that law, corporate income was subject to double taxation, where the firm was first taxed on the income and stockholders were taxed again on the income when it was paid to them as dividends.

53. Assume that Congress recently passed a provision that will enable Barton's Rare Books (BRB) to double its depreciation expense for the upcoming year but will have no effect on its sales revenue or tax rate. Prior to the new provision, BRB's net income after taxes was forecasted to be $4 million. Which of the following best describes the impact of the new provision on BRB's financial statements versus the statements without the provision? Assume that the company uses the same depreciation method for tax and stockholder reporting purposes.

a. Net fixed assets on the balance sheet will decrease.

b. The provision will reduce the company's net cash flow.

c. The provision will increase the company's tax payments.

d. Net fixed assets on the balance sheet will increase.

e. The provision will increase the company's net income.

54. The LeMond Corporation just purchased a new production line. Assume that the firm planned to depreciate the equipment over 5 years on a straight-line basis, but Congress then passed a provision that requires the company to depreciate the equipment on a straight-line basis over 7 years. Other things held constant, which of the following will occur as a result of this Congressional action? Assume that the company uses the same depreciation method for tax and stockholder reporting purposes.

a. LeMond's tax liability for the year will be lower.
b. LeMond's taxable income will be lower.
c. LeMond's net fixed assets as shown on the balance sheet will be higher at the end of the year.
d. LeMond's cash position will improve (increase).
e. LeMond's reported net income after taxes for the year will be lower.

55. DeYoung Devices Inc., a new high-tech instrumentation firm, is building and equipping a new manufacturing facility. Assume that currently its equipment must be depreciated on a straight-line basis over 10 years, but Congress is considering legislation that would require the firm to depreciate the equipment over 7 years. If the legislation becomes law, which of the following would occur in the year following the change?

a. The firm's reported net income would increase.
b. The firm's operating income (EBIT) would increase.
c. The firm's taxable income would increase.
d. The firm's net cash flow would increase.
e. The firm's tax payments would increase.

57. On 12/31/2015, Heaton Industries Inc. reported retained earnings of $675,000 on its balance sheet, and it reported that it had $172,500 of net income during the year. On its previous balance sheet, at 12/31/2014, the company had reported $555,000 of retained earnings. No shares were repurchased during 2015. How much in dividends did Heaton pay during 2015?

a. $47,381
b. $49,875
c. $52,500
d. $55,125
e. $57,881

*ANSWER:* c
*RATIONALE:*

| | |
|---|---|
| 12/31/2015 RE | $675,000 |
| 12/31/2014 RE | $555,000 |
| Change in RE | $120,000 |
| Net income for 2015 | $172,500 |
| Dividends = net income − change | **$52,500** |

*POINTS:* 1

58. Ullrich Printing Inc. paid out $21,750 of common dividends during the year. It ended the year with $187,500 of retained earnings versus the prior year's retained earnings of $132,250. How much net income did the firm earn during the year?

a. $77,000
b. $80,850
c. $84,893
d. $89,137
e. $93,594

*ANSWER:* a
*RATIONALE:* Net income = The change in retained earnings plus the dividends paid:

| | |
|---|---|
| Current RE | $187,500 |
| Previous RE = Current RE − increment | $132,250 |
| Change in RE | $55,250 |
| Plus dividends paid | $21,750 |
| = Net income | **$77,000** |

59. Which of the following statements is CORRECT?

a. Depreciation and amortization are not cash charges, so neither of them has an effect on a firm's reported profits.

b. The more depreciation a firm reports, the higher its tax bill, other things held constant.

c. People sometimes talk about the firm's net cash flow, which is shown as the lowest entry on the income statement, hence it is often called "the bottom line."

d. Depreciation reduces a firm's cash balance, so an increase in depreciation would normally lead to a reduction in the firm's net cash flow.

e. Net cash flow (NCF) is often defined as follows:
Net Cash Flow = Net Income + Depreciation and Amortization Charges.

