College Accounting A Career Approach 13th edition Scott Solutions Manual

SKU: 9781337280563-SOLUTIONS

2 T Accounts, Debits and Credits, Trial Balance, and Financial Statements

TEACHING TIPS:

New to this edition:

This edition will provide students an opportunity to learn QuickBooks Online while they learn Accounting. QuickBooks Online topics covered in the QuickBooks Online Appendix for this chapter include, (1) establishing company settings, (2) modifying the chart of accounts, and (3) adding new customers, vendors, and employees.

Suggested in-class problems:

- Exercise 2-2 (debit and credit, normal balance)
- Exercise 2-3 (transaction analysis)
- Exercise 2-6 (financial statements)
- Demonstration Problem

Suggested homework:

- Problem 2-4 (transaction analysis and financial statements)
- Problem 2-5 (financial statements)

Suggested additional activities:

Active Learning: Create a set of two note cards for each student. Label them "Debit" and "Credit." Call out different account effects and ask students to raise the correct note card. For example, if you call out "Increase to Prepaid Insurance," the students should raise the note card labeled "Debit."

Game: Have students play the DR/CR memory game. Based upon the childhood game Memory, this game tests students' memory of the rules of debits and credits. For more information, see the Instructor's companion site.

QuickBooks Online Activities:

- Complete the QuickBooks Online Appendix, *Accounting with QuickBooks Online,* Chapter 2, Setting Up a New Company.

  The QuickBooks Online Appendix is available on the Cengage Learning companion site at CengageBrain.com

LEARNING OBJECTIVES

1. Determine balances of T accounts.
2. Present the fundamental accounting equation using the T account form, and label the plus and minus sides.
3. Present the fundamental accounting equation using the T account form, and label the debit and credit sides.
4. Record directly in T accounts a group of business transactions involving changes in asset, liability, owner's equity, revenue, and expense accounts for a service business.
5. Prepare a trial balance.
6. Prepare (a) an income statement, (b) a statement of owner's equity, and (c) a balance sheet.
7. Recognize the effect of errors on account balances.

KEY POINTS

1. The T account form is compared with the column arrangement.
2. In the T account form of the fundamental accounting equation, plus (+) and minus (–) signs should be inserted on the correct side of each of the classifications of accounts.
3. The normal balance of an account is on the plus side.
4. The debit side of any T account is the left side.
5. The credit side of any T account is the right side.
6. In the recording of every transaction, the amount placed on the left, or debit, side of an account or accounts must equal the amount placed on the right, or credit, side of another account or other accounts.
7. A trial balance proves the equality of debits and credits.
8. The income statement shows the results of operations for a period of time.
9. The statement of owner's equity shows the activity in the Capital account for a period of time.
10. The balance sheet shows the position or condition of the business at a point in time.

LECTURE OUTLINE

I. The T account form: an account form shaped like the letter *T*.

A. Comparison of the column form with the T account form. Look at the illustration of the Cash account and the T account form in the text (page 50).

B. There are two sides to the T account form. One side is used for increases (+) in an account, and the other side is used for decreases in an account (–).

C. Footings: the totals of the amounts listed on both sides of a T account.

D. Balance: The balance of an account is determined after a group of transactions has been recorded over a period of time. Subtract the smaller footing on one side from the larger footing on the other side. Record the balance on the side having the larger footing. The normal balance is the increase (plus) side of any T account.

II. Developing the full fundamental accounting equation in T account form. The T account for each of the classifications of accounts has an increase (+) and a decrease (–) side.

A. Assets, liabilities, owner's equity, revenue, and expenses.

1. In Chapter 1, we introduced the equation
Assets = Liabilities + Capital – Drawing + Revenue – Expenses

2. T account forms: In T account form, each classification needs to have a plus and a minus side.

a. Assets: As a starter, the plus side for assets is placed on the left, and the minus side is placed on the right.

Assets	
+	–

b. Liabilities and owner's equity: Because these classifications are placed on the opposite side of the equals sign, the plus and minus signs are also placed on the opposite sides (switched around).

Liabilities	
–	+

Owner's Equity	
–	+

3. Asset, liability, and owner's equity classifications together.

Assets		=	Liabilities		+	Owner's Equity	
+	–		–	+		–	+

As shown later, we switch the plus and minus signs on the other side of the equals sign so that we can carry out double-entry accounting.

B. Capital and Drawing: Show Capital and Drawing being placed under the umbrella of Owner's Equity.

C. Revenue and expenses: Show revenue and expenses being placed under the umbrella of owner's equity. Note that transactions involving revenue and expenses are usually increases in the accounts, which will be recorded on the plus sides.

