Taylor, a widow, makes cash gifts to her five married children (including their spouses) and to her seven grandchildren. What is the maximum amount Taylor can give for calendar year 2025 without using her unified transfer tax credit?

Suggested answer: *$323,000 [$19,000 (annual exclusion)×17 donees].*

Q82. *[Short Response] · Bloom's: Apply*

Paige is the sole shareholder of Citron Corporation. During the year, she leases a building to Citron for a monthly rental of $80,000. If the fair rental value of the building is $60,000, what are the income tax consequences to the parties involved?

Suggested answer: *The rent charged by Paige is not "arms length"; as such, Citron Corporation's rent deduction is $60,000 (not $80,000). The $20,000 difference is a nondeductible dividend distribution. For Paige, the change merely requires reclassification. Instead of $80,000 of rent income, she has $60,000 of rent income and $20,000 of dividend income.*

Q83. *[Short Response] · Bloom's: Apply*

In 1994, Martina leased real estate to Drab Corporation for 20 years. Drab Corporation made significant capital improvements to the property. In 2013, Drab decided not to renew the lease and vacated the property. At that time, the value of the improvements was $800,000. Martina sells the real estate in 2025 for $1,200,000 of which $900,000 is attributable to the improvements. When is Martina taxed on the improvements made by Drab Corporation?

Suggested answer: *Martina is not subject to taxation on the improvements until she disposes of the property (i.e.,2025). After a controversial Supreme Court decision years ago, Congress clarified the tax law to make it more consistent with the wherewithal to pay concept.*

Q84. *[Essay] · Bloom's: Understand*

The Federal income tax is based on a pay-as-you-go system and has become a “mass tax.” Explain this statement.

> ***Suggested answer:*** *The pay-as-you-go system is present in the wage and other withholding procedures. In the case of self-employed persons, it is manifested in the required quarterly payments for estimated taxes. The income tax became a mass tax during World War II when its coverage was extended to 74% of the population (from less than 6% in 1939).*

Q85. *[Essay] · Bloom's: Understand*

Due to population change, Goose Creek School District has decided to close one of its high schools. Since it has no further need of the property, the school is listed for sale. The two bids it receives are as follows:

United Methodist Church$1,700,000

Planet Motors1,600,000

The United Methodist Church would use the property to establish a sectarian middle school. Planet, a well-known car dealership, would revamp the property and operate it as a branch location.

If you were a member of the School District board, what factors would you consider in evaluating the two bids?

> ***Suggested answer:*** *Although the bid from the United Methodist Church is higher, several other factors need to be considered. Does, for example, Goose Creek School District exempt property owned by churches from itsad valoremtaxes? If so, losing this property from the tax base could prove very costly over the long run. Also, it is probable that income-producing property (such as a car dealership) would be taxed at a higher rate than that owned by a nonprofit organization (a school operated by a church). This assumes, of course, that the school would be taxed at all. The auto dealership also would generate sales tax.*

Q86. *[Essay] · Bloom's: Understand*

Morgan inherits her father’s personal residence including all of the furnishings. She plans to add a swimming pool and sauna to the property and rent it as a furnished house. What are some of the*ad valorem*property tax issues Morgan can anticipate?

> ***Suggested answer:*** *The real estate taxes probably will increase for several reasons. The capital improvements and the conversion from residential to rental will trigger the increase. Furthermore, the furnishings may generate anad valoremtax on personalty. (Depending on applicable law, furniture might not be subject to tax unless used for business purposes—such as in this case.)*

Q87. *[Essay] · Bloom's: Understand*

In 2023, Deborah became 65 years old. In 2024 she added a swimming pool and in 2025 she converted the residence to rental property and moved into an assisted living facility. Since 2022, Deborah’s*ad valorem*property taxes have decreased once and increased twice. Explain.

> ***Suggested answer:*** *The decrease probably came in 2023 when Deborah reached age 65. The increases probably occurred in 2024 when she added the pool and in 2025 when the residence was converted to rental property with the property reassessed due to the change in use and/or removal of the homestead exemption.*

Q88. *[Essay] · Bloom's: Understand*

A lack of compliance in the payment of use taxes can be resolved by several means. In this regard, comment on the following:

a.Registration of automobiles.
b.Reporting of Internet purchases on state income tax returns.

Suggested answer: *a.*

As reflected in Example 5, re-registration of a car purchased out of state is the occasion for the owner's home state to collect the use tax.

b.

