Name:_____ Class:_____ Date:_____

PowerPoint Module 6: Enhancing Charts

1. Excel is integrated with PowerPoint.
   a. True
   b. False

ANSWER: True
POINTS: 1
REFERENCES: PowerPoint 122
Work with Charts in PowerPoint
QUESTION TYPE: True / False
HAS VARIABLES: False
LEARNING OBJECTIVES: OFFI.PARS.13.161 - Explain PowerPoint charts
DATE CREATED: 3/1/2016 12:08 PM
DATE MODIFIED: 3/1/2016 12:08 PM

2. When you create an Excel chart in PowerPoint, you can perform advanced commands on Excel data in the worksheet window in PowerPoint.
   a. True
   b. False

ANSWER: False
POINTS: 1
REFERENCES: PowerPoint 122
Work with Charts in PowerPoint
QUESTION TYPE: True / False
HAS VARIABLES: False
LEARNING OBJECTIVES: OFFI.PARS.13.161 - Explain PowerPoint charts
DATE CREATED: 3/1/2016 12:08 PM
DATE MODIFIED: 3/1/2016 12:08 PM

3. Excel charts can be embedded or linked in PowerPoint.
   a. True
   b. False

ANSWER: True
POINTS: 1
REFERENCES: PowerPoint 122
Work with Charts in PowerPoint
QUESTION TYPE: True / False
HAS VARIABLES: False
LEARNING OBJECTIVES: OFFI.PARS.13.161 - Explain PowerPoint charts
DATE CREATED: 3/1/2016 12:08 PM
DATE MODIFIED: 3/1/2016 12:08 PM

4. You can add trendlines and error bars to a chart.
   a. True
   b. False

59. Describe in detail your understanding of embedded and linked charts. Discuss their differences and similarities and properly define the terms “source file,” “destination file,” and “source program.”

ANSWER: An embedded chart is an object that is created in a source program, such as Excel, and then inserted to a PowerPoint slide, known as the destination file. An embedded chart becomes a part of the destination file and can be edited in its source program by double-clicking the object. An embedded Excel chart’s data is actually stored in an Excel worksheet that is included with the PowerPoint file.

A linked chart is also created in another program, or source program, and is saved in another file known as a source file. A linked chart is not saved in the destination file. A representation or picture of the linked chart is inserted into the destination file instead of the actual chart. A linked chart can be double-clicked to edit it in its source program.

60. Explain how a chart is animated. Be sure to describe which parts of the chart can be animated and how the animation works.

ANSWER: A chart can be animated as one object, or you can animate the data markers. If the chart is animated as a whole, the entire chart, including the chart background, animate together. If the data markers are animated individually, there are two available choices: by series and by category.

The by series option allows the data markers by each series to be animated. The data markers can be animated individually or as a group.