80600_ch02_rev02_001-033.indd 3 College Accounting A Career Approach 13th edition Scott Solutions Manual 12/28/16 8:18 PM

III. Recording transactions involving the account classifications using the concepts of debit and credit. Initially, stress that the left side of an account is called the debit side and the right side is called the credit side. Another word for *left* is *debit,* and another word for *right* is *credit.*

A. Show the fundamental accounting equation with debits and credits.

B. Review the rules of debit and credit.

C. Abbreviations: Traditionally, accountants use *Dr.* and *Cr.*

D. Explain the steps for recording business transactions in T accounts.

1. What accounts are involved?
2. What are the classifications of the accounts involved?
3. Are the accounts increased or decreased?
4. Write the transaction as a debit to one account (or accounts) and a credit to another account (or accounts).
5. Is the equation in balance?

IV. The trial balance.

A. Emphasize that the trial balance is used as a check to ensure that in recording transactions, the total of the amounts placed on the left, or debit, sides of T accounts equals the total of the amounts placed on the right, or credit, sides of T accounts.

B. Prepare a trial balance using account balances. Show how a trial balance is prepared from T accounts.

V. Major financial statements.

A. Emphasize that the income statement is the first major financial statement prepared and that it shows the results of operations for a period of time.

B. The statement of owner's equity is the second major financial statement prepared. It shows the activity in the Capital account for a period of time. The net income from the income statement is required to complete the statement of owner's equity.

C. The balance sheet is the third major financial statement prepared. It shows the condition of a business at a point in time. The ending capital amount is brought from the statement of owner's equity.

VI. Errors exposed by the trial balance: Discuss the causes for errors listed in the text.

A. The procedure for locating and correcting errors is to do everything in reverse.

1. Transpositions: The digits of an amount have been transposed, or switched around.
2. Slides: The decimal point in an amount has been misplaced.
3. Divide by 2 the difference between two trial balance totals. See if the result matches a transaction amount.

B. Errors divisible by 9: If an error exists and the amount of difference between the totals of the trial balance is evenly divisible by 9, the error consists of either a transposition or a slide or both.

DEMONSTRATION PROBLEM

Dr. Christy Rene maintains an office for the practice of veterinary medicine. The account balances as of September 1 follow. All are normal balances.

Assets		**Revenue**	
Cash	$ 2,459	Professional Fees	$72,118
Accounts Receivable	18,120		
Supplies	840	**Expenses**	
Prepaid Insurance	980	Salary Expense	14,380
Automobile	20,650	Rent Expense	10,320
Furniture and Equipment	5,963	Automobile Expense	859
		Utilities Expense	1,213
Liabilities			
Accounts Payable	1,590		
Owner's Equity			
C. Rene, Capital	42,076		
C. Rene, Drawing	40,000		

The following transactions occurred during September of this year.

a. Paid rent for the month, $1,290.

b. Paid $1,800 for one year's coverage of liability insurance.

c. Bought medical equipment on account from Bennett Surgical Supply, $849, paying $200 down with the balance due in 30 days.

d. Billed patients for services performed, $9,015.

e. Paid employee salaries, $1,797.

f. Received and paid gas and electric bill, $112.

g. Received cash from patients previously billed, $11,060.

h. Received bill for gasoline for car, used only in the professional practice, from Garza Fuel Company, $116.

i. Paid creditors on account, $1,590.

j. Dr. Rene withdrew cash for personal use, $5,000.

Instructions

1. Correctly place plus and minus signs under each T account and label the sides of the T accounts as debit or credit in the fundamental accounting equation. Record the account balances as of September 1.
2. Record the September transactions in the T accounts. Key each transaction to the letter that identifies the transaction.
3. Foot the columns and determine the balance in the T accounts.
4. Prepare a trial balance dated September 30, 20--.
5. Prepare an income statement for two months ended September 30, 20--.
6. Prepare a statement of owner's equity for two months ended September 30, 20--.
7. Prepare a balance sheet as of September 30, 20--.

DISCUSSION QUESTIONS

Suggested Responses

1. A trial balance is a list of all account balances. It is used to prove that the total of all of the debit balances equals the total of all of the credit balances. A balance sheet shows only the balances of the asset, liability, and owner's capital accounts.
2. *Debit* means "increase" for asset accounts, the owner's drawing account, and expense accounts; however, *debit* means "decrease" for liability accounts, the owner's capital account, and revenue accounts. *Credit* means "decrease" for asset accounts, the owner's drawing account, and expense accounts; however, *credit* means "increase" for liability accounts, the owner's capital account, and revenue accounts. Debit refers to the left side of a T account, and credit refers to the right side.
3. Footings are the totals of each side of a T account.
4. The net income or net loss from the income statement flows to the statement of owner's equity, which produces the ending capital balance. The ending capital from the statement of owner's equity flows to the balance sheet owner's equity section.
5. A compound entry is a transaction that involves more than one debit and/or more than one credit.
6. The trial balance might not balance because half of a transaction was omitted or because the transaction debits do not equal its credits. The trial balance will not reveal that transactions were omitted or repeated or that an incorrect amount was used for a transaction.
7. *Slide:* \$890 for \$89. *Transposition:* \$327 for \$723. You can determine whether there has been a slide or a transposition by dividing the difference between the two balances by 9. If the difference is evenly divisible, the error is due to either a slide or a transposition.
8. Capital and drawing accounts are under the umbrella of owner's equity because if an owner invests capital, there is an increase in owner's equity and if an owner withdraws (drawing) capital, there is a decrease in owner's equity. Likewise, revenue and expense accounts are under the umbrella of owner's equity because if a business earns revenue, there is an increase in owner's equity, and if a business incurs expenses, there is a decrease in owner's equity.