Completing the state income tax return reminds (or forces) the taxpayer to pay use tax on out of state purchases.

Q89. *[Essay] · Bloom's: Analyze*

What are the pros and cons of the following state and local tax provisions?

a.An*ad valorem*property tax holiday made available to a manufacturing plant that is relocating.
b.Hotel occupancy tax and a rental car surcharge.
c.A back-to-school sales tax holiday.

Suggested answer: *a.*

Such a holiday is designed to attract new industry to the area. This will bring more jobs and growth in consumption. On the other hand, if the tax holiday is too generous, this places a strain on available public revenue. The result could be that schools and capital maintenance (roads, public services) will suffer.

b.

The hotel occupancy tax and car rental surcharges are popular because they mainly impact visitors. Also, they can generate considerable revenue to finance major capital improvements. If these taxes become excessive, however, they could discourage major events (such as conventions).

c.

Such holidays are popular with both merchants and consumers and serve the social need of defraying some of the costs of sending children to school. Once established, however, they are difficult to get rid of. Thus, they become an annual drain on sales tax revenue.

In addition, since they are available to buyers at all income levels, they provide tax savings to taxpayers who do not need them and who might obtain greater tax breaks than others, as they have more funds to spend on the tax free items.

Q90. *[Essay] · Bloom's: Evaluate*

What is a severance tax? How productive can it be in terms of generating revenue?

> ***Suggested answer:*** *A severance tax is one imposed when natural resources (e.g., oil, gas, iron ore, coal) are extracted. It is based on the notion that the state has an interest in such resources. For some states, the revenue from severance taxes can be significant. Alaska, for example, relies heavily on its severance taxes and has been able to avoid both a state income tax and a general sales tax.*

What is the difference between an inheritance tax and an estate tax? Who imposes these taxes?

> ***Suggested answer:*** *An inheritance tax is a tax on the right to receive property from a decedent. An estate tax is imposed on the right to pass property at death. The Federal government imposes estate taxes and states impose inheritance taxes. Some states impose both, whereas others impose neither.*

What might cause an individual to owe income taxes in more than one state?

> ***Suggested answer:*** *Working in more than one state or owning income-generating property in more than one state can cause this.*

Q94. *[Essay] · Bloom's: Understand*

Virtually all state income tax returns contain checkoff boxes for donations to various causes. On what grounds has this procedure been criticized?

> ***Suggested answer:*** *In many cases, the procedure is overused (i.e., a multiplicity of boxes). This overuse adds complexity to the return. Also, in most cases, the donation is being drawn from any income tax refund that might be due. Thus, taxpayers may not fully appreciate that they are paying for such checkoffs.*

Q95. *[Essay] · Bloom's: Evaluate*

State and local governments are sometimes forced to find ways to generate additional revenue. Comment on the pros and cons of the following procedures:

a.Decouple what would be part of the piggyback format of the state income tax.
b.Tax amnesty provisions.
c.Internet shaming.

Suggested answer: *a.*

The decoupling process is easily accomplished regarding new Federal tax changes that have never taken effect at the state level. Taxpayers are not apt to miss what they never have enjoyed.

b.

Tax amnesty provisions generate considerable revenue. It also unmasks many taxpayers who have not previously paid taxes. Now that the taxing jurisdiction is aware of their existence, they will tend to pay taxes in the future.

c.

By use of a public internet site, the taxing authority posts the names of those taxpayers that are delinquent as to various taxes (e.g., sales, income). This public humiliation (or threat of) very often results in compliance.

Q96. *[Essay] · Bloom's: Understand*

Briana lives in one state and works in the adjoining state. Both states tax the income she earns from her job. Does Briana have any relief from this apparent double taxation of the same income?

Suggested answer: *Most states allow their residents some form of tax credit for the income taxes paid to other states. In Briana's case, the credit would be allowed by the state where she lives for the taxes paid to the state where she works.*

Q97. *[Essay] · Bloom's: Understand*

In terms of revenue neutrality, comment on a tax cut enacted by Congress that:

a.Contains revenue offsets.
b.Includes a sunset provision.

Suggested answer: *a.*

Ideally, to achieve revenue neutrality, all tax cuts should be accompanied by revenue offsets.

b.

A sunset provision does not account for the immediate revenue losses generated by a tax cut. It merely provides that such losses will not continue beyond a specified date when the tax cut expires and the former tax law is reinstated.