*ANSWER:* e

60. Which of the following would be most likely to occur in the year after Congress, in an effort to increase tax revenue, passed legislation that forced companies to depreciate equipment over longer lives? Assume that sales, other operating costs, and tax rates are not affected, and assume that the same depreciation method is used for tax and stockholder reporting purposes.

a. Companies' reported net incomes would decline.

b. Companies' net operating profits after taxes (NOPAT) would decline.

c. Companies' physical stocks of fixed assets would increase.

d. Companies' net cash flows would increase.

e. Companies' cash positions would decline.

65. A security analyst obtained the following information from Prestopino Products' financial statements:

- Retained earnings at the end of 2014 were $700,000, but retained earnings at the end of 2015 had declined to $320,000.
- The company does not pay dividends.
- The company's depreciation expense is its only non-cash expense; it has no amortization charges.
- The company has no non-cash revenues.
- The company's net cash flow (NCF) for 2015 was $150,000.

On the basis of this information, which of the following statements is CORRECT?

a. Prestopino had negative net income in 2015.
b. Prestopino's depreciation expense in 2015 was less than $150,000.
c. Prestopino had positive net income in 2015, but its income was less than its 2014 income.
d. Prestopino's NCF in 2015 must be higher than its NCF in 2014.
e. Prestopino's cash on the balance sheet at the end of 2015 must be lower than the cash it had on the balance sheet at the end of 2014.

68. Which of the following statements is CORRECT?
    a. In the statement of cash flows, a decrease in accounts receivable is reported as a use of cash.
    b. Dividends do not show up in the statement of cash flows because dividends are considered to be a financing activity, not an operating activity.
    c. In the statement of cash flows, a decrease in accounts payable is reported as a use of cash.
    d. In the statement of cash flows, depreciation charges are reported as a use of cash.
    e. In the statement of cash flows, a decrease in inventories is reported as a use of cash.

*ANSWER:* c

69. Lucy's Music Emporium opened its doors on January 1, 2015, and it was granted permission to use the same depreciation calculations for shareholder reporting and income tax purposes. The company planned to depreciate its fixed assets over 20 years, but in December 2015 management realized that the assets would last for only 15 years. The firm's accountants plan to report the 2015 financial statements based on this new information. How would the new depreciation assumption affect the company's financial statements?

a. The firm's net liabilities would increase.
b. The firm's reported net fixed assets would increase.
c. The firm's EBIT would increase.
d. The firm's reported 2015 earnings per share would increase.
e. The firm's cash position in 2015 and 2016 would increase.

*ANSWER:* e

70. Which of the following statements is CORRECT?

a. If a company pays more in dividends than it generates in net income, its retained earnings as reported on the balance sheet will decline from the previous year's balance.
b. Dividends paid reduce the net income that is reported on a company's income statement.
c. If a company uses some of its bank deposits to buy short-term, highly liquid marketable securities, this will cause a decline in its current assets as shown on the balance sheet.
d. If a company issues new long-term bonds during the current year, this will increase its reported current liabilities at the end of the year.
e. Accounts receivable are reported as a current liability on the balance sheet.

71. Which of the following statements is CORRECT?
    a. If a firm reports a loss on its income statement, then the retained earnings account as shown on the balance sheet will be negative.
    b. Since depreciation is a source of funds, the more depreciation a company has, the larger its retained earnings will be, other things held constant.
    c. A firm can show a large amount of retained earnings on its balance sheet yet need to borrow cash to make required payments.
    d. Common equity includes common stock and retained earnings, less accumulated depreciation.
    e. The retained earnings account as shown on the balance sheet shows the amount of cash that is available for paying dividends.

72. Jessie's Bobcat Rentals' operations provided a negative net cash flow last year, yet the cash shown on its balance sheet increased. Which of the following statements could explain the increase in cash, assuming the company's financial statements were prepared under generally accepted accounting principles?

a. The company had high depreciation expenses.
b. The company repurchased some of its common stock.
c. The company dramatically increased its capital expenditures.
d. The company retired a large amount of its long-term debt.
e. The company sold some of its fixed assets.