Exercise 2-4

a. **The owner invested $5,000 cash in the business.**

b. **Paid the rent for the current month, $600.**

c. **Received and paid the advertising bill, $100.**

d. **Bought supplies on account, $720.**

e. **Received and paid the bill for a miscellaneous expense, $50.**

f. **The owner invested personal equipment with a fair market value of $4,000 in the business.**

g. **Bought equipment for $1,500, paying $500 in cash and placing the balance on account.**

h. **Sold services on account, $1,015.**

i. **Received and paid the utility bill, $250.**

j. **The owner withdrew $750 in cash for personal use.**

k. **Sold services for cash, $2,025.**

Exercise 2-7

DESCRIPTION	AMOUNT OF DIFFERENCE	DEBIT OR CREDIT COLUMN OF TRIAL BALANCE UNDERSTATED OR OVERSTATED
0. Example: A $149 debit to Accounts Receivable was not recorded.	*$149*	*Debit column understated*
a. A $42 debit to Supplies was recorded as $420.	**378**	**Debit column overstated**
b. A $155 debit to Accounts Receivable was recorded twice.	**155**	**Debit column overstated**
c. A $179 debit to Prepaid Insurance was not recorded.	**179**	**Debit column understated**
d. A $65 credit to Cash was not recorded.	**65**	**Debit column overstated**
e. A $190 debit to Equipment was recorded twice.	**190**	**Debit column overstated**
f. A $57 debit to Utilities Expense was recorded as $75.	**18**	**Debit column overstated**

Exercise 2-8

a. Equal totals in the trial balance because $38 was debited to Office Equipment and $38 was credited to Cash. Because the correct amount is $380, Office Equipment is understated by $342 and Cash is overstated by $342.

b. Equal totals in the trial balance because $280 was debited to Accounts Receivable and $280 was credited to Cash. Because the $280 should have been debited to Accounts Payable, not Accounts Receivable, the error caused Accounts Receivable to be overstated by $280 and Accounts Payable to be overstated by $280.

c. Equal totals in the trial balance because $245 was debited to Equipment and $245 was credited to Cash. Because the $245 should have been debited to Supplies, not Equipment, the error caused Equipment to be overstated by $245 and Supplies to be understated by $245.

d. Unequal totals in the trial balance because $76 was debited correctly to Accounts Payable but the credit to Cash was transposed as $67. The error caused Cash to be overstated by $9.

SOLUTIONS TO ACTIVITIES

WHY DOES IT MATTER?

Suggested Responses

0. *Owner invested cash in the business. Accounts involved: Cash and Capital. Cash is debited, and Capital is credited.*
1. Bought rock-climbing equipment on account. Accounts involved: Equipment and Accounts Payable. Equipment is debited, and Accounts Payable is credited.
2. Received and paid the electric bill. Accounts involved: Utilities Expense and Cash. Utilities Expense is debited, and Cash is credited.
3. Paid the salary of employees. Accounts involved: Salary Expense and Cash. Salary Expense is debited, and Cash is credited.
4. Received cash from customers for rock-climbing services. Accounts involved: Cash and Rock-Climbing Fees. Cash is debited, and Rock-Climbing Fees is credited.
5. Owner withdrew cash for personal use. Accounts involved: Drawing and Cash. Drawing is debited, and Cash is credited.

WHAT WOULD YOU SAY?

Suggested Response

First, debits must equal credits in a transaction. Second, it is possible to have more than one debit or credit on one side of the equation as long as they offset each other or there are debits or credits on the other side to offset them. In this case, on the left side of the equals sign, there is a $15,000 debit to Equipment (which is a plus) and a $5,000 credit to Cash (which is a minus); on the right side of the equals sign, there is a $10,000 credit to Accounts Payable (which is a plus). Thus, a $10,000 net increase to the left side of the equation is offset by a $10,000 increase on the right side of the equation.

$$+\ 15{,}000\ -\ 5{,}000\ =\ +\ 10{,}000$$

WHAT WOULD YOU DO?

Suggested Response

The bookkeeper has acted irresponsibly. She should have requested assistance from her supervisor and should not have removed the materials from the business. To further complicate her situation, she has violated the privacy of the business's financial materials by having her uncle attempt to assist her. She could be fired for her unethical behavior. She should make a note of the difference as well as her efforts in attempting to find the errors. Then, she should take this information to her supervisor. Financial materials should never be removed from the business and shared with someone outside the circle of the people who have the right to see them. Additionally, a bookkeeper should never report information that is not correct. This is also unethical behavior and could result in termination.