Q98. *[Essay] · Bloom's: Understand*

The tax law contains various tax credits, deductions, and exclusions that are designed to encourage taxpayers to obtain additional education. On what grounds can these provisions be justified?

Suggested answer: *Social and economic considerations are the justification. As to the latter, a better educated workforce carries a positive economic impact.*

Q99. *[Essay] · Bloom's: Understand*

The tax law contains various provisions that encourage home ownership.

a.On what basis can this objective be justified?
b.Are there any negative considerations? Explain.

Suggested answer: *a.Home ownership can be justified on economic and social grounds.*
b.

Granting tax advantages to persons who are purchasing their homes places the taxpayers who rent at a disadvantage. The result is inequality in treatment.

Q100. *[Essay] · Bloom's: Understand*

The tax law allows an income tax deduction (or a credit) for foreign income taxes. Explain why.

Suggested answer: *The deduction (or a credit) for foreign income taxes can be justified on the grounds that it mitigates the double tax imposed on the same income.*

Q101. *[Essay] · Bloom's: Understand*

The tax law allows, under certain conditions, deferral of gain recognition for involuntary conversions.

a.What is the justification for this relief measure?
b.What happens if the proceeds are not entirely reinvested?

Suggested answer: *a.*

By recognizing that the taxpayer's relative economic situation has not changed and that they lack the wherewithal to pay a tax, any recognition of realized gain is deferred.
b.

If the proceeds from an involuntary conversion are not fully reinvested in property that is similar or related in service or use, recognized gain results. Such recognized gain cannot exceed realized gain and will be limited to the amount of the proceeds not reinvested. Recognition is based on the notion that the taxpayer now has the wherewithal to pay the tax that results.

Q102. *[Essay] · Bloom's: Understand*

How do the net operating loss provisions in the tax law mitigate the effect of the annual accounting concept?

Suggested answer: *Without the allowance of a loss carryforward, the losses would disappear. As shown by Example 27, this result places a business with profit and loss fluctuations on a more level playing field with one that maintains a stable income pattern.*

Q103. *[Essay] · Bloom's: Understand*

Congress reacts to judicial decisions that interpret the tax law in different ways. When it approves of a decision, Congress may act to amend the Code to incorporate the holding. When it disapproves, Congress may amend the Code to nullify its effect. Give an example of each one of these congressional reactions.

> ***Suggested answer:*** *Congress approved of the judicial conclusion that most stock dividends should be nontaxable and amended the Code to this effect. However, it disagreed as to when leasehold improvements should be taxed to a lessor. Consistent with the wherewithal to pay concept, the improvements are to be taxed on the termination of the lease. Thus, Congress overturned a judicial holding that would have taxed such improvements in the year they are made by the lessee.*

Q104. *[Essay] · Bloom's: Understand*

Can a taxpayer start the three-year statute of limitations on additional assessments by the IRS by filing his income tax return early (i.e., before the due date)? Can the period be shortened by filing late (i.e., after the due date)?

> ***Suggested answer:*** *The answer isnoin both cases. When filing early, the statute starts to run on the due date of the return. When filing late however, the filing date controls.*

Q105. *[Essay] · Bloom's: Understand*

Congressman Smith wants to impose a new tax on sugar drinks. Analyze this proposal against the principles of equity, simplicity, and neutrality.

> ***Suggested answer:*** *Equity – The tax is regressive in that it will represent a larger portion of a low-income individual's income relative to a higher-income individual.*
>
> *Simplicity – While it sounds simple because the ingredients on a container should indicate if there is sugar, issues might arise as to how other forms of sugar, such as corn syrup, affect application of the tax. Also, the amount of sugar in beverages can vary, so some might argue that the tax should not apply if the sugar level is minimal. Will the tax apply to drinks already subject to the alcohol taxes? (Include some discussion of problems of defining sugar drink in the answer.)*
>
> *Neutrality – The tax will likely reduce sales of sugar drinks.*

Q106. *[Essay]*

Ultimately, most taxes are paid by individuals. Explain what this means in terms of income and payroll taxes paid by a corporation.

> ***Suggested answer:*** *A corporation pays many types of taxes, but like any other expenditure, some of these taxes are ultimately paid by an individual. Income taxes are included in the price the corporation charges for goods and services. Or all or part might result in reduced earnings affecting investors or through reduced wages affecting employees. The payroll taxes paid by the corporate employer are likely borne by workers in the form of lower wages. That is, if the employer did not have to pay the taxes, it could pay higher wages to employees. These taxes might also be borne by customers and investors.*