*ANSWER:* e

73. Which of the following statements is CORRECT?

a. The primary difference between EVA and accounting net income is that when net income is calculated, a deduction is made to account for the cost of common equity, whereas EVA represents net income before deducting the cost of the equity capital the firm uses.
b. MVA gives us an idea about how much value a firm's management has added during the last year.
c. MVA stands for market value added, and it is defined as follows:
MVA = (Shares outstanding)(Stock price) + Book value of common equity.
d. EVA stands for economic value added, and it is defined as follows:
EVA = EBIT(1 − T) − (Investor-supplied op. capital) × (A − T cost of capital).
e. EVA gives us an idea about how much value a firm's management has added over the firm's life.

74. Which of the following statements is CORRECT?
    a. One way to increase EVA is to achieve the same level of operating income but with more investor-supplied capital.
    b. If a firm reports positive net income, its EVA must also be positive.
    c. One drawback of EVA as a performance measure is that it mistakenly assumes that equity capital is free.
    d. One way to increase EVA is to generate the same level of operating income but with less investor-supplied capital.
    e. Actions that increase reported net income will always increase net cash flow.

Financial Management Theory and Practice 15th edition Brigham Test Bank

75. Over the years, Janjigian Corporation's stockholders have provided $15,250 of capital, part when they purchased new issues of stock and part when they allowed management to retain some of the firm's earnings. The firm now has 1,000 shares of common stock outstanding, and it sells at a price of $42.00 per share. How much value has Janjigian's management added to stockholder wealth over the years, i.e., what is Janjigian's MVA?

a. $21,788
b. $22,935
c. $24,142
d. $25,413
e. $26,750

*ANSWER:* e

*RATIONALE:*

| | |
|---|---|
| Total book value of equity | $15,250 |
| Stock price per share | $42.00 |
| Shares outstanding | 1,000 |
| Market value of equity | 42,000 |
| MVA = | **26,750** |

*POINTS:* 1
*DIFFICULTY:* Difficulty: Easy
*QUESTION TYPE:* Multiple Choice

76. Barnes' Brothers has the following data for the year ending 12/31/2015: Net income = $600; Net operating profit after taxes (NOPAT) = $700; Total assets = $2,500; Short-term investments = $200; Stockholders' equity = $1,800; Total debt = $700; and Total operating capital = $2,100. Barnes' weighted average cost of capital is 10%. What is its economic value added (EVA)?

a. $399.11
b. $420.11
c. $442.23

Financial Management Theory and Practice 15th edition Brigham Test Bank

d. $465.50
e. $490.00

*ANSWER:* e

*RATIONALE:*

| | |
|---|---|
| NOPAT | $700 |
| Total operating capital | $2,100 |
| WACC | 10.00% |

EVA = NOPAT − Total operating capital × WACC EVA = $700.00 − $2,100.00 × 10.00% EVA = **$490.00**

*POINTS:* 1
*DIFFICULTY:* Difficulty: Moderate

77. HHH Inc. reported $12,500 of sales and $7,025 of operating costs (including depreciation). The company had $18,750 of investor-supplied operating assets (or capital), the weighted average cost of that capital (the WACC) was 9.5%, and the federal-plus-state income tax rate was 40%. What was HHH's Economic Value Added (EVA), i.e., how much value did management add to stockholders' wealth during the year?

a. $1,357.13
b. $1,428.56
c. $1,503.75
d. $1,578.94
e. $1,657.88

*ANSWER:* c

*RATIONALE:*

| | |
|---|---|
| Sales | $12,500 |
| Operating costs | $7,025 |
| Operating income (EBIT) | $5,475 |
| WACC | 9.5% |
| Tax rate | 40% |
| Investor-supplied capital | $18,750 |

EVA = EBIT(1 − T) − Investor Capital × WACC EVA = $3,285.00 − $1,781.25 EVA = **$1,503.75**