Thirteenth Edition

Chapter 2

T Accounts, Debits and Credits, Trial Balance, and Financial Statements

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Learning Objectives (1 of 2)

- Determine balances of T accounts
- Present the fundamental accounting equation using the T account form and label the plus and minus sides
- Present the fundamental accounting equation using the T account form and label the debit and credit sides
- Record directly in T accounts a group of business transactions involving changes in asset, liability, owner's equity, revenue, and expense accounts for a service business

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Learning Objectives (2 of 2)

- Prepare a trial balance
- Prepare (a) an income statement, (b) a statement of owner's equity, and (c) a balance sheet
- Recognize the effect of errors on account balances

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Learning Objective - 1

- Determine balances of T accounts

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

T Account Form (1 of 2)

- Has the advantage of providing two sides for each account
  - One side is used to record increases in the account
  - Other side is used to record decreases
- Plus side of a T account represents the **normal balance** of that account

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

T Account Form (2 of 2)

Learning Objective - 2

- Present the fundamental accounting equation using the T account form and label the plus and minus sides

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

T Account for Assets

- The T account has a title (such as **Cash**)

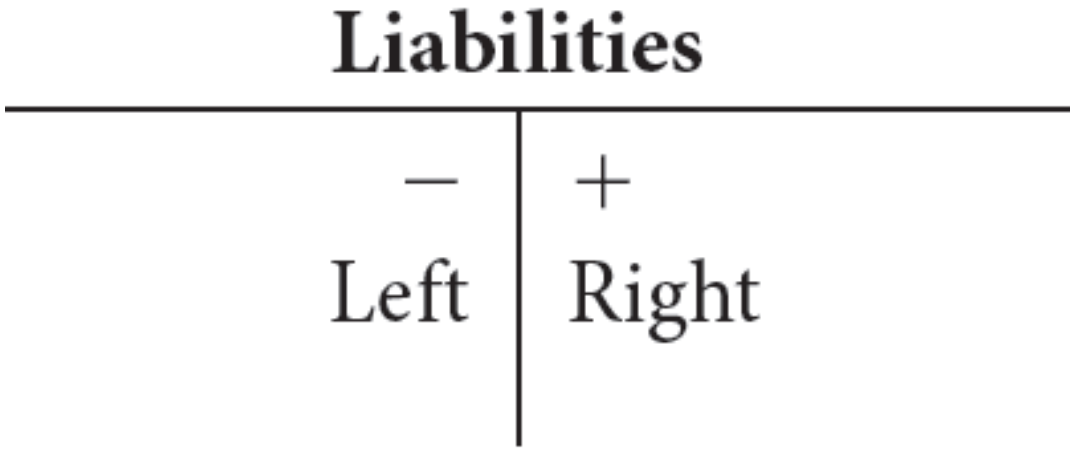

- Assets increase on the left side
- Assets decrease on the right side

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

T Account for Liabilities

- T account title

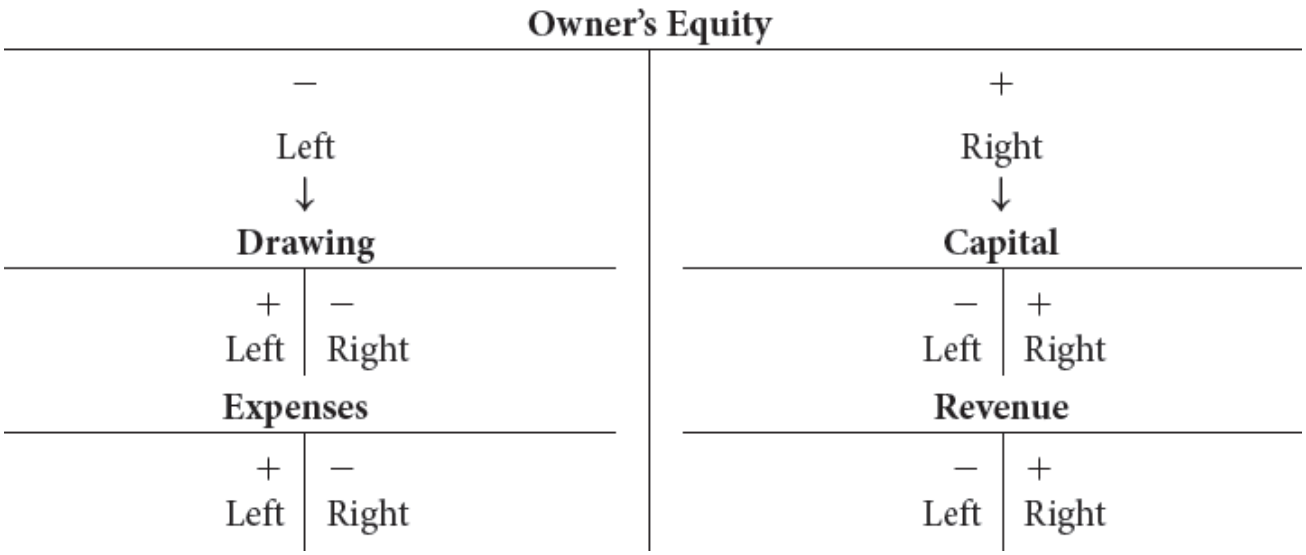

- Liabilities decrease on the left side
- Liabilities increase on the right side

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

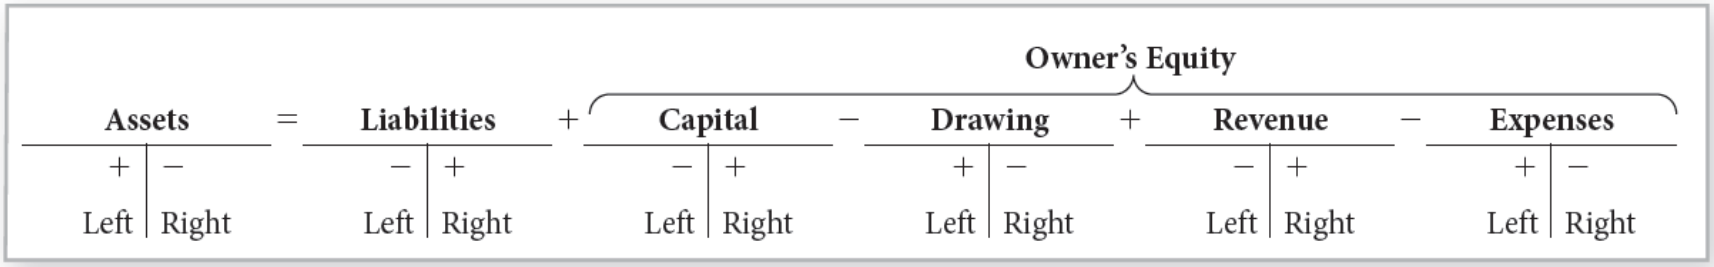

T Account for Owner's Equity

- Left: Drawing and expenses cause a decrease in owner's equity
- Right: Owner's investments (capital) and revenues cause an increase in owner's equity

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Expanded Fundamental Accounting Equation

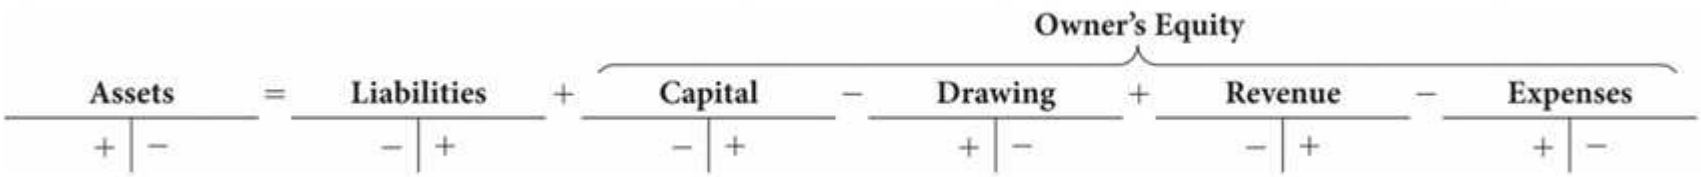

- Assets – The *left* side is the increase side
- Liabilities – The *right* side is the increase side
- Capital - The *right* side is the increase side
- Drawing - The *left* side is the increase side
- Revenue - The *right* side is the increase side
- Expenses - The *left* side is the increase side

CENGAGE

Learning Objective - 4

- Record directly in T accounts a group of business transactions involving changes in asset, liability, owner's equity, revenue, and expense accounts for a service business

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Recording Business Transactions in T Accounts (1 of 3)

- Transaction (a) - Conner deposited $90,000 in a bank account in the name of the business
- Step 1: What accounts are involved?
  - Answer 1: Cash and J. Conner, Capital
- Step 2: What are the classifications of the accounts involved (asset, liability, capital, drawing, revenue, expense)?
  - Answer 2: Cash is an asset account, and J. Conner, Capital, is an owner's equity account

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Recording Business Transactions in T Accounts (2 of 3)

- Step 3: Are the accounts increased or decreased?
  - Answer 3: Cash is being deposited in the bank account, an increase to Cash
    The owner has invested that cash in the business and has increased J. Conner, Capital
- Step 4: Write the transaction as a debit to one account (or accounts) and a credit to another account (accounts)?
  - Answer 4: Because Cash is an asset account and Cash is increased, Cash is debited
    J. Conner, Capital, is an owner's equity account and is increased Thus, J. Conner, Capital, is credited

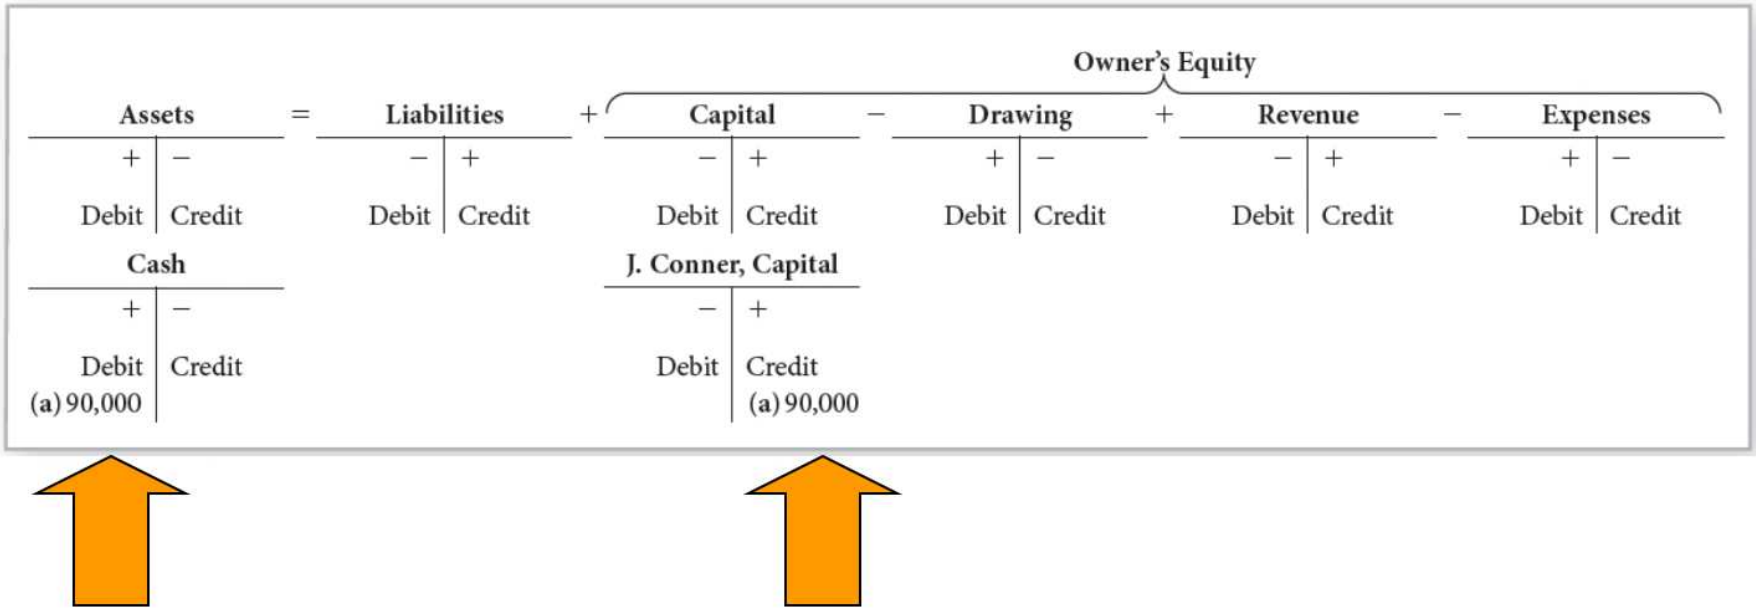

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Recording Business Transactions in T Accounts (3 of 3)

- Step 5: Is the equation in balance after the transaction has been recorded?
  - Answer 5: At least one account is debited, and at least one account is credited
    The total amount(s) debited equals the total amount(s) credited

Learning Objective - 5

- Prepare a trial balance

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Trial Balance (1 of 2)

- Listing of account balances in two columns
  - Left column - Debits
  - Right column - Credits
- Needs to be prepared in the order in which the items appear in the chart of accounts
  - Assets
  - Liabilities
  - Owner's Equity
  - Revenue
  - Expenses

Figure 2 - Trial Balance

Account Titles	TRIAL BALANCE	
	Left, or Debit, Balances	Right, or Credit, Balances
Assets	Assets	
Liabilities		Liabilities
Capital		Capital
Drawing	Drawing	
Revenue		Revenue
Expenses	Expenses	
Totals		

- Normal balance of each account is on its plus side

Trial Balance (2 of 2)

Column headings identify information in each column

Conner's Whitewater Adventures
Trial Balance
June 30, 20--

Account Name	Debit	Credit
Cash	55,890	
Accounts Receivable	4,250	
Supplies	675	
Prepaid Insurance	1,875	
Equipment	51,300	
Accounts Payable		3,425
J. Conner, Capital		95,200
J. Conner, Drawing	3,500	
Income from Tours		23,320
Wages Expense	2,360	
Rent Expense	1,250	
Advertising Expense	620	
Utilities Expense	225	
	121,945	121,945

Accounts listed in order of the chart of accounts

Dollar signs not used on a trial balance

Single underline beneath figures to be added

Double underline beneath column totals

Practice Exercise 5

- Using the following account balances, prepare a trial balance for Collins's Backpack Adventures as of July 31, 20--

Accounts Payable	$ 3,325	J. Collins, Drawing	$3,400
Accounts Receivable	4,150	Prepaid Insurance	1,675
Advertising Expense	680	Rent Expense	1,350
Cash	55,830	Supplies	575
Equipment	51,500	Utilities Expense	325
Income from Treks	23,220	Wages Expense	2,460
J. Collins, Capital	95,400

Learning Objective - 6

- Prepare (a) an income statement, (b) a statement of owner's equity, and (c) a balance sheet

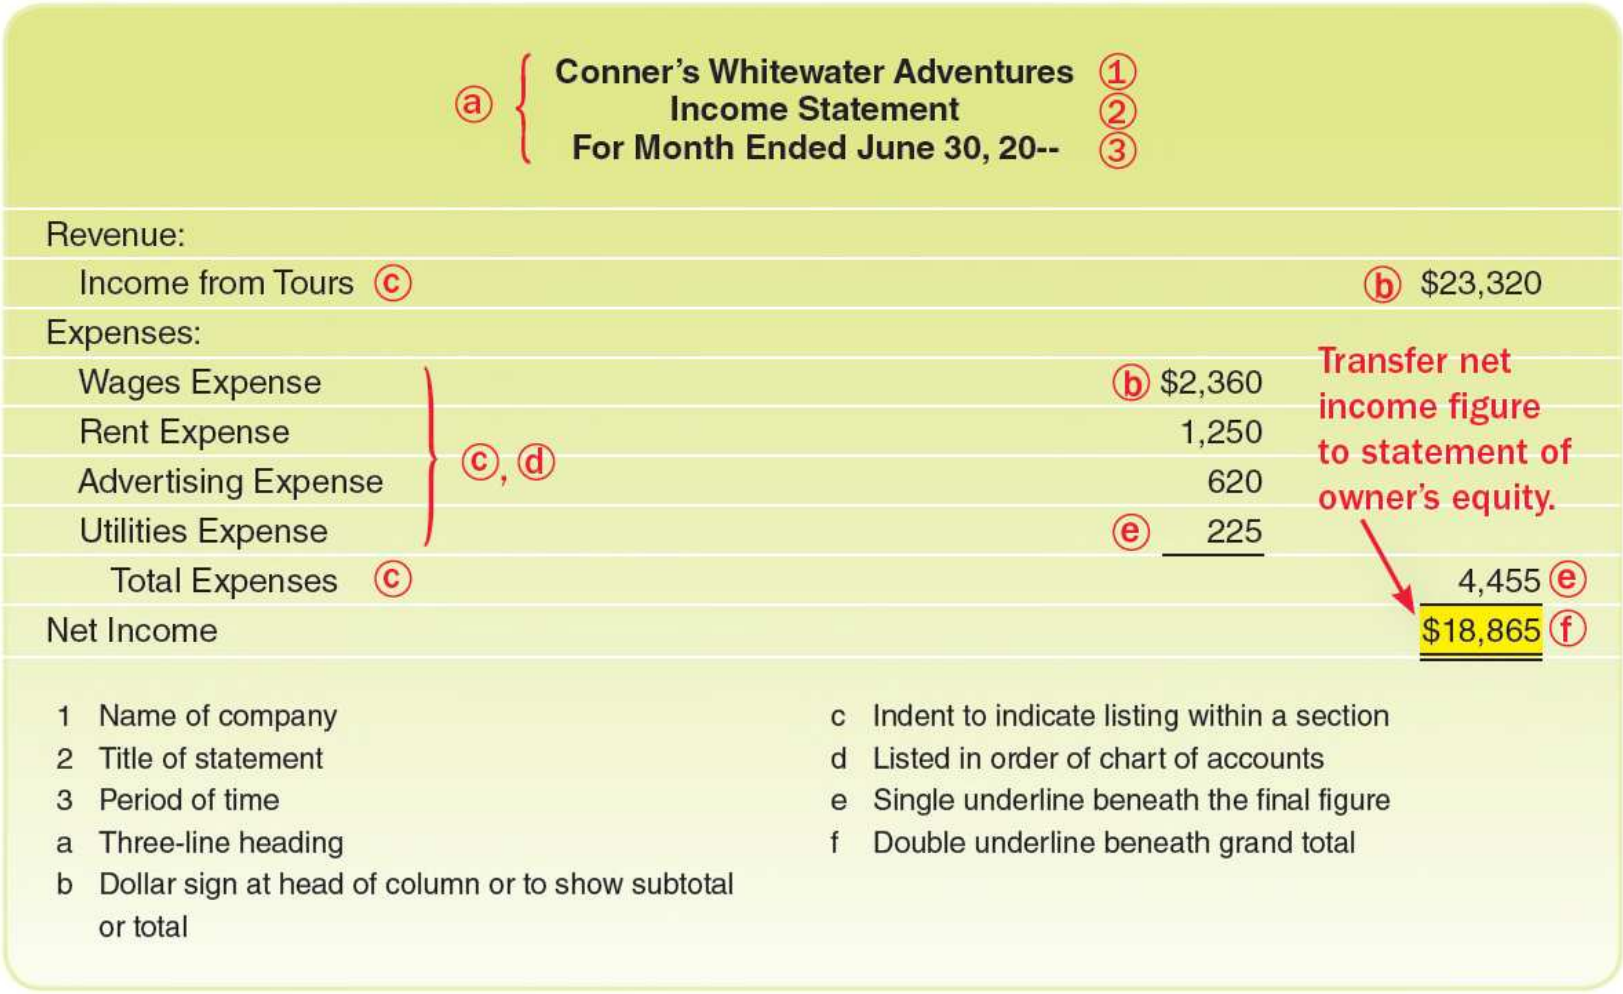

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Income Statement

- Shows total revenue minus total expenses, which yields the net income or net loss
- Reports how the business has performed over a period of time, usually a month or a year
- When total revenue exceeds total expenses over the period, the result is a **net income**, or profit
- When the total revenue is less than total expenses, the result is a **net loss**

College Accounting A Career Approach 13th edition Scott Solutions Manual

Statement of Owner's Equity

- Shows how—and why—the owner's equity or Capital account has changed over a stated period of time
- Prepared after the accountant has determined the net income or net loss on the income statement

CENGAGE

Figure 4 - Statement of Owner's Equity

ⓐ Conner's Whitewater Adventures ①			
Statement of Owner's Equity ②			
For Month Ended June 30, 20-- ③			
J. Conner, Capital, June 1, 20--		ⓑ	$ 0
Investment during June	ⓑ $ 95,200		
Net Income for June	18,865		
Subtotal	$ 114,065		
Less Withdrawals for June	ⓒ 3,500		
Increase in Capital		ⓒ	110,565
J. Conner, Capital, June 30, 20--		ⓓ	$110,565

Carried from income statement

Transfer ending capital to balance sheet

1	Name of company	b	Dollar sign at head of column or to show subtotal or total
2	Title of statement	c	Single underline beneath the final figure
3	Period of time	d	Double underline beneath grand total
a	Three-line heading

College Accounting A Career Approach 13th edition Scott Solutions Manual

Balance Sheet

- Shows the financial position of a business's assets offset by claims against them as of a particular date
- Balance sheet summarizes the balances of the asset, liability, and owner's equity accounts on a given date (usually the end of a month or year)

Practice Exercise 6

- Use the trial balance in Practice Exercise 5 to prepare (a) an income statement, (b) a statement of owner's equity, and (c) a balance sheet. Assume that Collins's Backpack Adventures started business on July 1, 20--.

Collins's Backpack Adventures
Trial Balance
July 31, 20—

Account Name	Debit	Credit
Cash	55,830	
Accounts Receivable	4,150	
Supplies	575	
Prepaid Insurance	1,675	
Equipment	51,500	
Accounts Payable		3,325
J. Collins, Capital		95,400
J. Collins, Drawing	3,400	
Income from Treks		23,220
Wages Expense	2,460	
Rent Expense	1,350	
Advertising Expense	680	
Utilities Expense	325	
	121,945	121,945

Learning Objective - 7

- Recognize the effect of errors on account balances

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Errors Exposed by the Trial Balance

- Evident when the debit and credit columns in a trial balance are not equal
- Include:
  - Making errors in arithmetic
  - Recording only half an entry
  - Recording both halves of the entry on the same side
  - Recording one or more amounts incorrectly

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Procedure for Locating Errors

- Effective method for locating errors is to do everything in reverse
  - Involves:
    - Looking at the pattern of the balances to see if a normal balance was placed in the wrong column on the trial balance
    - Re-adding the trial balance columns
    - Checking the transferring of the figures from the accounts to the trial balance
    - Verifying the footings and balances of the accounts

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Transpositions

- Digits being transposed, or switched around, when the numbers are copied from one place to another
  - Example - Writing 619 for 916 (the difference of 297 is evenly divisible by 9)

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Slides

- Errors in placing the decimal point
  - Example - Writing $27,000 for $2,700 (the difference of 24,300 is evenly divisible by 9)
- An error may be a combination of a transposition and a slide
  - Example - Writing $54 for $450 (the difference of $396 is evenly divisible by 9 with no remainder)

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Practice Exercise 7

- Identify the following errors as transpositions or slides and indicate the amount of the difference and whether it is divisible by 9
  a. The amount of supplies bought totaled $341, but it was written as $431
  b. Equipment was purchased for $3,500, but it was written as $35
  c. An error was made in the trial balance because $35 was written as $530

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Practice Exercise 7 – Solution (1 of 2)

a. Transposition: The difference is $90 and can be evenly divided by 9

Correct Number	Number Copied	Difference	Difference Divided by 9
$341	$431	$90	$90 ÷ 9 = $10

b. Slide: The difference is $3,465 and can be evenly divided by 9

Correct Number	Number Copied	Difference	Difference Divided by 9
$3,500	$35	$3,465	$3,465 ÷ 9 = $385

CENGAGE
© 2019 Cengage. All rights reserved.
College Accounting A Career Approach 13th edition Scott Solutions Manual

Practice Exercise 7 – Solution (2 of 2)

c. Transposition and slide: The difference is $495 and can be evenly divided by 9

Correct Number	Number Copied	Difference	Difference Divided by 9
$35	$530	$495	$495 ÷ 9 = $55
